1 Introduction

1.1 Purpose

This document lists the specific conformance requirements for the Personal Health Summary¹ documents that are in addition to the *Clinical Documents - Common Conformance Profile* [NEHTA2015a]. Both documents represent the complete conformance requirements for Personal Health Summary documents.

1.2 Intended audience

This document is intended for the following organisations:

- vendors and developers of connecting systems; and
- software test laboratories

1.3 Scope

The scope of this conformance profile is the use of Personal Health Summary documents in the context of the My Health Record system, that is, in a “point-to-share” environment.

¹ Personal Health Summary was previously called “Consumer Entered Health Summary”. Parts of this document refer to specifications with the old name.

2 Personal Health Summary

This section describes the conformance criteria specific to the Personal Health Summary document type.

2.1 Relevant specifications

Related specifications are listed below:

1. *Consumer Entered Health Summary Structured Content Specification* [NEHTA2011a]
2. *Consumer Entered Health Summary CDA Implementation Guide* [NEHTA2011b]

2.2 Objects of conformance

027378 Types of producers

A Personal Health Summary document **SHALL** only be produced by:

- Registered consumer portals
- Registered care agency employee portals

Priority Mandatory

Additional Notes Care agency employee portals are only available to employees who have a care agency employee identifier assigned to them. A care agency employee is typically not a healthcare provider.

2.3 Conformance criteria for producers

027379 Document conformance levels

A CDA document sent to the My Health Record system **SHALL** conform to the requirements for one, and only one, of the following conformance levels: 3A or 3B, as defined in *Clinical Documents - Common Conformance Profile* [NEHTA2015a].

Priority Mandatory

027381 Support for authorship by care agency employees

The Personal Health Summary document **SHALL** permit a care agency employee identifier to be stored as the document author's identifying number.

Priority Mandatory

Additional Notes In some cases, the author of an individual's Personal Health Summary document may be a care agency employee whose identity is not associated with an IHI. The care agency employee identifier may be used instead of an IHI.

Glossary

Acronyms

Acronym	Description
CDA	Clinical Document Architecture
HL7	Health Level Seven

Glossary terms

Term	Description
Clinical Document Architecture (CDA)	An HL7 standard intended to specify the encoding, structure and semantics of clinical documents for exchange.
conformance	Conformance is a measurement (by testing) of the adherence of an implementation to a specification or standard.
Health Level Seven (HL7)	HL7 provides standards for the exchange, management and integration of data that supports clinical patient care and the management, delivery and evaluation of healthcare services. Specifically, HL7 creates flexible, cost effective approaches, standards, guidelines, methodologies which enable healthcare information system interoperability and sharing of electronic health records.
