

Healthcare Identifiers Integration Toolkit v1.1

Release Note

19 December 2014

Approved for external information

EP-1941:2014 Healthcare Identifiers Integration Toolkit v1.1

Release rationale

This release includes additional B2B functionality not previously included in the libraries. The libraries now support the management of organisational information, including the publishing of an organisation and ELS endpoint to support SMD.

The Java library has also been updated and aligned with all other Java-based code to support up to Java version 7.2.1.

Package inclusions

Updated

Identifier	Name and version
NEHTA-1944:2014	Healthcare Identifiers Integration Toolkit - Release Note v1.1 (<i>this document</i>)
NEHTA-1930:2014	Healthcare Identifiers B2B Client Library - .NET Sample Code v1.3.0
NEHTA-1931:2014	Healthcare Identifiers B2B Client Library - Java Sample Code v1.5.0
NEHTA-1929:2014	Healthcare Identifiers B2B Client Library - Compiled WSDLs for Java v1.5.0

No change

Identifier	Name and version
NEHTA-1615:2014	Healthcare Identifiers B2B Client Library - Product Data Sheet v1.0

Audience

- Software vendors
- Jurisdictions
- Testers

Known issues

None known

Future releases

There will be regular updates to address any new features and bug fixes found.

Previous releases

EP-1638:2014 Healthcare Identifiers Integration Toolkit v1.0

11 March 2014

Release rationale

The eHealth integration toolkits are a collection of integration tools and sample code resources available in both .NET and Java. The sample code and integration tools are used within the eHealth Reference Platform, forming part of the code library for tools and simulators. Access to sample code and the eHealth Reference Platform's online simulator services is supported by suitable right-to-use licenses and terms and conditions regarding the eHealth Reference Platform.¹ (The eHealth integration toolkits are available from <http://www.nehta.gov.au/implementation-resources/ehealth-reference-platform.>)

The Healthcare Identifiers Integration Toolkit contains libraries for B2B connectivity to the Health Identifiers Service, searching for IHI, HPI-Is and HPI-Os.

Note that the product components included in this release were previously released on nehta.gov.au as part of the Healthcare Identifiers Service end products. See page 2 for a mapping of the relevant product component identifiers.

Package inclusions

New (to this end product)

Highlighted rows indicate that the version is an update to the previous version published on nehta.gov.au.

Identifier	Name and version
NEHTA-1638:2014	Healthcare Identifiers Integration Toolkit - Release Note v1.0
NEHTA-1615:2014	Healthcare Identifiers B2B Client Library - Product Data Sheet v1.0
NEHTA-1612:2013	Healthcare Identifiers B2B Client Library - .NET Sample Code v1.2.1
NEHTA-1614:2014	Healthcare Identifiers B2B Client Library - Java Sample Code v1.4.1
NEHTA-1613:2013	Healthcare Identifiers B2B Client Library - Compiled WSDLs for Java v1.3.0

Earlier releases

Some of the product components in this release, or their earlier versions, were previously released on nehta.gov.au under a different end product, with a different identifier and slightly different name.

¹ Notice of Connections (NOC) for HI and PCEHR, and CCA conformance testing for all code, must still be completed by the vendor as per the license agreement that accompanies each product, which states that it is the vendor's "responsibility to test and validate the use of this product within your software".

The table below shows the mapping between product identifiers, sorted by the old identifier. The highlighted rows indicate that the new identifier is for an updated version of the product component (which supersedes the previous version).

Old identifier (previous end product)	New identifier (for this end product)
NEHTA-1374:2013	NEHTA-1612:2013
NEHTA-1375:2013	NEHTA-1614:2014
NEHTA-1376:2013	NEHTA-1613:2013
NEHTA-1409:2013	NEHTA-1615:2014
