1 Introduction

1.1 Document Purpose and Scope

This document provides a guide to implementing the 'logical' model detailed by NEHTA's Medicare Overview (MOv) Structured Content Specification (SCS) as an HL7 Clinical Document Architecture Release 2 (CDA) XML document. This implementation guide is based on Version 1.1 of the MOv SCS [NEHT2013v]. The primary aim of the implementation guide is to take implementers step by step through mapping each data component of the MOv SCS to a corresponding CDA attribute or element.

The implementation guide contains descriptions of both constraints on the CDA and, where necessary, custom extensions to the CDA, for the purposes of fulfilling the requirements for Australian implementations of MOv. The resulting CDA document can be used for the electronic exchange of MOv information between healthcare providers.

In addition, this implementation guide presents conformance requirements against which implementers can attest the conformance of their systems.

This release is intended to inform, and seek feedback from, prospective software system designers and their clinical consultants. The content of this release is not suitable for implementation in live clinical systems.

The National Clinical Terminology and Information Service (NCTIS) values your questions, comments and suggestions about this document. Please direct your questions or feedback to <clinicalinformation@nehta.gov.au>.

1.2 Medicare Overview Definition

A Medicare Overview is defined in the MOv SCS [NEHT2013v] as:

The Medicare Overview provides Medicare Benefits Scheme (MBS) claims history, Pharmaceutical Benefits Scheme (PBS) and Repatriation Pharmaceutical Benefits Scheme (RPBS) claims history, Australian Childhood Immunisation Register (ACIR) history and Australian Organ Donor Register (AODR) information that is in the individual's PCEHR.

1.3 HL7 Clinical Document Architecture

The CDA is a document markup standard that specifies the structure and semantics of 'clinical documents' for the purpose of supporting interoperable exchange and use at human and system levels.

CDA has been chosen as the format for electronic clinical documents, as it is consistent with NEHTA's commitment to a service and document oriented approach to electronic information exchange, contributing to future electronic health records.

Some of the advantages of CDA are:

- It is machine computable and human readable.
- It provides a standardised display of clinical information without loss of clinical meaning.
- It provides assurance of clinical quality and safety more effectively than message-based interfaces, by storing and displaying the clinical data as entered by the clinician.
- It provides better support than HL7 V2 messages for:
 - more complex information structures, such as pathology synoptic reporting; and

- terminologies such as SNOMED CT®.¹
- It supports legal attestation by the clinician (requiring that a document has been signed manually or electronically by the responsible individual).
- It is able to be processed by unsophisticated applications (displayed in web browsers, for instance).
- It provides a number of levels of compliance to assist with technical implementation and migration.
- It aligns Australia with e-health initiatives in other countries (such as Canada, UK, USA, Brazil, Germany and Finland).

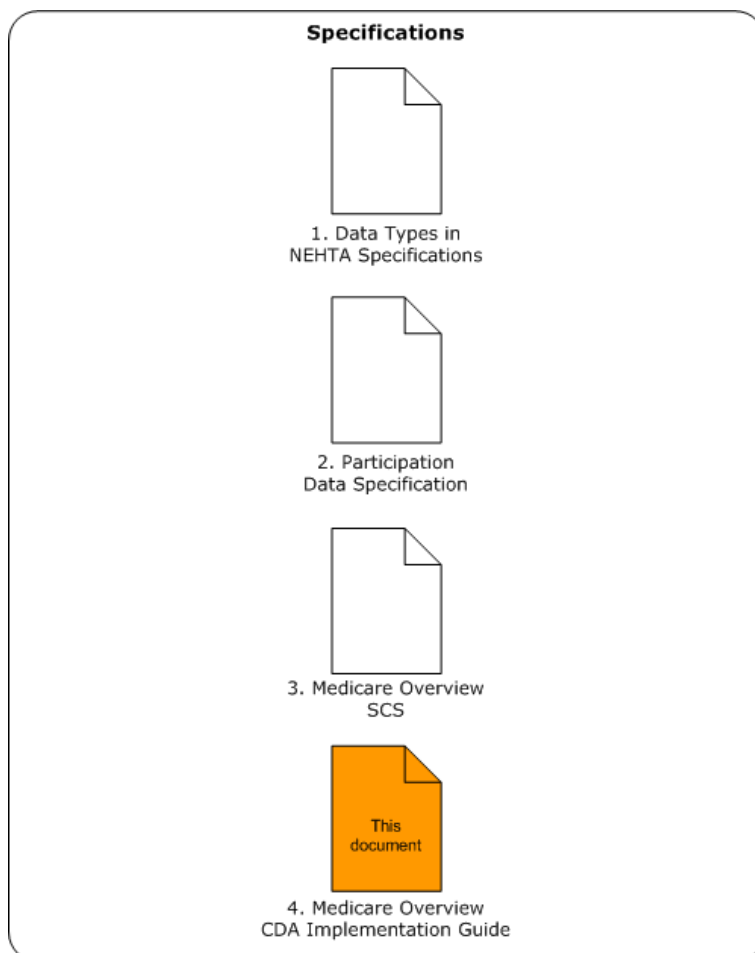

1.4 Intended Audience

This document is intended to be read and understood by software architects and developers, implementers of clinical information systems in various healthcare settings, IT-aware clinicians who wish to evaluate the clinical suitability of NEHTA-endorsed standards, and researchers who wish to explore certain aspects of NEHTA-endorsed standards.

This document and related artefacts are very technical in nature and the audience is expected to be familiar with the language of health data specifications and to have some familiarity with health information standards and specifications such as CDA, and Standards Australia IT-014 documents. Definitions and examples are provided to clarify relevant terminology usage and intent.

1.5 Document Map

This implementation guide is not intended to be used in isolation. Companion documents are listed below:

¹SNOMED CT® is a registered trademark of the International Health Terminology Standards Development Organisation.

1. Data Types in NEHTA Specifications [[NEHT2010c](#)] is a detailed description of the data types used within the Structured Content Specification.
2. Participation Data Specification [[NEHT2011v](#)] contains the full specification which forms the basis of all participations contained in NEHTA Structured Content Specifications.
3. Medicare Overview – Structured Content Specification [[NEHT2013v](#)] is a clinical content specification describing the logical data structures, data components, and value domains which constitute the Medicare Overview.

1.6 Acronyms

CDA	Clinical Document Architecture
HL7	Health Level Seven
MOv	Medicare Overview
PAI-D	PCEHR Assigned Identifier for Device
PAI-O	PCEHR Assigned Identifier for Organisation
RIM	Reference Information Model
SCS	Structured Content Specification
UUID	Universally Unique Identifier
XHTML	Extensible Hypertext Markup Language
XML	Extensible Markup Language
XSL	Extensible Stylesheet Language

For a complete listing of all relevant acronyms, abbreviations and a glossary of terms, please refer to [NEHTA Acronyms, Abbreviations & Glossary of Terms \[NEHT2005a\]](#).

1.7 Keywords

Where used in this document, the keywords **SHALL**, **SHOULD**, **MAY**, **SHALL NOT** and **SHOULD NOT** are to be interpreted as described in [RFC2119 - Key words for use in RFCs to Indicate Requirement Levels \[RFC2119\]](#).

Keywords used in this document

Keyword	Interpretation
SHALL	This word, or the term REQUIRED , means that the statement is an absolute requirement of the specification.
SHOULD	This word, or the term RECOMMENDED , means that there may exist valid reasons in particular circumstances to ignore a particular item, but the full implications must be understood and carefully weighed before choosing a different course.
MAY	This word, or the term OPTIONAL , means that an item is truly optional. One implementer may choose to include the item because a particular implementation requires it, or because the implementer determines that it enhances the implementation while another implementer may omit the same item. An implementation which does not include a particular option must be prepared to interoperate with another implementation which does include the option, perhaps with reduced functionality. In the same vein, an implementation which does include a particular option must be prepared to interoperate with another implementation which does not include the option (except of course, for the feature the option provides).
SHALL NOT	This phrase means that the statement is an absolute prohibition of the specification.
SHOULD NOT	This phrase, or the phrase NOT RECOMMENDED means that there may exist valid reasons in particular circumstances when the particular behaviour is acceptable or even useful, but the full implications should be understood and the case carefully weighed before implementing any behaviour described with this label.

1.8 Conformance

This document describes how the Medicare Overview SCS is implemented as a CDA document. Conformance claims are not made against this implementation guide directly; rather, they are made against additional conformance profiles documented elsewhere. Any document that claims conformance to any derived conformance profile **SHALL** meet these base requirements:

- It **SHALL** be a valid HL7 CDA instance. In particular:
 - It **SHALL** be valid against the HL7 CDA Schema (once extensions have been removed, see [W3C XML Schema](#)).
 - It **SHALL** conform to the HL7 V3 R1 data type specification.
 - It **SHALL** conform to the semantics of the RIM and Structural Vocabulary.
- It **SHALL** be valid against the Australian CDA Schema that accompanies this implementation guide after any additional extension not in the NEHTA extension namespace have been removed, along with any other CDA content not described by this implementation guide.
- It **SHALL** use the mappings as they are stated in this document.
- It **SHALL** use all fixed values specified in the mappings (e.g. `@attribute="FIXED_VALUE"`).
- If the vocabulary has been explicitly stated as 'NS' it **SHALL** be interpreted as:

*NS = In the absence of national standard code sets, the code sets used **SHALL** be registered code sets, i.e. registered through the [HL7 code set registration procedure](#)² with an appropriate object identifier (OID), and **SHALL** be publicly available.*

*When national standard code sets become available, they **SHALL** be used and the non-standard code sets **SHALL** be deprecated.*

- It **SHALL** be valid against the additional conformance requirements that are established in this document (i.e. any normative use of the word 'shall' identified by the term presented in uppercase and bold typeface).
- The narrative **SHALL** conform to the requirements described in this implementation guide.
- The document **SHALL** conform to the requirements specified in the Medicare Overview - CDA Rendering Guide [\[NEHT2012i\]](#).
- The data as contained in the data types **SHALL** conform to the additional data type specification [\[NEHT2010c\]](#).
- Any additional content included in the CDA document that is not described by this implementation guide **SHALL NOT** qualify or negate content described by this implementation guide and it **SHALL** be clinically safe for receivers of the document to ignore the non-narrative additions when interpreting the existing content.

A system that *consumes* Medicare Overview CDA documents may claim conformance if it correctly processes conformant instance documents, including correctly understanding all the information in the header. It may, but is not required to, reject non-conformant documents. Conformant systems that consume Medicare Overview CDA documents are not required to process any or all of the structured data entries in the CDA document, but they **SHALL** be able to correctly render the document for end-users when appropriate (see [Clinical Document Architecture Release 2](#)).

Conformance profiles of this document **MAY** make additional rules that override this document in regard to:

- Allowing the use of alternative value sets in place of the value sets specified in this document.
- Allowing the use of alternative identifiers in place of the HI Service identifiers.
- Making required data elements and section divisions optional.

² <http://www.hl7.org/oid/index.cfm?ref=footer>

1.9 Known Issues

This section lists known issues with this specification at the time of publishing. NEHTA is working on solutions to these issues, and we encourage comments to further assist with development of these solutions

Reference	Description
Throughout document	<p>The ids on roles are not clearly explained. The following guidance is given in the comments field of the mapping table:</p> <p style="text-align: center;">UUID</p> <p>This is a technical identifier that is used for system purposes such as matching. If a suitable internal key is not available, a UUID MAY be used.</p> <p>This explanation needs to be clarified.</p>
Throughout document	Australian vs American spelling - in cases where definitions have been taken from HL7 documentation, the American spelling has been preserved, e.g. organization rather than organisation.
Throughout document	While every effort has been taken to ensure that the examples are consistent with the normative mappings in this message specification, care needs to be taken when copying XML examples for implementation and validation.
PHARMACEUTICAL BENEFIT ITEM > Brand (Pharmaceutical Item Brand) and Item Generic Name (Pharmaceutical Item Generic Name)	The CDA mapping for Brand (Pharmaceutical Item Brand) and Item Generic Name (Pharmaceutical Item Generic Name) shall be exchanged, however this specification uses the existing mapping from the Medicare PBS document for consistency purpose.
Medicare Overview - CDA Rendering Guide	A CDA Rendering Guide has not yet been produced for the Medicare Overview.

This page is intentionally left blank.

2 Guide for Use

This document describes how to properly implement the Australian MOv SCS as a conformant HL7 CDA XML document. The Medicare Overview is built in two parts:

1. A *Structured Content Specification* (SCS), which, in conjunction with its related documents (see [Document Map](#)), describes the Medicare Overview in a form that is consistent with other NEHTA specifications. It has the potential to be implemented in multiple different exchange formats as is most suitable for a particular context. It describes the data content of Medicare Overview as a hierarchy of data components, and provides documentation concerning their use and meaning.
2. A *CDA Implementation Guide* (this document), which specifies how the data described in the SCS is properly represented in a CDA document.

In order to properly implement this specification, the reader should be familiar with the MOv SCS and the HL7 CDA documentation, and understand how to read this document.

For further information regarding NEHTA Structured Content Specifications, see the links in [Document Map](#).

2.1 Clinical Document Architecture Release 2

A CDA document is an XML document built following the rules described in the CDA specification, which conforms to the HL7 CDA Schema provided by HL7. The CDA document is based on the semantics provided by the HL7 Reference Information Model, Data Types, and Vocabulary.

