

Personal Health Summary v1.1 Release Note

19 May 2016

Approved for external information

End product identifier: EP-2272:2016

Release rationale

This release of the Personal Health Summary end product introduces a new *Conformance Profile* and updates the *Template Package Library*.

Note: With this release, the 'Common - Consumer Entered Information - PCEHR Conformance Profile v1.3' will be archived and the Personal Health summary Conformance points that are in the 'Common - Consumer Entered Information - PCEHR Conformance Profile' will be reflected in this new profile, titled Personal Health Summary – My Health Record Conformance Profile v1.0.

Conformance profile

The My Health Record programme has identified specific use cases where the author of a personal health summary may not have an individual healthcare identifier (IHI). For example, a care agency worker may add a personal health summary to the My Health Record system on behalf of an individual. The conformance profile allows for the use of an alternative identifier in these circumstances.

Template package library

The updated *Template Package Library* contains all template packages available for the Personal Health Summary document type. These can be identified using the template package ID given in the table below. The template package has been updated to allow the use of a care agency employee identifier instead of an IHI.

Document type variant	Conformance level	Template package ID
default	3A	1.2.36.1.2001.1006.1.16685.3 - CL 3A (svn-38777)

The full list of published template packages can be found in the *Template Package Directory* published as part of the *Common – Clinical Document* end product.

Package inclusions

New

Identifier	Name
NEHTA-2275:2016	<i>Personal Health Summary – My Health Record Conformance Profile v1.0</i>

Updated

Identifier	Name

Future releases

Increased uptake and implementation of the specifications provided as part of this end product are expected to result in the need to further update and improve these specifications. Any such updates will be managed through the joint change control process operated by the Commonwealth Department of Health.

In addition to changes managed through the joint change control process, NEHTA may provide supplementary implementation guidance for the specifications of this end product. Such information will be added to the end product as additional or updated product components and published as an incremental release of the end product (version identifier 1.0.x).

Previous releases

Date	Version
18 Aug 2014	EP-1751:2014 Personal Health Summary v1.0.1 Release note Release rationale This incremental release of the Personal Health Summary end product introduces the <i>Template Package Library</i> as a new product component. This version of the template package library contains all template packages available for the Personal Health Summary document type at the time of publication. Document type name change 'Consumer Entered Health Summary' has been changed to 'Personal Health Summary' (approved change request CCB-0297). This is reflected in the name of this end product and the names of its new or updated product components. Names of other product components will be adjusted on their next update.
27 June 2012	EP-0933:2012 Consumer Entered Health Summary v1.0 Release note Release rationale This release defines the goal-state solution for the content of consumer entered health summaries communicated to the PCEHR system. This release includes the <i>Consumer Entered Health Summary Information Requirements v1.0</i> .
