

eProcurement v1.6.1

Release Note

17 July 2014

Approved for external information

End product: EP-1727:2014 eProcurement v1.6.1

Release rationale

This incremental release updates the Description/Comments row in *GS1 XML Purchase Order Response – Message Implementation Guidelines* Section 4.18 Substitute Product Identifier.

This change clarifies trade item identification and substitution variances between the GS1 Business Message Standards and the NEHTA message implementation guidelines. The GS1 Business Message Standards define a substitute GTIN as the GTIN of the product originally ordered, whereas the NEHTA specification identified this as any substitute item that may be offered in lieu of the item originally requested.

Updated text

Related to Product identification - Unique product identifier. Where used this identifies the original GTIN of the substituted item. If a product has been substituted, the item supplied will be identified in *tradeItemIdentification* → *gtin*.

Previous text

Related to Product identification - Unique product identifier. This identifies any substitute item that may be offered in lieu of the item originally requested.

Product components

Updated

Identifier	Name
NEHTA-1728:2014	eProcurement – Release Note v1.6.1 (<i>this document</i>)

This release will be supported for two years.

For further support or to provide feedback, please email help@nehta.gov.au

Future releases

Future releases will be completed by GS1 Australia with support and assistance from NEHTA. Any future release will be determined by industry recommendations and feedback.

Previous releases

Date	Version
27 February 2014	EP-1367:2014 eProcurement v1.6 Release rationale: <ul style="list-style-type: none">• Renames the National Product Catalogue end product to “eProcurement”, which more accurately reflects the content.• Introduces an implementation guide for loan products booking and consumption.• Updates the message implementation guidelines (MIGs), harmonised to a national standard across all public jurisdictions. This release adds functionality to address loan and consignment stock, as well as guidelines for the use of Radio Frequency Identification (RFID) for medical devices.• Removes and archives the remaining product components that are out of date.
11 November 2010	EP-1003:2010 National Product Catalogue v1.5