A CDA document has two main parts: the header and the body.

The CDA document header is consistent across all CDA documents, regardless of document type. The header identifies and classifies the document and provides information on authentication, the encounter, the patient, and the involved providers.

The body contains the clinical report, and can be marked-up text (narrative, renderable text) or a combination of both marked-up text and structured data. The marked-up text can be transformed to XHTML and displayed to a human. The structured data allows machine processing of the information shown in the narrative section.

CDA contains a requirement that all of its clinical information **SHALL** be marked up in CDA narratives. These narratives are CDA defined hypertext, able to be rendered in web browsers with only a standard accompanying transformation. This transformation is produced and distributed by HL7.

As noted, it is a conformance requirement that the rendered narrative **SHALL** be able to stand alone as a source of authenticated information for consuming parties. Content from the CDA body **SHALL NOT** be omitted from the narrative.

Further information and guidance on the CDA narrative is available in [Appendix A, CDA Narratives](#).

These references are recommended to gain a better understanding of CDA:

- CDA validation tools: [\[INFO2009\]](#)

2.2 Mapping Interpretation

The core of this implementation guide is a mapping from the MOv SCS to the CDA document representation.

The mappings may not be deterministic; in some cases the differences in approach between the logical model specified in SCS and CDA document implementation specifications makes it inappropriate to have a 1:1 mapping, or any simple mapping that can be represented in a transform. This is especially true for names and addresses, where the SCS requirements, based on Australian Standards such as AS 5017 2006, differ from the HL7 data types and vocabularies which are not based on these standards.

Many of the mappings use one of a few common patterns for mapping between the SCS and the CDA document. These common mapping patterns are described in [8 Common Patterns](#).

An example of a mapping section of this implementation guide is illustrated below:

x.x ITEM NAME

Identification (normative)

Name	ITEM NAME
Metadata type	Metadata type e.g. Section, Data Group or Data Element

Relationships (normative)

Children

Data Type	Name	Occurrence
Icon illustrating the Metadata or Data type.	<p>ITEM NAME</p> <p>This is a link to another section containing the mapping for this item. Item names in upper case indicate that the item is a section or data group. Item names in start case indicate that the item is a data element.</p>	The number of instances of this child item that may occur.

Parent

Data Type	Name	Occurrences (child within parent)
Icon illustrating the Metadata or Data type.	ITEM NAME This is a link to another section containing the mapping for this item. Item names in upper case indicate that the item is a section or data group. Item names in start case indicate that the item is a data element.	The number of instances of the child item within the parent that may occur.

CDA R-MIM Representation

The text contains an explanation of the mapping (this text is non-normative).

The model is a constrained representation of the R-MIM (this diagram is non-normative). The colours used in the CDA model align with the usage in the R-MIM. In many cases the cardinalities shown in the model will be less constrained than those shown in the mapping table.

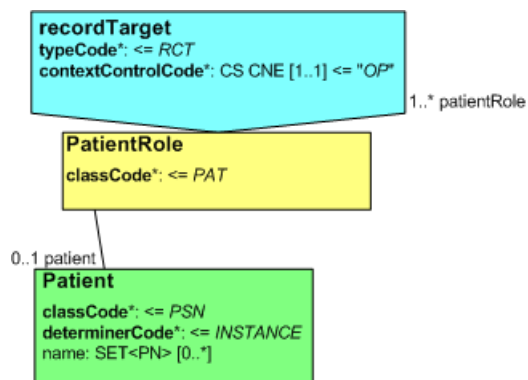

Figure 2.1. Example - Header Part

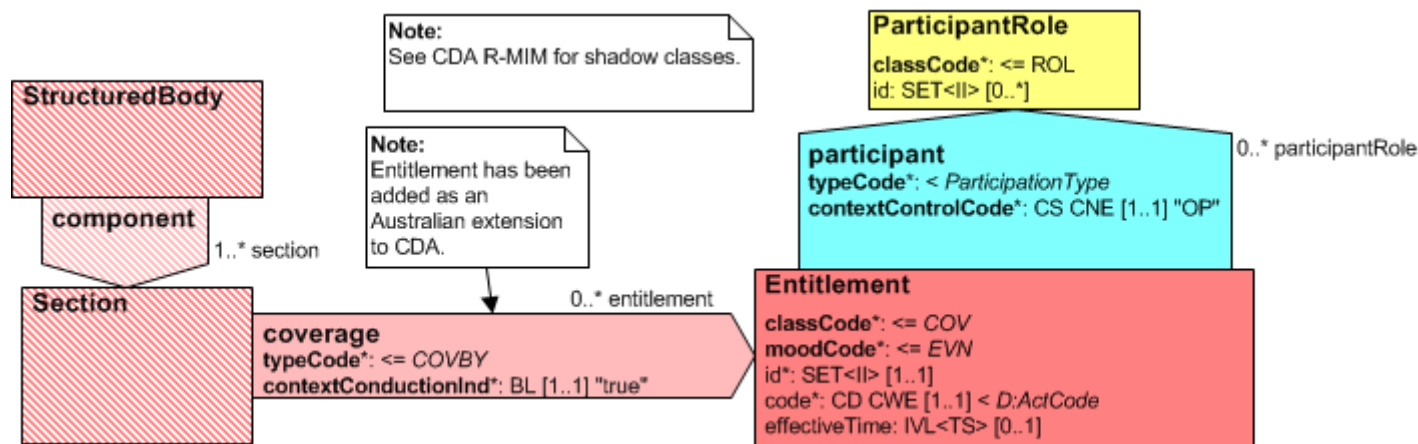

Figure 2.2. Example - Body Part

CDA Mapping (normative)

NEHTA SCS Data Component	Data Component Definition	Card	CDA Schema Data Element	Vocab	Comments
CDA Element Type (Header, Body Level 2 etc.)			Context: Parent of elements below		
<p>The path in the SCS.</p> <p>Each section in this document corresponds to an SCS section or data group, and is scoped by that section or data group. The hierarchical path uses ">" as a separator for paths within the SCS data hierarchy.</p> <p>If there is a name in round brackets after the path, this is the name of the reused data group for the SCS component.</p> <p>The data component in bold text (the last in the path) is the data component for this row.</p> <p>i.e. Parent Data Component > Child Data Component</p>	<p>The definition of the item from the SCS.</p>	<p>The cardinality of the data element in the SCS.</p> <p>The cardinality of the data element in the SCS maps to the cardinality of the element in the CDA document.</p> <p>Where the cardinality of the SCS data element is more constrained than the cardinality of the CDA element then the SCS cardinality takes precedence. i.e. if an element is mandatory in the SCS and optional in CDA then it will also become mandatory in the CDA document.</p> <p>If an item with a maximum cardinality > 1 maps to an xml attribute, the attribute will contain multiple values separated by spaces. No such item will have valid values that themselves contain spaces.</p>	<p>The schema element(s) in the CDA document that correspond(s) to the SCS data component.</p> <p>The syntax for this is similar to XPath:</p> <pre>{/name{[index]}}n{/<pattern>}</pre> <p>Where:</p> <ul style="list-style-type: none"> { } indicates optional { }n means a section that may repeat <pattern> contains a link to a common pattern [index] differentiates two similar mappings <p>Examples:</p> <ol style="list-style-type: none"> component/act/participation[inf_prov]/role/<Address> participant participant/@typeCode="ORG" participant/associatedEntity participant/associatedEntity/@classCode="SDLOC" participant/associatedEntity/code <p>A sequence of names refers to the XML path in the CDA document. The path always starts from a defined context which is defined in the grey header row above each group of mapping rows. The last name is shown in bold to make the path easier to read. The last name may be a reference to an attribute or an element, as defined in the Australian CDA Schema. The cardinalities of the items map through from the SCS.</p> <p>It is possible to specify an index after the name, such as 'participation[inf_prov]' in Example 1. The presence of the index means there are two or more mappings to the same participation class that differ only in the inner detail. The indexes show which of the multiple mappings is the parent of the inner detail. Note that each of the indexed participations may exist more than once (as specified by the SCS group cardinality). To determine the mapping for these kinds of elements, a document reader must look at the content inside the element.</p> <p>It is possible for one SCS data component to map to more than one CDA Schema element as in Example 2.</p> <p>Any fixed attribute values are represented as a separate line of the mapping such as those shown in Example 2.</p> <p>The path may end with a pattern designator, such as <Address>. This indicates that the mapping involves a number of sub-elements of the named element following the pattern as shown in the name (which is a link to the appropriate pattern in this document).</p>	<p>The name of the vocabulary.</p>	<p>Helpful additional information about the mapping.</p>

How to interpret the following example mapping:

NEHTA SCS Data Component	Data Component Definition	Card	CDA Schema Data Element	Vocab	Comments
CDA Header Data Elements			Context: ClinicalDocument/		
Subject of Care	Identifies the person about whom the health information contained in this Medicare Overview has been captured.	1..1	recordTarget/patientRole		
n/a	n/a	1..1	recordTarget/patientRole/id	UUID This is a technical identifier that is used for system purposes such as matching. If a suitable internal key is not available, a UUID MAY be used.	Required CDA element. If there are any entitlements for Subject of Care this value SHALL be the same as: ClinicalDocument/ component/ structuredBody/ component[admin_obs]/ section/ entry/ act/ participant/ participantRole/ id where participantRole/ @classCode = "PAT".
Subject of Care > Participant > Person	An individual who is in the role of healthcare provider, who uses or is a potential user of a healthcare service, or is in some way related to, or a representative of, a subject of care (patient).	1..1	n/a		Not mapped directly, encompassed implicitly in recordTarget/patientRole/ patient.
Subject of Care > Participant > Person > Person Name	The appellation by which an individual may be identified separately from any other within a social context.	1..*	recordTarget/patientRole/patient/<Person Name>		See common pattern: Person Name .

The Subject of Care (Patient) section is part of the context section of the SCS (as opposed to being part of the content section of the SCS). Although it is located in the context section of the SCS, it contains data components that map to the CDA body as well as data components that map to the CDA header. The information specifying the location of the elements is in the shaded context header row located above each group of mapping rows. The context remains the same until a new context header row starts.

The first row of the mapping (after the context header row), 'Subject of Care', is a CDA Header Element and has a context of 'ClinicalDocument' (the root element of a CDA document). Adding together the context and the mapping using '/' gives a full path of:

1. ClinicalDocument/recordTarget/patientRole

Due to the fact that 'Subject of Care' is part of the context section of the SCS (as opposed to a content element), information about it and its child elements can be located in the SCS document by finding the data component 'Subject of Care' in the table of contents under the context section and navigating to the relevant page.

If the data component were part of the content section of the SCS, information about it could be located by finding the data component (or its parent) in the table of contents under the content section of the SCS.

2. The next row in the mapping (n/a) is a row that is not defined in the SCS but which is required by CDA. The CDA schema data element is recordTarget/patientRole/id. This is a technical identifier that is used for system purposes such as matching the Entitlement details back to the Subject of Care (patient). This identifier **SHALL** be a UUID.
3. The next row in the mapping table (Subject of Care > Participant > Person) is defined in the SCS but is not mapped directly to the CDA because it is already encompassed implicitly by CDA in recordTarget/patientRole/patient.

Moving to the next row in the table (Subject of Care > Participant > Person > **Person Name**) and concatenating the context and the mapping, we get:

4. ClinicalDocument/recordTarget/patientRole/patient/<Person Name>

<PersonName> holds a link to the common pattern section where a new table lays out the mapping for the Person Name common pattern.

Moving down the table to the context row '**CDA Header Data Elements**', any data components after this row (until the occurrence of a new context row) map to the CDA body. Because there is no equivalent concept in CDA, an Australian CDA extension has been added in order to represent Entitlement. This extension is indicated by the presence of the 'ext:' prefix. For the data component 'Entitlement', adding together the context and the mapping using '/' gives the following paths for the CDA body level 3 data elements ([index] is dependent on context, the Entitlement CDA elements **SHALL** be deemed as CDA Header Data Elements for conformance assessment, See [4 Administrative Observations](#) for details):

5. ClinicalDocument/component/structuredBody/component[index]/section/ext:coverage2/@typeCode="COVBY"
6. ClinicalDocument/component/structuredBody/component[index]/section/ext:coverage2/ext:entitlement
7. ClinicalDocument/component/structuredBody/component[index]/section/ext:coverage2/ext:entitlement/@classCode="COV"
8. ClinicalDocument/component/structuredBody/component[index]/section/ext:coverage2/ext:entitlement/@moodCode="EVN"

9. ClinicalDocument/component/structuredBody/component[index]/section/ext:coverage2/ext:entitlement/ext:participant/@typeCode="BEN"
10. ClinicalDocument/component/structuredBody/component[index]/section/ext:coverage2/ext:entitlement/ext:participant/ext:participantRole/@classCode="PAT"
11. ClinicalDocument/component/structuredBody/component[index]/section/ext:coverage2/ext:entitlement/ext:participant/ext:participantRole/ext:id

This id is also a technical identifier and **SHALL** hold the same value as the ClinicalDocument/recordTarget/patientRole/id mentioned above in comment 1.

The order of the SCS data components is not always the same as the order of the CDA elements. In addition, the CDA elements need to be in the order specified in the Australian CDA Schema.

The "id" element is not specified in the SCS and **SHOULD** be filled with a UUID. This element may be used to reference the act from other places in the CDA document.

