Secure Messaging v1.0.2
Release Note

24 March 2014
Approved for external information

Summary

End Product: EP-1644:2014 Secure Messaging v1.0.2

Release rationale

This release of the Secure Messaging end product removes the developer resource product components and related product data sheets. These have been republished in a new end product, Secure Messaging Integration Toolkit v1.0, available from the link below.

http://www.nehta.gov.au/implementation-resources/ehealth-reference-platform/secure-messaging-integration-toolkit

The Secure Messaging Integration Toolkit contains libraries for B2B connectivity to Secure Message Delivery (SMD) and Endpoint Location Services (ELS), providing sample code for all operations, as well as a Medical Document Management (MDM) library to create the payload for SMD.

This release also removes two product components, which are no longer relevant.

Previous releases

End Product: EP-1566:2013 Secure Messaging v1.0.1

19 December 2013

NEHTA's Secure Messaging V1.01 provides software developers with information and tools to assist in the implementation of Secure Message Delivery (SMD) and Endpoint Location Service (ELS).

Release rationale

This incremental release includes:

- Two new product data sheets (Endpoint Location Service Client Library and Secure Message Delivery Client Library)

- File name change to some of the Endpoint Location Service and Secure Message Delivery product components to group them logically in the product component list (no change to content of the files). These files are marked with an asterisk in the second table below.