The next row in the table (Subject of Care > Participant > Entitlement > Entitlement Number) maps to the id element:

12. ClinicalDocument/component/structuredBody/component[index]/section/ext:coverage2/ext:entitlement/ext:id

The next row in the table (Subject of Care > Participant > Entitlement > Entitlement Type) maps to the code element:

13. ClinicalDocument/component/structuredBody/component[index]/section/ext:coverage2/ext:entitlement/ext:code

The next row in the table (Subject of Care > Participant > Entitlement > Entitlement Validity Duration) maps to the effectiveTime element:

14. ClinicalDocument/component/structuredBody/component[index]/section/ext:coverage2/ext:entitlement/ext:effectiveTime

See comments in the example below.

2.3 CDA Extensions

The SCS is based on Australian requirements, either as expressed in existing Australian Standards, or based upon extensive consultation with major stakeholders. Not all of these requirements are supported by HL7 Clinical Document Architecture Release 2 (CDA).

CDA provides a mechanism for handling this. Implementation guides are allowed to define extensions, provided some key rules are followed:

- Extensions must have a namespace other than the standard HL7v3 namespace.
- The extension cannot alter the intent of the standard CDA document. For example, an extension cannot be used to indicate that an observation does not apply where the CDA document requires it.
- HL7 encourages users to get their requirements formalised in a subsequent version of the standard so as to maximise the use of shared semantics.

Accordingly, a number of extensions to CDA have been defined in this *Implementation Guide*. To maintain consistency, the same development paradigm has been used as CDA, and all the extensions have been submitted to HL7 for inclusion into a future release of CDA (Release 3 currently under development).

Version 3.0 of these extensions are incorporated in the namespace `<http://ns.electronichealth.net.au/Ci/Cda/Extensions/3.0>` as shown in the CDA example output throughout this document. Future versions of CDA Extensions will be versioned as per the following example:

```
<http://ns.electronichealth.net.au/Ci/Cda/Extensions/4.0>
```

2.4 W3C XML Schema

This document refers to an accompanying CDA W3C XML Schema (referred to in this document as the Australian CDA Schema). This schema differs from the base HL7 CDA W3C XML Schema (referred to in this document as the HL7 CDA Schema) as mentioned below:

- Australian CDA extensions have been added to the Australian CDA Schema.

CDA documents which include extensions will fail to validate against the HL7 CDA Schema – this is a known limitation.

A Medicare Overview document that conforms to this specification **SHALL** validate against the Australian CDA Schema that accompanies this specification, and **SHALL** validate against the HL7 CDA Schema once the extensions have been removed. Note that merely passing schema validation does not ensure conformance. For more information, refer to [Conformance](#).

2.5 Schematron

Many of the rules this document makes about CDA documents cannot be captured in the W3C XML Schema language (XSD) as XSD does not provide a mechanism to state that the value or presence of one attribute is dependent on the values or presence of other attributes (co-occurrence constraints).

Schematron is a rule-based validation language for making assertions about the presence or absence of patterns in XML trees. The rules defined by this document may be captured as Schematron rules. As of this release, the matching Schematron assertions have not yet been developed; NEHTA is considering the distribution of these rules in association with future releases of this implementation guide.

2.6 Implementation Strategies

There are many platform specific implementation options for readers pursuing the implementation of a CDA document according to this implementation guide. Examples of these implementation options include:

- Read or write CDA documents directly using a Document Object Model (DOM) or 3rd Generation Language (3GL) code (or both).
- Transform an existing XML format to and from a CDA document.
- Use a toolkit to generate a set of classes from HL7 CDA Schema or the Australian CDA Schema provided with this implementation guide, to read or write documents.
- Use existing libraries, possibly open source, which can read and write CDA documents.

The best approach for any given implementation is strongly dictated by existing architecture, technology and legacy constraints of the implementation project or existing system.

3 Medicare Overview Data Hierarchy

The data hierarchy below provides a logical representation of the data structure of the MOv SCS data components.

The data hierarchy is a logical representation of the data components of Medicare Overview, and is not intended to represent how the data contents are represented in a CDA document.

		MEDICARE OVERVIEW

4 Administrative Observations

The MOv SCS contains a number of data elements that are logically part of the SCS context, but for which there are no equivalent data elements in the CDA header. These data elements are considered to be "Administrative Observations" about the encounter, the patient or some other participant. Administrative Observations is a CDA section that is created to hold these data components in preference to creating extensions for them.

CDA R-MIM Representation

Figure 4.1, “Administrative Observations” shows a subset of the CDA R-MIM containing those classes being referred to in the CDA Mapping. This data component maps to CDA Body elements.

The Administrative Observations section is composed of a Section class related to its context `ClinicalDocument.structuredBody` through a component relationship.

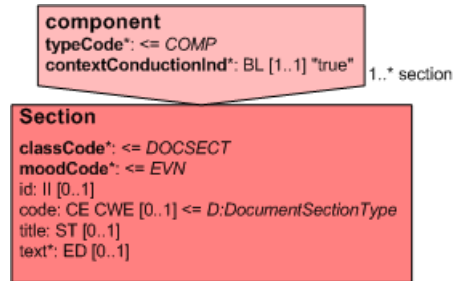

Figure 4.1. Administrative Observations

CDA Mapping

At most one instance of Administrative Observation section **SHOULD** be present in a CDA document. The cardinality of this section comes from its linking context data elements (Ex: CDA context Data Element(s) mapped to Administrative Observation Section). If any of the linking context data elements are mandatory, then this section **SHALL** be marked as a mandatory section.

This section **SHALL NOT** be populated if there are no entries or text to go in it.

This section **SHALL** contain a code if provided.

All data elements (with the exception of narrative text) within this section **SHALL** be deemed as **CDA Header Data Elements** for conformance assessment.

The <text> data element is **OPTIONAL** and **SHALL** be treated as a Level 2 CDA Data Element.

NEHTA SCS Data Component	Data Component Definition	Card	CDA Schema Data Element	Vocab	Comments
CDA Header Data Elements			Context: ClinicalDocument/component/structuredBody/

5 CDA Header

This chapter contains CDA specific header elements (both **REQUIRED** and **OPTIONAL**) that are not specified in the MOv SCS specification. The CDA Schema Data Element describes each element.

All the definitions in this chapter are sourced from "HL7 Clinical Document Architecture, Release 2" [\[HL7CDAR2\]](#).

5.1 ClinicalDocument

Identification

6 Context Data Specification - CDA Mapping

6.1 Medicare Overview

Identification

Name	MEDICARE OVERVIEW
Metadata Type	Structured Document
Identifier	SD-16767

Relationships

Children

Data Type	Name	Occurrence
	SUBJECT OF CARE	1..1
	DOCUMENT AUTHOR	1..1

CDA R-MIM Representation

Figure 6.1, “CDA Header Model for Medicare Overview Context” shows a subset of the CDA R-MIM containing those classes being referred to in the CDA Mapping. This data component maps to CDA Header elements.

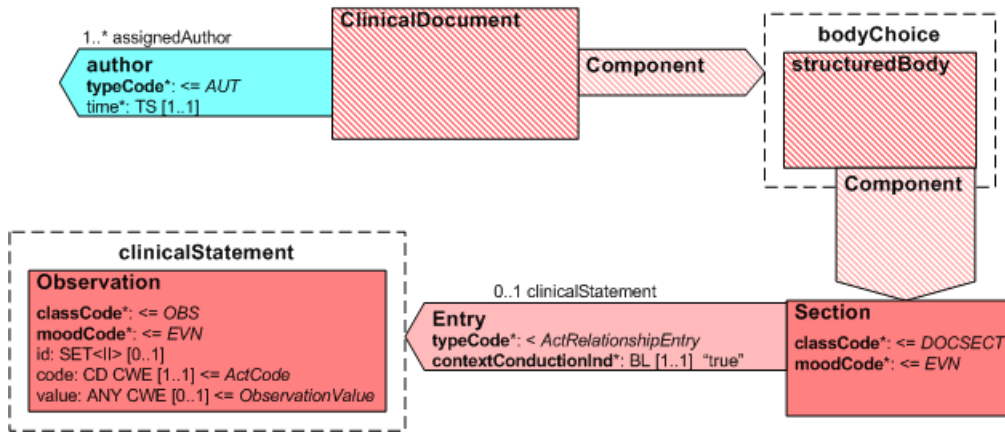

Figure 6.1. CDA Header Model for Medicare Overview Context

CDA Mapping

NEHTA Data Component	Data Component Definition	Card	CDA Schema Data Element	Vocab	Comments
CDA Header Data Elements					
Medicare Overview	The Medicare Overview provides Medicare Benefits Scheme (MBS) claims history, Pharmaceutical Benefits Scheme (PBS) and Repatriation Pharmaceutical Benefits Scheme (RPBS) claims history, Australian Childhood Immunisation Register (ACIR) history and Australian Organ Donor Register (AODR) information that is in the individual's PCEHR.	1..1	ClinicalDocument/code		
			ClinicalDocument/code/@code="100.16767"		
			ClinicalDocument/code/@codeSystem="1.2.36.1.2001.1001.101"		
			ClinicalDocument/code/@codeSystemName="NCTIS Data Components"		
			ClinicalDocument/code/@displayName="Medicare Overview"		
			ClinicalDocument/effectiveTime		Document creation time.
Medicare Overview > Subject of Care	See: SUBJECT OF CARE				
Medicare Overview > Document Author	See: DOCUMENT AUTHOR				
Medicare Overview > DateTime Authored	The date, or date and time, that the Medicare Overview document was constructed from the source documents.	1..1	ClinicalDocument/author/time/@value		See <time> for available attributes.

6.1.1 DOCUMENT AUTHOR

Identification

Name	DOCUMENT AUTHOR
Metadata Type	Data Group
Identifier	DG-10296

Relationships

Parent

Data Type	Name	Occurrences (child within parent)
	Medicare Overview	1..1

CDA R-MIM Representation

Figure 6.2, “Document Author” shows a subset of the CDA R-MIM containing those classes being referred to in the CDA Mapping. This data component maps to CDA Header elements.

The DOCUMENT AUTHOR data group instantiated as 'DEVICE' is related to its context of ClinicalDocument by the author participation class. An author is a device in the role of assignedAuthor (AssignedAuthor class). The entity playing the role is assignedAuthorChoice (AuthoringDevice class). The entity identifier of the participant is mapped to the EntityIdentifier class (Australian CDA extension) and is associated with the assignedAuthorChoice.

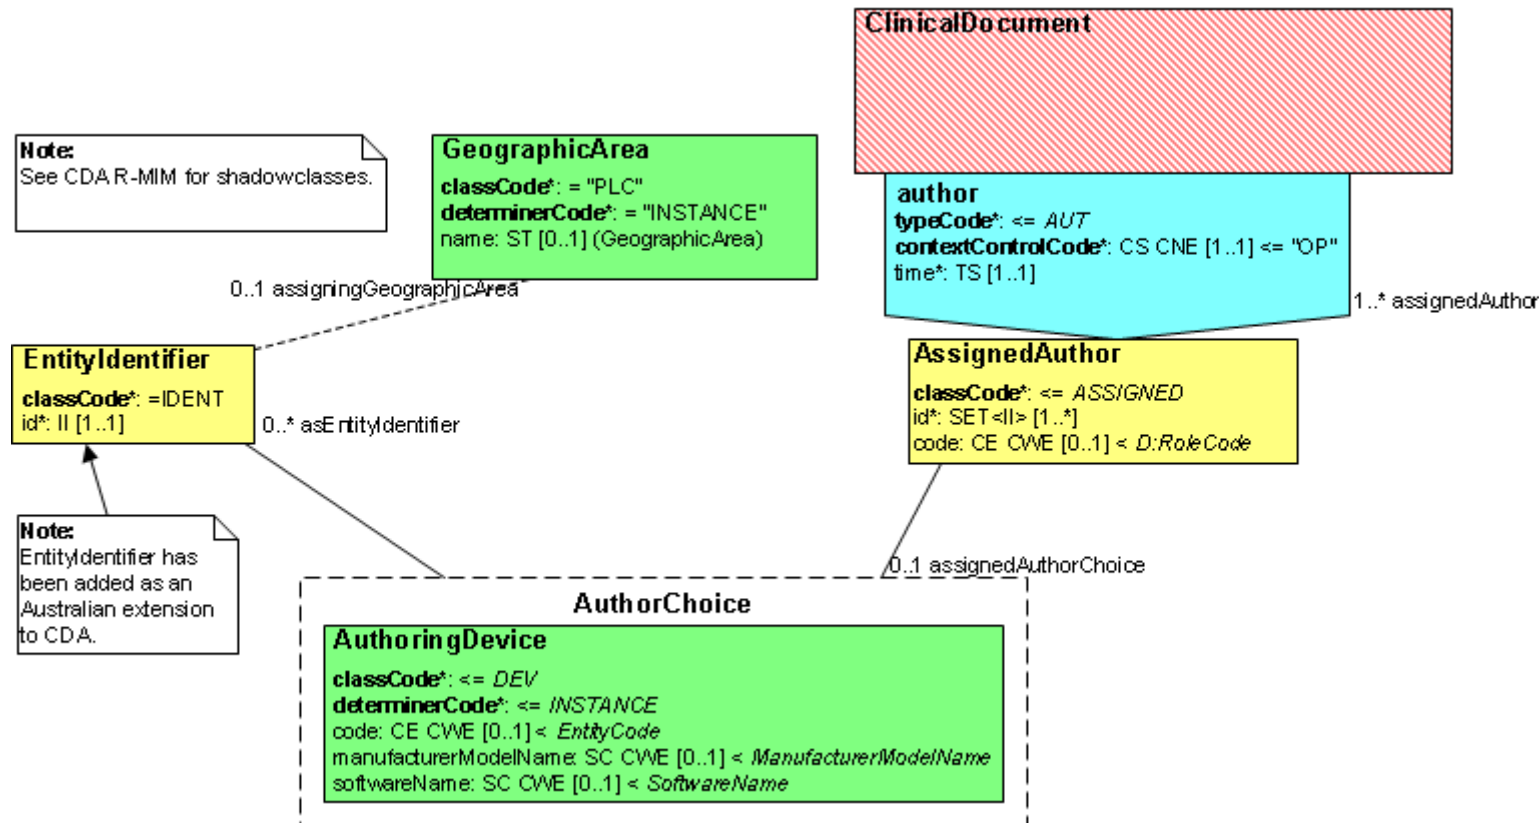

Figure 6.2. Document Author

CDA Mapping

Note

CDA mapping for 'Document Author' when 'Document Author > Participant > Person or Organisation or Device' instantiated as '**DEVICE**'.

NEHTA SCS Data Component	Data Component Definition	Card	CDA Schema Data Element	Vocab	Comments
CDA Header Data Elements			Context: ClinicalDocument/		
Document Author	The device that composed the Medicare Overview document.	1..1	author		Document Author SHALL be filled with the Device that authored the document.
Document Author > Participation Type	The categorisation of the nature of the participant's involvement in the healthcare event described by this participation.	1..1	n/a	Participation Type SHALL have an implementation-specific fixed value equivalent to "Document Author".	Not mapped directly, encompassed implicitly in author/typeCode="AUT" (optional, fixed value).
Document Author > Role	The involvement or role of the participant in the related action from a healthcare perspective rather than the specific participation perspective.	1..1	author/assignedAuthor/code	Role SHALL have an implementation-specific fixed value equivalent to "Not Applicable"	n/a
n/a	n/a	1..1	author/assignedAuthor/id	UUID This is a technical identifier that is used for system purposes such as matching. If a suitable internal key is not available, a UUID MAY be used.	Required CDA element.
Document Author > Participant	Details pertinent to the identification of an individual or organisation or device that has participated in a healthcare event/encounter/clinical interaction.	1..1	author/assignedAuthor/assignedAuthoringDevice		
Document Author > Participant > Entity Identifier	A number or code issued for the purpose of identifying a participant within a healthcare context.	0..*	author/assignedAuthor/assignedAuthoringDevice/ Entity Identifier	The value of one Entity Identifier SHALL be a PAI-D	See common pattern: Entity Identifier .

NEHTA SCS Data Component	Data Component Definition	Card	CDA Schema Data Element	Vocab	Comments
Document Author > Participant > Person or Organisation or Device	Represents a choice to be made at run-time between PERSON, ORGANISATION or DEVICE.	1..1	n/a	PERSON OR ORGANISATION OR DEVICE SHALL be instantiated as a DEVICE.	This logical NEHTA data component has no mapping to CDA. The cardinality of this component propagates to its children.
Document Author > Participant > Person or Organisation or Device > Device	Describes a device or software module of interest to, or involved in, the business of healthcare service provision.	1..1	n/a		Not mapped directly, encompassed implicitly in author/assignedAuthor/assignedAuthoringDevice.
Document Author > Participant > Person or Organisation or Device > Device > Device Name	The full name of the device.	1..1	author/assignedAuthor/assignedAuthoringDevice/ softwareName		

Example 6.2. Document Author XML Fragment

6.1.2 SUBJECT OF CARE

Identification

Name	SUBJECT OF CARE
Metadata Type	Data Group
Identifier	DG-10296

Relationships

Parent

Data Type	Name	Occurrences (child within parent)
	Medicare Overview	1..1

CDA R-MIM Representation

Figure 6.3, “Subject of Care - Header Data Elements” and Figure 6.4, “Subject of Care - Body Data Elements” show a subset of the CDA R-MIM containing those classes being referred to in the CDA Mapping. This data component maps to both CDA Header and CDA Body elements.

The SUBJECT OF CARE data group maps mostly to CDA Header elements. The recordTarget participation class represents the medical record to which this document belongs. The recordTarget is associated with the Patient class by the PatientRole class. In order to represent the Date of Death of the Subject of Care, Patient.deceasedTime has been added as an Australian CDA extension.

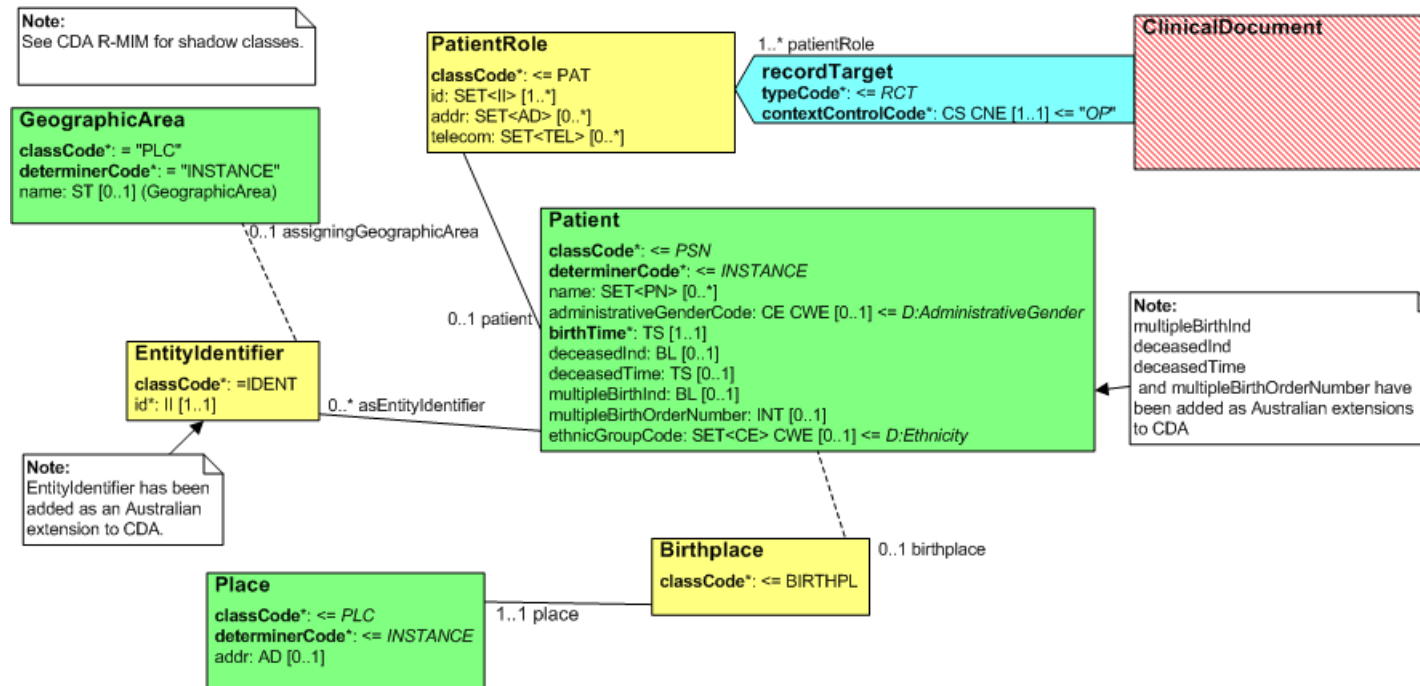

Figure 6.3. Subject of Care - Header Data Elements

Note

Several data elements contained in the SUBJECT OF CARE data group could not be mapped to CDA Header elements. These data elements have been mapped to Observations in the Administrative Observations section (see [4 Administrative Observations](#)).

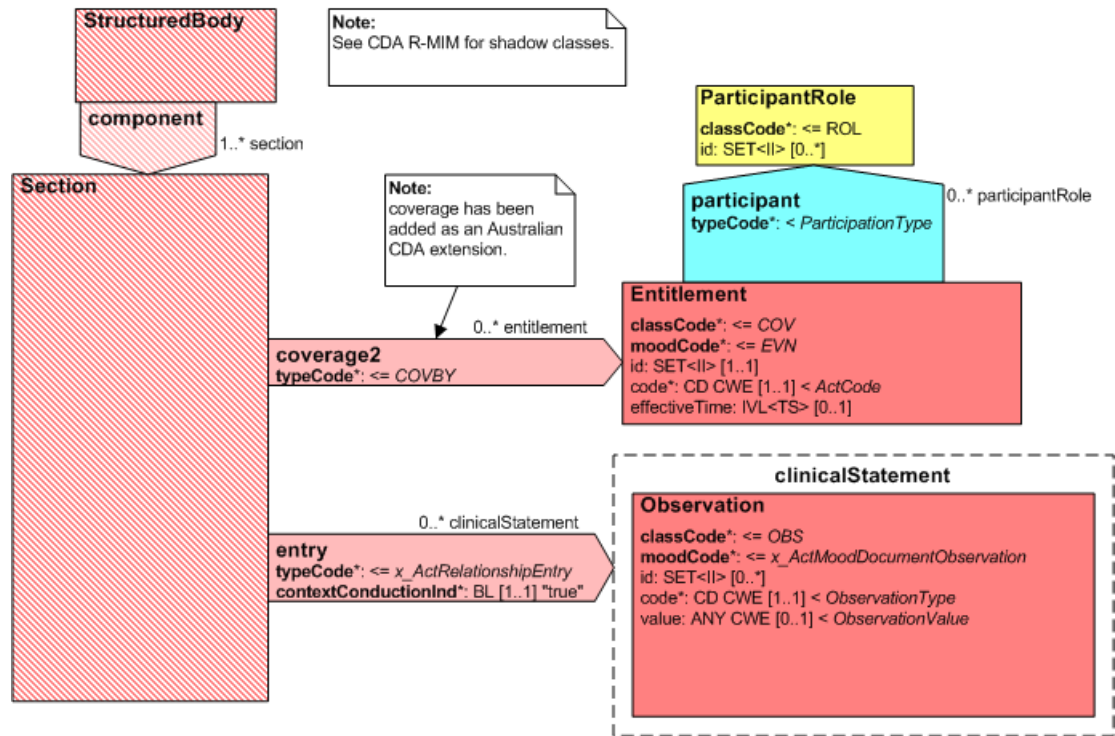

Figure 6.4. Subject of Care - Body Data Elements

CDA Mapping

NEHTA SCS Data Component	Data Component Definition	Card	CDA Schema Data Element	Vocab	Comments
CDA Header Data Elements			Context: ClinicalDocument/		
Subject of Care	Identifies the person about whom the health information contained in this Medicare Overview has been captured.	1..1	recordTarget/patientRole		
n/a	n/a	1..1	recordTarget/patientRole/id	UUID This is a technical identifier that is used for system purposes such as matching. If a suitable internal key is not available, a UUID MAY be used.	Required CDA element. If there are any entitlements for Subject of Care this value SHALL be the same as: ClinicalDocument/ component/ structuredBody/ component[admin_obs]/ section/ entry/ act/ participant/ participantRole/ id where participantRole/ @classCode = "PAT".
Subject of Care > Participation Type	The categorisation of the nature of the participant's involvement in the healthcare event described by this participation.	1..1	n/a	Participation Type SHALL have an implementation-specific fixed value equivalent to "Subject of Care".	Not mapped directly, encompassed implicitly in recordTarget/typeCode = "RCT" (optional, fixed value).
Subject of Care > Role	The involvement or role of the participant in the related action from a healthcare perspective rather than the specific participation perspective.	1..1	n/a	Role SHALL have an implementation-specific fixed value equivalent to "Patient".	Not mapped directly, encompassed implicitly in recordTarget/patientRole/classCode = "PAT".
Subject of Care > Participant	Details pertinent to the identification of an individual or organisation or device that has participated in a healthcare event/encounter/clinical interaction.	1..1	recordTarget/patientRole/patient		
Subject of Care > Participant > Entity Identifier	A number or code issued for the purpose of identifying a participant within a healthcare context.	1..*	recordTarget/patientRole/patient/<Entity Identifier>	The value of one Entity Identifier SHALL be an Australian IHI.	See common pattern: Entity Identifier . The Subject of Care's Medicare card number is recorded in Entitlement, not Entity Identifier.

NEHTA SCS Data Component	Data Component Definition	Card	CDA Schema Data Element	Vocab	Comments
Subject of Care > Participant > Address	The description of a location where an entity is located or can be otherwise reached or found and a description of the purpose for which that address is primarily used by that entity.	0..*	recordTarget/patientRole/Address	AUSTRALIAN OR INTERNATIONAL ADDRESS SHALL be instantiated as an AUSTRALIAN ADDRESS.	See common pattern: Address .
Subject of Care > Participant > Electronic Communication Detail	The electronic communication details of entities.	0..*	recordTarget/patientRole/Electronic Communication Detail		See common pattern: Electronic Communication Detail .
Subject of Care > Participant > Person or Organisation or Device	Represents a choice to be made at run-time between PERSON, ORGANISATION or DEVICE.	1..1	n/a	PERSON OR ORGANISATION OR DEVICE SHALL be instantiated as a PERSON.	This logical NEHTA data component has no mapping to CDA. The cardinality of this component propagates to its children.
Subject of Care > Participant > Person or Organisation or Device > Person	An individual who is in the role of healthcare provider, who uses or is a potential user of a healthcare service, or is in some way related to, or a representative of, a subject of care (patient).	1..1	n/a		Not mapped directly, encompassed implicitly in recordTarget/patientRole/patient.
Subject of Care > Participant > Person or Organisation or Device > Person > Person Name	The appellation by which an individual may be identified separately from any other within a social context.	1..*	recordTarget/patientRole/patient/Person Name		See common pattern: Person Name .
Subject of Care > Participant > Person or Organisation or Device > Person > Demographic Data	Additional characteristics of a person that may be useful for identification or other clinical purposes.	1..1	n/a		This logical NEHTA data component has no mapping to CDA. The cardinality of this component propagates to its children.
Subject of Care > Participant > Person or Organisation or Device > Person > Demographic Data > Sex	The biological distinction between male and female. Where there is inconsistency between anatomical and chromosomal characteristics, sex is based on anatomical characteristics.	1..1	recordTarget/patientRole/patient/administrativeGenderCode	AS 5017-2006 Health Care Client Identifier Sex	
Subject of Care > Participant > Person or Organisation or Device > Person > Demographic Data > Date of Birth Detail	Details of the accuracy, origin and value of a person's date of birth.	1..1	n/a		This logical NEHTA data component has no mapping to CDA. The cardinality of this component propagates to its children.
Subject of Care > Participant > Person or Organisation or Device > Person > Demographic Data > Date of Birth Detail > Date of Birth	The date of birth of the person.	1..1	recordTarget/patientRole/patient/birthTime		See <time> for available attributes.

NEHTA SCS Data Component	Data Component Definition	Card	CDA Schema Data Element	Vocab	Comments
CDA Body Level 3 Data Elements			Context: ClinicalDocument/component/structuredBody/component[admin_obs]/section/ (See 4 Administrative Observations)		
Subject of Care > Participant > Person or Organisation or Device > Person > Demographic Data > Date of Birth Detail > Date of Birth is Calculated From Age	Indicates whether or not a person's date of birth has been derived from the value in the Age data element.	0..1	entry[calc_age]

7 Content Data Specification - CDA Mapping

7.1 Medicare Overview

Identification

Name	MEDICARE OVERVIEW
Metadata Type	Structured Document
Identifier	SD-16767

Relationships

Children

Data Type	Name	Occurrence
	Medicare Overview Exclusion Statement (EXCLUSION STATEMENT)	0..1
	MEDICARE/DVA FUNDED SERVICES HISTORY	0..1
	PHARMACEUTICAL BENEFITS HISTORY	0..1
	AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER HISTORY	0..1
	AUSTRALIAN ORGAN DONOR REGISTER DECISION INFORMATION	0..1

CDA R-MIM Representation

Figure 7.1, “Medicare Overview” shows a subset of the CDA R-MIM containing those classes being referred to in the CDA Mapping. This data component maps to CDA Body elements.

The Medicare Overview is composed of a ClinicalDocument, which is the entry point into the CDA R-MIM. The ClinicalDocument is associated with the bodyChoice through the component relationship. The structuredBody class represents a CDA document body that is comprised of one or more document sections.

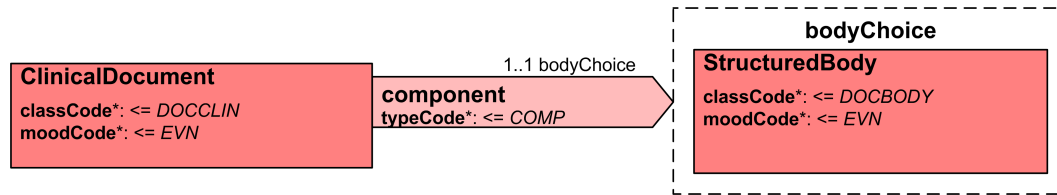

Figure 7.1. Medicare Overview

CDA Mapping

7.1.5 AUSTRALIAN ORGAN DONOR REGISTER DECISION INFORMATION

Identification

Name	AUSTRALIAN ORGAN DONOR REGISTER DECISION INFORMATION
Metadata Type	Section
Identifier	S-16774

Relationships

Parent

Data Type	Name	Occurrences (child within parent)
	Medicare Overview	0..1

Children

Data Type	Name	Occurrence
	EXCLUSION STATEMENT	0..1
	AUSTRALIAN ORGAN DONOR REGISTER DETAILS	0..1

CDA R-MIM Representation

Figure 7.22, "AUSTRALIAN ORGAN DONOR REGISTER DECISION INFORMATION" shows a subset of the CDA R-MIM containing those classes being referred to in the CDA Mapping. This data component maps to CDA Header elements.

The AUSTRALIAN ORGAN DONOR REGISTER DECISION INFORMATION section is composed of a Section class related to its context ClinicalDocument.structuredBody through a component relationship.

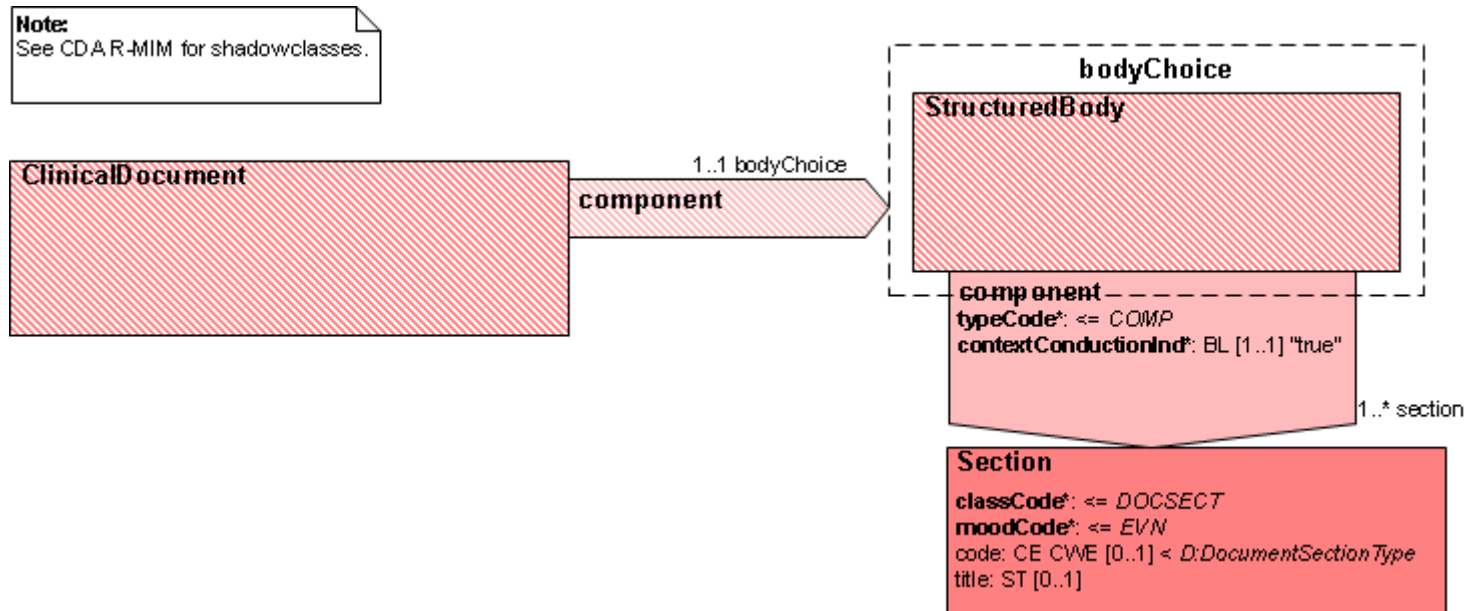

Figure 7.22. AUSTRALIAN ORGAN DONOR REGISTER DECISION INFORMATION

CDA Mapping

8 Common Patterns

8.1 code

The <code> element pattern refines the kind of act being recorded. It is of data type CD CWE (Concept Descriptor, Coded With Extensibility). It may have:

- a null attribute (*nullFlavor*)
- *originalText*
- *code* and *codeSystem*
- *translation* (CD)
- any combination of the above.

A *displayName* is highly recommended.

Where used, the *code* attribute **SHALL** contain a code from the relevant vocabulary.

Where used, the *codeSystem* attribute **SHALL** contain the OID for the relevant vocabulary. Values for coding systems can be obtained from the HL7 OID registry accessible from the HL7 home web page at www.hl7.org¹.

Where used, the *displayName* attribute **SHALL** contain a human readable description of the code value.

The *codeSystemName* **MAY** be present and, where used, **SHALL** contain a human readable name for the coding system.

Where used, the *originalText* element **SHALL** be used to carry the full text associated with this code as selected by, typed by or displayed to the author of this statement.

Codes can be obtained from a variety of sources. Additional vocabularies are also available from the HL7 Version 3 Vocabulary tables, available to HL7 members through the HL7 web site. In some cases, the vocabularies have been specified; in others, a particular code has been fixed or there is no vocabulary specified.

If a vocabulary is specified in this implementation guide and no suitable code, can be found the *originalText* element **SHALL** be used to carry the full text as selected by, typed by or displayed to the author of this statement.

¹ <http://www.hl7.org>

If a vocabulary is specified in this implementation guide and it is not possible to use this vocabulary, but an alternate vocabulary is in use, the *originalText* element **SHALL** be used to carry the full text as selected by, typed by or displayed to the author of this statement. The *code* element **SHALL** be used to carry the relevant information from the alternate vocabulary and the alternate vocabulary **SHALL** be registered with HL7 and allocated an appropriate OID.

If an alternate vocabulary is in use and a translation into the specified code system is available, the *originalText* element **SHALL** be used to carry the full text as selected by, typed by or displayed to the author of this statement. The *code* element **SHALL** be used to carry the relevant information from the alternate vocabulary and the alternate vocabulary **SHALL** be registered with HL7 and allocated an appropriate OID. The *translation* element **SHALL** be used to indicate the translation code from the specified vocabulary.

Example 8.1. code

```
<!-- Specified code system in use -->
<code
  code="271807003"
  codeSystem="2.16.840.1.113883.6.96"
  codeSystemName="SNOMED CT-AU"
  codeSystemVersion="20101130"
  displayName="skin rash" />

<!-- Alternate code system in use and a translation into the specified code system is available -->
<code
  code="49390"
  codeSystem="2.16.840.1.113883.19.6.2"
  codeSystemName="ICD9CM"
  displayName="ASTHMA W/O STATUS ASTHMATICUS">
  <originalText>Patient is Asthmatic</originalText>
  <translation
    code="195967001"
    codeSystem="2.16.840.1.113883.19.6.96"
    codeSystemName="SNOMED CT"
    displayName="Asthma" />
</code>

<!-- Alternate code system in use and no translation into the specified code system is available -->
<code
  code="49390"
  codeSystem="2.16.840.1.113883.19.6.2"
  codeSystemName="ICD9CM"
  displayName="ASTHMA W/O STATUS ASTHMATICUS">
  <originalText>Patient is Asthmatic</originalText>
</code>

<!-- No suitable code can be found or there is no code system in use -->
<code
  <originalText>Patient is Asthmatic</originalText>
</code>
```

8.2 id

The <id> element pattern is of data type II (Instance Identifier). The II data type may have:

- a null attribute (*nullFlavor*)
- a *root*
- a *root* and an *extension*
- a *root* and an *extension* and an *assigningAuthorityName*
- a *root* and an *assigningAuthorityName*
- a *root* and an *assigningAuthorityName* and a *displayable*
- a *root* and an *extension* and a *displayable*
- a *root* and an *extension* and an *assigningAuthorityName* and a *displayable*
- a *root* and a *displayable*

The root attribute is **REQUIRED** and is a unique identifier that guarantees the global uniqueness of the instance identifier. The root alone **MAY** be the entire instance identifier. The root attribute **SHALL** be a UUID or OID.

The extension attribute **MAY** be present, and is a character string as a unique identifier within the scope of the identifier root.

In the case of Entity Identifier, assigningAuthorityName is **RECOMMENDED**.

Identifiers appear in this implementation guide for two different reasons. The first is that the identifier has been identified in the business requirements as relevant to the business process. These identifiers are documented in the Structured Content Specifications ,which make clear the meaning of this identifier.

In addition, the implementation makes clear that identifiers may also be found on many other parts of the CDA content model. These identifiers are allowed to facilitate record matching across multiple versions of related documents, so that the same record can consistently be identified, in spite of variations in the information as the record passes through time or between systems. These identifiers have no meaning in the business specification. If senders provide one of these identifiers, it **SHALL** always be the same identifier in all versions of the record, and it **SHALL** be globally unique per the rules of the II data type.

Throughout the specification, these identifiers are labelled with the following text: "This is a technical identifier that is used for system purposes such as matching."

Example 8.2. id

```
<id root="2.16.840.1.113883.19" extension="123A45" />
```

```
<ext:id assigningAuthorityName="HPI-O" root="1.2.36.1.2001.1003.0.8003621566684455" />
```

8.3 time

The `<time>` element pattern is of data type TS (Point in Time) and can also be an interval between two times (IVL_TS), representing a period of time. Both forms may either have a `nullFlavor` attribute or child components following allowed patterns.

Any time that is more specific than a day SHALL include a time zone.

A simple timestamp (point in time) will only contain a value attribute containing the time value, expressed as a series of digits as long as required or available.

Example 8.3. Simple timestamp

```
<time value="20091030" />
```

This represents "October 30, 2009" to calendar day precision. In cases where the containing element is defined in the CDA schema as "ANY" data type, it is useful to provide an `xsi:type` attribute, set to the value "TS".

The period of time pattern is defined in terms of one or both of its lowest and highest values. The low and high elements are instances of the timestamp pattern described above. More complex time period concepts can be expressed by combining a high, low, or centre element with a width element.

Example 8.4. Low time

```
<period>  
  <low value="20091030" />  
</period>
```

This represents "a period after October 30, 2009". In cases where the containing element is defined in the CDA schema as "ANY" data type, it is useful to provide an `xsi:type` attribute, set to the value "IVL_TS", as in the next example.

Example 8.5. Interval timestamp 1

```
<period xsi:type="IVL_TS">  
  <high value="200910301030+1000" />  
</period>
```

This represents "a period before 10:30 a.m. UTC+10, October 30, 2009". A discretionary `xsi:type` attribute has been provided to explicitly cast the pattern to "IVL_TS".

Example 8.6. Interval timestamp 2

```
<period xsi:type="IVL_TS">  
  <low value="2007" />  
  <high value="2009" />  
</period>
```

This represents "the calendar years between 2007 and 2009". The low element **SHALL** precede the high element. As per the previous example, a discretionary xsi:type attribute has been provided to explicitly cast the pattern to "IVL_TS".

Example 8.7. Width time

```
<period>  
  <high value="20091017" />  
  <width value="2" unit="wk" />  
</period>
```

This expresses "two weeks before October 17th, 2009". A low value can be derived from this.

8.4 Entity Identifier

CDA Mapping

NEHTA SCS Data Component	Data Component Definition	Card	CDA Schema Data Element	Vocab	Comments
CDA Data Elements					
Entity Identifier	A number or code issued for the purpose of identifying an entity (person, organisation or organisation sub-unit) within a healthcare context.	The cardinality of the group comes from the linking parent and the cardinality of the children data elements comes from the R-MIM diagram.	ext:asEntityIdentifier		See Australian CDA extension: Entity-Identifier .
			ext:asEntityIdentifier/@classCode="IDENT"		
			ext:asEntityIdentifier/ext:id		
			ext:asEntityIdentifier/ext:id/@root	Attribute @root SHALL be used, SHALL be an OID and SHALL NOT be a UUID. Attribute @root SHALL be a globally unique object identifier (OID) that identifies the combination of geographic area, issuer and type. If no such OID exists, it SHALL be defined before any identifiers can be created.	
			ext:asEntityIdentifier/ext:id/@extension	Attribute @extension MAY be used and if it is used, SHALL be a unique identifier within the scope of the root that is populated directly from the designation.	
			ext:asEntityIdentifier/ext:id/@assigningAuthorityName	Attribute @assigningAuthorityName SHOULD be used and if it is used, is a human readable name for the namespace represented in the root that is populated with the issuer, or identifier type, or a concatenation of both as appropriate. This SHOULD NOT be used for machine readability purposes.	
			ext:asEntityIdentifier/ext:code		See <code> for available attributes.
			ext:asEntityIdentifier/ext:assigningGeographicArea		
			ext:asEntityIdentifier/ext:assigningGeographicArea/@classCode="PLC"		
ext:asEntityIdentifier/ext:assigningGeographicArea/ext:name	Element ext:name MAY be used and if it is used, is the range and extent that the identifier applies to the object with which it is associated that is populated directly from the geographic area. This SHOULD NOT be used for machine readability purposes. For details see: AS 5017-2006: Health Care Client Identifier Geographic Area				

Example 8.8. Entity Identifier

```

8.5 Person Name

CDA Mapping

NEHTA SCS Data Component	Data Component Definition	Card	CDA Schema Data Element	Vocab	Comments
CDA Data Elements					
Person Name	The appellation by which an individual may be identified separately from any other within a social context.	Cardinality comes from linking parent.	name		
Person Name > Name Title	An honorific form of address commencing a name.	0..*	name/ prefix		
Person Name > Family Name	That part of a name a person usually has in common with some other members of his/her family, as distinguished from his/her given names.	1..1	name/ family		
Person Name > Given Name	The person's identifying names within the family group or by which the person is uniquely socially identified.	0..*	name/ given		
Person Name > Name Suffix	The additional term used following a person's name to identify that person.	0..*	name/ suffix		
Person Name > Preferred Name Indicator	A flag to indicate that this is the name a person has selected for use.	0..1	name/ @use		Space separated list of codes. true='L' false=blank
Person Name > Person Name Usage	The classification that enables differentiation between recorded names for a person.	0..1	name/ @use	AS 5017-2006: Health Care Client Name Usage	Space separated list of codes.

Example 8.9. Person Name

```
<!-- This example is provided for illustrative purposes only. It has had no clinical validation.
While every effort has been taken to ensure that the examples are consistent with the message specification,
where there are conflicts with the written message specification or schema, the specification or schema shall be considered to take precedence -->

<!-- preferred name -->
<name use="L">
  <prefix>Ms</prefix>
  <given>Sally</given>
  <family>Grant</family>
</name>
```

8.6 Address

CDA Mapping

NEHTA SCS Data Component	Data Component Definition	Card	CDA Schema Data Element	Vocab	Comments
CDA Data Elements					
Address	The description of a location where an entity is located or can be otherwise reached or found and a description of the purpose for which that address is primarily used by that entity.	Cardinality comes from linking parent.	addr		
Address > No Fixed Address Indicator	A flag to indicate whether or not the participant has no fixed address.	1..1	addr/@nullFlavor	If true, nullFlavor="NA". If false omit nullFlavor and fill in address.	
Address > Australian or International Address	Represents a choice to be made at run-time between an AUSTRALIAN ADDRESS and an INTERNATIONAL ADDRESS.	1..1	n/a		This logical NEHTA data component has no mapping to CDA. The cardinality of this component propagates to its children.
Address > Australian or International Address > International Address	The description of a non-Australian location where an entity is located or can be otherwise reached or found.	0..1	n/a		This logical NEHTA data component has no mapping to CDA. The cardinality of this component propagates to its children.
Address > Australian or International Address > International Address > International Address Line	A composite of address details comprising a low level geographical/physical description of a location that, used in conjunction with the other high level address components, i.e. international state/province, international post-code and country, forms a complete geographic/physical address	0..*	addr/streetAddressLine		
Address > Australian or International Address > International Address > International State/Province	The designation applied to an internal, political or geographic division of a country other than Australia that is officially recognised by that country	0..1	addr/state		
Address > Australian or International Address > International Address > International Postcode	The alphanumeric descriptor for a postal delivery area (as defined by the postal service of a country other than Australia) aligned with locality, suburb or place for an address	0..1	addr/postalCode		
Address > Australian or International Address > International Address > Country	The country component of the address.	0..1	addr/country	Australia Bureau of Statistics, Standard Australian Classification of Countries (SACC) Cat. No. 1269 [ABS2008]	Use the name, not the numbered code.

NEHTA SCS Data Component	Data Component Definition	Card	CDA Schema Data Element	Vocab	Comments
Address > Australian or International Address > Australian Address	The description of an Australian location where an entity is located or can be otherwise reached or found.	0..1	n/a		This logical NEHTA data component has no mapping to CDA. The cardinality of this component propagates to its children.
Address > Australian or International Address > Australian Address > Unstructured Australian Address Line	A composite of one or more low level standard address components describing a geographical/physical location that, used in conjunction with the other high level address components, e.g. Australian suburb/town/locality name, Australian postcode and Australian State/Territory, forms a complete geographical/physical address.	0..*	addr/ streetAddressLine		
Address > Australian or International Address > Australian Address > Structured Australian Address Line	The standard low level address components describing a geographical/physical location that, used in conjunction with the other high level address components, i.e. Australian suburb/ town/locality name, Australian postcode and Australian State/Territory, form a complete geographical/physical address.	0..1	n/a		This logical NEHTA data component has no mapping to CDA. The cardinality of this component propagates to its children.
Address > Australian or International Address > Australian Address > Structured Australian Address Line > Australian Unit Type	The specification of the type of a separately identifiable portion within a building/complex, marina etc. to clearly distinguish it from another.	0..1	addr/ unitType	AS 5017 (2006) - Healthcare Client Identification: Australian Unit Type [SA2006a] AS 4846 (2006) - Healthcare Provider Identification: Australian Unit Type [SA2006b]	
Address > Australian or International Address > Australian Address > Structured Australian Address Line > Australian Unit Number	The specification of the number or identifier of a building/complex, marina etc. to clearly distinguish it from another.	0..1	addr/ unitID		
Address > Australian or International Address > Australian Address > Structured Australian Address Line > Australian Address Site Name	The full name used to identify the physical building or property as part of its location.	0..1	addr/ additionalLocator		
Address > Australian or International Address > Australian Address > Structured Australian Address Line > Australian Level Type	Descriptor used to classify the type of floor or level of a multistorey building/complex.	0..1	addr/ additionalLocator	AS 5017 (2006) - Healthcare Client Identification: Australian Level Type [SA2006a] AS 4846 (2006) - Healthcare Provider Identification: Australian Level Type [SA2006b]	
Address > Australian or International Address > Australian Address > Structured Australian Address Line > Australian Level Number	Descriptor used to identify the floor or level of a multi-storey building/complex.	0..1	addr/ additionalLocator		
Address > Australian or International Address > Australian Address > Structured Australian Address Line > Australian Street Number	The numeric or alphanumeric reference number of a house or property that is unique within a street name.	0..1	addr/ houseNumber		

NEHTA SCS Data Component	Data Component Definition	Card	CDA Schema Data Element	Vocab	Comments
Address > Australian or International Address > Australian Address > Structured Australian Address Line > Australian Lot Number	The Australian Lot reference allocated to an address in the absence of street numbering.	0..1	addr/additionalLocator		
Address > Australian or International Address > Australian Address > Structured Australian Address Line > Australian Street Name	The name that identifies a public thoroughfare and differentiates it from others in the same suburb/town/locality.	0..1	addr/streetName		
Address > Australian or International Address > Australian Address > Structured Australian Address Line > Australian Street Type	A code that identifies the type of public thoroughfare.	0..1	addr/streetNameType	AS 5017 (2006) - Healthcare Client Identification: Australian Street Type Code [SA2006a] AS 4846 (2006) - Healthcare Provider Identification: Australian Street Type Code [SA2006b]	
Address > Australian or International Address > Australian Address > Structured Australian Address Line > Australian Street Suffix	Term used to qualify Australian Street Name used for directional references.	0..1	addr/direction	AS 5017 (2006) - Healthcare Client Identification: Australian Street Suffix [SA2006a] AS 4846 (2006) - Healthcare Provider Identification: Australian Street Suffix [SA2006b]	
Address > Australian or International Address > Australian Address > Structured Australian Address Line > Australian Postal Delivery Type	Identification for the channel of postal delivery.	0..1	addr/deliveryAddressLine	AS 5017 (2006) - Healthcare Client Identification: Australian Postal Delivery Type Code [SA2006a] AS 4846 (2006) - Healthcare Provider Identification: Australian Postal Delivery Type Code [SA2006b]	
Address > Australian or International Address > Australian Address > Structured Australian Address Line > Australian Postal Delivery Number	Identification number for the channel of postal delivery.	0..1	addr/deliveryAddressLine		
Address > Australian or International Address > Australian Address > Australian Suburb/Town/Locality	The full name of the general locality contained within the specific address.	0..1	addr/city	Values in this data element should comply with descriptions in the Australia Post Postcode File (see www.aus-post.com.au/postcodes)	
Address > Australian or International Address > Australian Address > Australian State/Territory	The identifier of the Australian state or territory.	0..1	addr/state	AS 5017-2006 Australian State/Territory Identifier - Postal	
Address > Australian or International Address > Australian Address > Australian Postcode	The numeric descriptor for a postal delivery area (as defined by Australia Post), aligned with locality, suburb or place for the address.	0..1	addr/postalCode	Values in this data element should comply with descriptions in the Australia Post Postcode File (see www.aus-post.com.au/postcodes)	
Address > Australian or International Address > Australian Address > Australian Delivery Point Identifier	A unique number assigned to a postal delivery point as recorded on the Australia Post Postal Address File.	0..1	addr/additionalLocator		
Address > Address Purpose	The purpose for which the address is being used by the entity.	1..1	addr/@use	AS 5017-2006: Health Care Client Identifier Address Purpose	Space separated list of codes.

Example 8.10. Address

```
<!-- These examples are provided for illustrative purposes only. They have had no clinical validation.
While every effort has been taken to ensure that the examples are consistent with the message specification,
where there are conflicts with the written message specification or schema, the specification or schema shall be considered to take precedence -->

<!-- no fixed address -->
<addr nullFlavor="NA" />

<!--Australian home address (unstructured) -->

```

8.8 Employment

CDA Mapping

Note

NS = In the absence of national standard code sets, the code sets used **SHALL** be registered code sets, i.e. registered through the [HL7 code set registration procedure](#)² with an appropriate object identifier (OID), and **SHALL** be publicly available.

When national standard code sets become available, they **SHALL** be used and the non-standard code sets **SHALL** be deprecated.

NEHTA SCS Data Component	Data Component Definition	Card	CDA Schema Data Element	Vocab	Comments
CDA Data Elements					
Employment Detail	A person's occupation and employer.	Cardinality comes from linking parent.	n/a		This logical NEHTA data component has no mapping to CDA.
Employment Detail > Employer Organization	The organisation that the individual is working for in respect to the role they are playing in the nominated participation.	0..*	ext:asEmployment/ext:employerOrganization		There is a known issue in the NEHTA Participation Data Specification [NE-HT2011v] for this logical Data Component's cardinality. Furthermore the corresponding CDA elements ext:asEmployment and ext:employerOrganization do not allow the cardinality to be '0..*/multiple'. The cardinality SHALL be interpreted as '0..1' instead of '0..*'. ext:asEmployment/@classCode="EMP"

² <http://www.hl7.org/oid/index.cfm?ref=footer>

NEHTA SCS Data Component	Data Component Definition	Card	CDA Schema Data Element	Vocab	Comments
Employment Detail > Employer Organisation > Entity Identifier	A number or code issued for the purpose of identifying a participant within a healthcare context.	1..*	ext:asEmployment/ext:employerOrganization/asOrganizationPartOf/wholeOrganization/ Entity Identifier	The value of one Entity Identifier SHALL be an Australian HPI-O.	See common pattern: Entity Identifier .
Employment Detail > Employer Organisation > Organisation	Any organisation of interest to, or involved in, the business of healthcare service provision.	1..1	n/a		Not mapped directly, encompassed implicitly in assignedAuthor/ext:asEmployment/employerOrganization.
Employment Detail > Employer Organisation > Organisation > Organisation Name	The name by which an organisation is known or called.	1..1	ext:asEmployment/ext:employerOrganization/as OrganizationPartOf/wholeOrganization/name		
Employment Detail > Employer Organisation > Organisation > Department/Unit	The name by which a department or unit within a larger organisation is known or called.	0..1	ext:asEmployment/ext:employerOrganization/ name		
Employment Detail > Employer Organisation > Organisation > Organisation Name Usage	The classification that enables differentiation between recorded names for an organisation or service location.	0..1	ext:asEmployment/ext:employerOrganization/asOrganizationPartOf/wholeOrganization/name/ @use	AS 4846-2006: Health Care Provider Organisation Name Usage	
Employment Detail > Employment Type	The basis on which the person is employed by the employer organisation.	0..1	ext:asEmployment/ ext:jobClassCode	NS	
Employment Detail > Occupation	A descriptor of the class of job based on similarities in the tasks undertaken.	0..*	ext:asEmployment/ ext:jobCode	1220.0 - ANZSCO - Australian and New Zealand Standard Classification of Occupations, First Edition, Revision 1 [ABS2009]	The corresponding CDA element ext:jobCode doesn't allow the cardinality to be '0..*/multiple'. The cardinality SHALL be interpreted as '0..1' instead of '0..*'
Employment Detail > Position In Organisation	A descriptor of the job or the job role based on the management hierarchy of the organisation.	0..1	ext:asEmployment/ ext:code	NS	

Example 8.12. Employment

```

<!-- This example is provided for illustrative purposes only. It has had no clinical validation.

          </ext:assigningGeographicArea>
        </ext:asEntityIdentifier>

      </wholeOrganization>
    </asOrganizationPartOf>
  </ext:employerOrganization>
</ext:asEmployment>

```

8.9 PCEHR URN Scheme

The 'pcehr:URN' scheme is used to convey logical references to other CDA documents. A URN constructed by the pcehr: scheme has the following parts:

```
pcehr:[repository_id]/[document-id-root-as-OID](^[document-id-extension])
```

Note that the document-id-extension part is **OPTIONAL** if the original document didn't have an extension in its id. (The document-id-extension part is only supported if original document-id-root is an OID.) Both the repository id and the document id are required when retrieving the document from the PCEHR using the B2B interface.

As an example, the reference:

```
<linkHtml href="pcehr:1.2.36.1.2001.1007.10.8003640002000035/2.25.154933408817574926934338372917507695657^a12323">Document</linkHtml>
```

Creates a hyperlink that refers to the document with the following id element:

```
< id root="748f16d2-0f9a-4989-96b1-b1279140a429" extension="a12323"/ >
```

The document is found on the repository "1.2.36.1.2001.1007.10.8003640002000035".

The "2.25.154933408817574926934338372917507695657" is an OID formed using the UUID "748f16d2-0f9a-4989-96b1-b1279140a429" as defined in [\[ITU-X.667\]](#)

The full <linkHtml> format is as follows:

Example 8.13. PCEHR URN Scheme

```
<content>
...
<linkHtml href="pcehr:1.2.36.1.2001.1007.10.8003640002000035/748f16d2-0f9a-4989-96b1-b1279140a429^a12323">Document</linkHtml>
...
</content>
```

Notes:

- The pcehr: schema is not a URL – it does not refer directly to a document by its location. In order to retrieve the document, the contents must be parsed and used in a B2B getDocument call.
- The repository id is an opaque reference – the only use consumer applications can make of it is to pass it to the B2B interface when making a getDocument call.
- Documents are globally uniquely identified. Document ids **SHALL** never be changed and **SHALL NOT** be re-used.

- The reference to the CDA document **SHALL** be included in the CDA narrative in a <linkHTML> element.
- Systems should not assume that a particular document will always be associated with the same repository.
- Systems may store the Medicare Overview in order to retain clinical decision making evidence.
- Systems should not rely on the availability of links found in the Medicare Overview.
- Systems can rely on the fact that links provided in the Medicare Overview will never be re-used to point to other documents.

9 Australian CDA Extensions

As part of the CDA, standard extensions are allowed as follows:

Locally-defined markup may be used when local semantics have no corresponding representation in the CDA specification. CDA seeks to standardize the highest level of shared meaning while providing a clean and standard mechanism for tagging meaning that is not shared. In order to support local extensibility requirements, it is permitted to include additional XML elements and attributes that are not included in the CDA schema. These extensions should not change the meaning of any of the standard data items, and receivers must be able to safely ignore these elements. Document recipients must be able to faithfully render the CDA document while ignoring extensions.

Extensions may be included in the instance in a namespace other than the HL7v3 namespace, but must not be included within an element of type ED (e.g., <text> within <procedure>) since the contents of an ED datatype within the conformant document may be in a different namespace. Since all conformant content (outside of elements of type ED) is in the HL7 namespace, the sender can put any extension content into a foreign namespace (any namespace other than the HL7 namespace). Receiving systems must not report an error if such extensions are present. "HL7 Clinical Document Architecture, Release 2" [\[HL7CDAR2\]](#)

This section contains extensions that have been defined for Australian concepts not represented in CDA.

This section is provided for clarity only. Please see the relevant mappings section where these extensions have been used for actual mapping details.

9.1 ClinicalDocument.completionCode

10 Vocabularies and Code Sets

When referencing the following vocabulary tables, if one column in the code set table is bolded, use the code in that column; otherwise use the values in all columns.

Example 10.1. All values

```
<code  
  code="103.16044.4.1.1"  
  codeSystem="1.2.36.1.2001.1001"  
  codeSystemName="&NCTIS_CODE_SYSTEM_NAME;"  
  displayName="Additional Comments" />
```

Example 10.2. One value

```
<name use="I">  
  {name}  
</name>
```

10.1 HL7 v3: TelecommunicationAddressUse

Code	Value
H	Home
HP	Primary Home
HV	Vacation Home
WP	Workplace
AS	Answering Service
EC	Emergency Contact
MC	Mobile Contact
PG	Pager

10.2 AS 5017-2006 Health Care Client Identifier Sex

displayName	code	codeSystemName	codeSystem
Male	M	AS 5017-2006 Health Care Client Identifier Sex	2.16.840.1.113883.13.68
Female	F	AS 5017-2006 Health Care Client Identifier Sex	2.16.840.1.113883.13.68
Intersex or Indeterminate	I	AS 5017-2006 Health Care Client Identifier Sex	2.16.840.1.113883.13.68
Not Stated/Inadequately Described	N	AS 5017-2006 Health Care Client Identifier Sex	2.16.840.1.113883.13.68

10.3 AS 5017-2006: Health Care Client Name Usage

Code Set AS 5017-2006 mapped to HL7 Name Use Code

Note

CDA Release 2 uses HL7 Data Types Release 1. For some of the AS 5017-2006 values, there are no satisfactory equivalents in the HL7 Name Use R1 code set. In these cases (marked R2), an HL7 Name Use R2 code has been used.

Note

In cases (marked EXT) where there are no suitable HL7 codes, extension codes have been created.

AS 5017-2006 Code	AS 5017-2006 Alternative Code	AS 5017-2006 Descriptor	HL7 Name Use Code	HL7 Name Use Name	HL7 Name Use Definition
1	L	Registered Name (Legal Name)	L	(R1) Legal	(R1) Known as/conventional/the one you use
2	R	Reporting Name	C	(R1) License	(R1) As recorded on a license, record, certificate, etc. (only if different from legal name)
3	N	Newborn Name	NB	(EXT)	(EXT)
4	B	Professional or Business Name	A	(R1) Artist/Stage	(R1) Includes writer's pseudonym, stage name, etc
5	M	Maiden Name (Name at birth)	M	(R2) Maiden Name	A name used prior to marriage.
8	O	Other Name (Alias)	P	(R1) Pseudonym	(R1) A self-asserted name that the person is using or has used

10.4 AS 4846-2006: Health Care Provider Organisation Name Usage

Code Set AS 5017-2006 Organisation Name Usage mapped to HL7 Name Use Code

Note

There are no suitable HL7 codes so extension codes have been created.

AS 4846-2006 Code	AS 4846-2006 Alternative Code	AS 4846-2006 Descriptor	HL7 Name Use Code	HL7 Name Use Name	HL7 Name Use Definition
1	U	Organizational unit/section/division name	ORGU	(EXT)	(EXT)
2	S	Service location name	ORGS	(EXT)	(EXT)

State or Territory Identifier	S	AS 5017-2006 Health Care Client Identifier Geographic Area	2.16.840.1.113883.13.63
National Identifier	N	AS 5017-2006 Health Care Client Identifier Geographic Area	2.16.840.1.113883.13.63

10.8 AS 5017-2006: Health Care Client Electronic Communication Medium

AS 5017-2006 Code	AS 5017-2006 Descriptor	AS 5017-2006 Alternative Code	HL7 URLScheme Code	HL7 URLScheme Name	HL7 URLScheme Definition
1	Telephone (excluding mobile telephone)	T	tel	Telephone	A voice telephone number.
2	Mobile (cellular) telephone NOTE: Mobile will also need a Telecommunication-Address Use code of MC (Mobile Contact) (see HL7 v3: TelecommunicationAddressUse)	M	tel	Telephone	A voice telephone number.
3	Facsimile machine	F	fax	Fax	A telephone number served by a fax device.
4	Pager NOTE: Pager will also need a TelecommunicationAddress Use code of PG (Pager) (see HL7 v3: TelecommunicationAddressUse)	P	tel	Telephone	A voice telephone number
5	Email	E	mailto	Mailto	Electronic mail address.

AS 5017-2006 Code	AS 5017-2006 Descriptor	AS 5017-2006 Alternative Code	HL7 URLScheme Code	HL7 URLScheme Name	HL7 URLScheme Definition
6	URL	U	Use the most appropriate code from the list below:		
			file	File	Host-specific local file names [RFC 1738]. Note that the file scheme works only for local files. There is little use for exchanging local file names between systems, since the receiving system likely will not be able to access the file.
			ftp	FTP	The File Transfer Protocol (FTP).
			http	HTTP	Hypertext Transfer Protocol.
			mlp	MLLP	The traditional HL7 Minimal Lower Layer Protocol. The URL has the form of a common IP URL e.g., mlp://<host>:<port>/ with <host> being the IP address or DNS hostname and <port> being a port number on which the MLLP protocol is served.
			modem	Modem	A telephone number served by a modem device.
			nfs	NFS	Network File System protocol. Some sites use NFS servers to share data files.
			telnet	Telnet	Reference to interactive sessions. Some sites, (e.g., laboratories) have TTY based remote query sessions that can be accessed through telnet.

10.9 AS 5017-2006: Health Care Client Electronic Communication Usage Code

AS 5017-2006 mapped to HL7 TelecommunicationAddressUse (HL7 TAU) Code

Code	Descriptor	Alternative Code	HL7 TAU Code	HL7 TAU Name	HL7 TAU Description
1	Business	B	WP	Work place	An office address. First choice for business related contacts during business hours.
2	Personal	P	H	Home address	A communication address at a home, attempted contacts for business purposes might intrude privacy and chances are one will contact family or other household members instead of the person one wishes to call. Typically used with urgent cases, or if no other contacts are available.
3	Both business and personal use	A	WP H	Both Work place and Home address	

10.10 AS 5017-2006 Australian State/Territory Identifier - Postal

Code	Descriptor
NSW	New South Wales
VIC	Victoria
QLD	Queensland
SA	South Australia
WA	Western Australia
TAS	Tasmania
NT	Northern Territory
ACT	Australian Capital Territory
U	Unknown

10.11 AS 5017-2006 Health Care Client Identifier Date Accuracy Indicator

The data elements that use this value set consist of a combination of three codes, each of which denotes the accuracy of one date component:

A – The referred date component is ‘accurately known’.

E – The referred date component is an ‘estimate’.

U – The referred date component is ‘unknown’.

The data elements that use this value set contain positional fields (DMY).

Field 1 (D) – refers to the accuracy of the ‘day component’.

Field 2 (M) – refers to the accuracy of the ‘month component’.

Field 3 (Y) – refers to the accuracy of the ‘year component’.

Note

The order of the date components in the HL7 date and time datatypes (YYYYMMDD) is the reverse of that specified above.

The possible combinations are as follows:

code	descriptor
AAA	Accurate date
AAE	Accurate day and month, estimated year
AEA	Accurate day, estimated month, accurate year
AAU	Accurate day and month, unknown year
AUA	Accurate day, unknown month, accurate year
AEE	Accurate day, estimated month and year
AUU	Accurate day, unknown month and year
AEU	Accurate day, estimated month, unknown year

code	descriptor
AUE	Accurate day, unknown month
EEE	Estimated date
EEA	Estimated day and month, accurate year
EAE	Estimated day, accurate month
EEU	Estimated day and month, unknown year
EUE	Estimated day, unknown month, estimated year
EAA	Estimated day, accurate month and year
EUU	Estimated day, unknown month and year
EAU	Estimated day, accurate month, unknown year
EUA	Estimated day, unknown month, accurate year
UUU	Unknown date
UUA	Unknown day and month, accurate year
UAU	Unknown day, accurate month, unknown year
UUE	Unknown day and month, estimated year
UEU	Unknown day, estimated month, unknown year
UAA	Unknown day, accurate month and year
UEE	Unknown day, estimated month and year
UAE	Unknown day, accurate month, estimated year
UEA	Unknown day, estimated month, accurate year

Appendix A. CDA Narratives

CDA requires that each Section in its Body include a narrative block, containing a clinically complete version of the section's encoded content using custom hypertext markup defined by HL7. The narrative is the human-readable and attestable part of a CDA document, and **SHALL** stand alone as an accurate representation of the content of the document without any need to consult entries in the body.

There is no canonical markup for specific CDA components, but some conformance points apply:

- The narrative block **SHALL** be encapsulated within text component of the CDA Section.
- The narrative contents **SHALL** conform to the requirements specified in the CDA Rendering Specification.
 - In accordance with the requirement to completely represent Section contents, values of codedText or codedableText data elements defined in the SCS **SHALL** include an originalText or a displayName component (or both). Where available, the originalText **SHOULD** be found in the narrative, otherwise the displayName **SHOULD** be found in the narrative.
- It **SHALL** completely and accurately represent the clinical information encoded in the Section. Content **SHALL NOT** be omitted from the narrative.
- It **SHALL** conform to the content requirements of the CDA specification [\[HL7CDAR2\]](#) and/or XML Schema.

Clinical judgement is required to determine the appropriate presentation for narrative. NEHTA may release additional guidance in this regard. The examples provided in sections of this document, and the separate full example, offer some guidance for narrative block markup. They may be easily adapted as boilerplate markup.

This page is intentionally left blank.

Appendix B. Log of Changes

This appendix lists the major changes and fixes applied to this CDA Implementation Guide resulting from public feedback and internal testing.

Changes from Version 1.0 10 Aug 2012 to Version 1.0 31 Aug 2012

ID	Document Ref		Change Type	Change Detail	Changed Instigated By	Rationale For Change	Date Changed
	Section	Section Name					
1	1.9	Known Issues	Added new entry	Added a Known Issues entry for 7.1.4.2.2 LINK.	NEHTA	Document Review - align with new modelling approach for Link Data group.	27 Aug 2012
2	3	Data Hierarchy	Re-factored sections	New section elements have been added to the Medicare Information View Content. 1. MEDICARE/DVA FUNDED SERVICES HISTORY (0..1) 2. PHARMACEUTICAL BENEFITS HISTORY (0..1) 3. AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER HISTORY (0..1) 4. AUSTRALIAN ORGAN DONOR REGISTER INFORMATION (0..1)	NEHTA	Document Review - align with new modelling approach for Link Data group.	27 Aug 2012
3	3	Data Hierarchy	Re-factored sections	The section 'Medicare/DVA Funded Services (MEDICARE/DVA FUNDED SERVICES)' made as a children element for new 'MEDICARE/DVA FUNDED SERVICES HISTORY' section. The 'EXCLUSION STATEMENT' refactored as a children Data Group element of 'MEDICARE/DVA FUNDED SERVICES HISTORY' section. The references of 'Medicare/DVA Funded Services (MEDICARE/DVA FUNDED SERVICES)' and 'EXCLUSION STATEMENT' have been updated in section 7.1.2 and all its sub-sections. Ex: Relationships table, XML examples,...	NEHTA	Document Review - align with new modelling approach for Link Data group.	27 Aug 2012
4	3	Data Hierarchy	Re-factored sections	The section 'Pharmaceutical Benefit Items (PHARMACEUTICAL BENEFIT ITEMS)' made as a children element for 'PHARMACEUTICAL BENEFITS HISTORY' section. The 'EXCLUSION STATEMENT' refactored as a children Data Group element of 'PHARMACEUTICAL BENEFITS HISTORY' section. The references of 'Pharmaceutical Benefit Items (PHARMACEUTICAL BENEFIT ITEMS)' and 'EXCLUSION STATEMENT' have been updated in section 7.1.2 and all its sub-sections. Ex: Relationships table, XML examples,...	NEHTA	Document Review - align with new modelling approach for Link Data group.	27 Aug 2012
5	3	Data Hierarchy	Re-factored sections	The section 'AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRIES' made as a children element for 'AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER HISTORY' section. The 'EXCLUSION STATEMENT' refactored as a children Data Group element of 'AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER HISTORY' section. The references of 'AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRIES' and 'EXCLUSION STATEMENT' have been updated in section 7.1.2 and all its sub-sections. Ex: Relationships table, XML examples,...	NEHTA	Document Review - align with new modelling approach for Link Data group.	27 Aug 2012
6	3	Data Hierarchy	Re-factored sections	The section AUSTRALIAN ORGAN DONOR REGISTER DETAILS' made as a children element for 'AUSTRALIAN ORGAN DONOR REGISTER INFORMATION' section. The 'EXCLUSION STATEMENT' refactored as a children Data Group element of AUSTRALIAN ORGAN DONOR REGISTER INFORMATION' section. The references of 'AUSTRALIAN ORGAN DONOR REGISTER DETAILS' and 'EXCLUSION STATEMENT' have been updated in section 7.1.2 and all its sub-sections. Ex: Relationships table, XML examples,...	NEHTA	Document Review - align with new modelling approach for Link Data group.	27 Aug 2012

ID	Document Ref		Change Type	Change Detail	Changed Instigated By	Rationale For Change	Date Changed
	Section	Section Name					
7	3	Data Hierarchy	Updated cardinality	The cardinality of 'AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRY' choice Data Group has been updated from '0..*' to '1..*'	NEHTA	Document Review - When 'AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRIES' section is present it SHALL include at least one-instance of its children Data Group.	27 Aug 2012
8	7.1	Medicare Information View	CDA Mapping table;	Updated section names for 'Medicare Information View (Body)' conformance constraints from: 'Medicare/DVA Funded Services (MEDICARE/ DVA FUNDED SERVICES)' 'Pharmaceutical Benefit Items (PHARMACEUTICAL BENEFIT ITEMS)' 'Australian Childhood Immunisation Register (ACIR) Component (AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRIES)' 'Australian Organ Donor Register (AODR) Component (AUSTRALIAN ORGAN DONOR REGISTER DETAILS)' to 'MEDICARE/DVA FUNDED SERVICES HISTORY' 'PHARMACEUTICAL BENEFITS HISTORY' 'AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER HISTORY' 'AUSTRALIAN ORGAN DONOR REGISTER INFORMATION'	NEHTA	Document Review - align with new modelling approach for Link Data group.	27 Aug 2012
9	7.1.2	MEDICARE/DVA FUNDED SERVICES HISTORY	CDA Mapping table and XML Example; code and displayName	1) Updated code from component[med_dva]/section/code/@code="101.16643" to component[med_dva]/section/code/@code="101.16780" 2) Updated displayName from Medicare/DVA Funded Services to Medicare/DVA Funded Services History 3) Updated section title mapping value from 'Medicare/DVA Funded Services' to 'Medicare Services - MBS and DVA Items'	NEHTA	Document Review - align with new modelling approach for Link Data group.	27 Aug 2012
10	7.1.3	PHARMACEUTICAL BENEFITS HISTORY	CDA Mapping table and XML Example; code and displayName	1) Code updated from component[med_pbr]/section/code/@code="101.16649" to component[med_pbr]/section/code/@code="101.16778" 2) Updated displayName from Pharmaceutical Benefits Items to Pharmaceutical Benefits History 3) Updated section title mapping value from 'Pharmaceutical Benefit Items' to 'Prescription Information - PBS and RPBS'	NEHTA	Document Review - align with new modelling approach for Link Data group.	27 Aug 2012

ID	Document Ref		Change Type	Change Detail	Changed Instigated By	Rationale For Change	Date Changed
	Section	Section Name					
11	7.1.4	AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER HISTORY	CDA Mapping table and XML Example; code and displayName	1) Code updated from component[med_acir]/section/code/@code="101.16658" to component[med_acir]/section/code/@code="101.16776" 2) Updated displayName from Australian Childhood Immunisation Register Entries to Australian Childhood Immunisation Register History 3) Updated section title mapping value from 'Australian Childhood Immunisation Register Entries' to 'Australian Childhood Immunisation Register - ACIR'	NEHTA	Document Review - align with new modelling approach for Link Data group.	27 Aug 2012
12	7.1.5	AUSTRALIAN ORGAN DONOR REGISTER INFORMATION	CDA Mapping table and XML Example; code and displayName	1) Code updated from component[med_aodr]/section/code/@code="101.16670" to component[med_aodr]/section/code/@code="101.16774" 2) Updated displayName from Australian Organ Donor Register Details to Australian Organ Donor Register Information 3) Updated section title mapping value from 'Australian Organ Donor Register Details' to 'Australian Organ Donor Register - AODR'	NEHTA	Document Review - align with new modelling approach for Link Data group.	27 Aug 2012
13	8.9	PCEHR URN Scheme	Notes and Example	1. Updated the value id/@root to align with XML snippet of example 8.13. 2. Renamed references to CView to Medicare Information View.	NEHTA	Document Review - fixed discrepancies	27 Aug 2012

This appendix lists the major changes and fixes applied to this CDA Implementation Guide resulting from public feedback and internal testing.

Changes from Version 1.0 31 Aug 2012 to Version 1.0 31 Oct 2012

This appendix lists the major changes and fixes applied to this CDA Implementation Guide resulting from public feedback and internal testing.

Changes from Version 1.0 31 Aug 2012 to Version 1.0 31 Oct 2012

	Section	Section Name					
3	5.1.1 CDA-2526	Custodian	CDA Mapping table and XML examples updated	Added the following CDA mapping vocab constraint and updated XML example snippet for 'EntityIdentifier'. 'The value of one Entity Identifier SHALL be a PAI-O'.	NEHTA	Document Review - Fixed incorrect XML snippets and CDA mapping.	06 Nov 2012
4	7.1.1 CDA-2627	Medicare Information View Exclusion Statement (EXCLUSION STATEMENT)	CDA Mapping table updated	Updated General Statement @displayName from 'Global Statement' to 'General Statement'. The same change has been applied to the following sections 7.1.3.1 EXCLUSION STATEMENT 7.1.4.1 EXCLUSION STATEMENT 7.1.5.1 EXCLUSION STATEMENT	NEHTA	Document Review - Fixed incorrect mapping.	09 Nov 2012
5	7.1.2.2	MEDI-CARE/DVA FUNDED SERVICES	Identifier updated	Updated Identifier from 'DG-16643' to 'S-16643'.	NEHTA	Document Review - Fixed incorrect identifier.	06 Nov 2012
6	7.1.3	PHARMACEUTICAL BENEFITS HISTORY	CDA context updated	Renamed context index from [med_pbr] to [med_pbs].	NEHTA	Document Review - Renamed context index name.	06 Nov 2012
7	7.1421.11 CDA-2618	Vaccine Administration (MEDICATION ACTION)	CDA Mapping table updated	Updated mapping to 'manufacturedProduct/manufacturedMaterial/ext:asIngredient/ext:ingredientManufacturedMaterial/@determinerCode="KIND"'.	NEHTA	Document Review - Fixed incorrect CDA mapping.	06 Nov 2012
8	7.1421.11 CDA-2736	Vaccine Administration (MEDICATION ACTION)	CDA Mapping table updated	Updated context to 'ClinicalDocument/component/structuredBody/component[med_acir]/section/component[acir_details]/section'.	NEHTA	Document Review - Fixed incorrect context.	08 Nov 2012
9	7.1.4.2.1.1 CDA-2736	VACCINE ADMINISTRATION ENTRY	CDA Mapping table updated	Updated context to 'ClinicalDocument/component/structuredBody/component[med_acir]/section/component[acir_details]/section'.	NEHTA	Document Review - Fixed incorrect context.	08 Nov 2012
10	7.1421.21 CDA-2618	Vaccine Cancellation (MEDICATION ACTION)	CDA Mapping table updated	Updated mapping to 'manufacturedProduct/manufacturedMaterial/ext:asIngredient/ext:ingredientManufacturedMaterial/@determinerCode="KIND"'.	NEHTA	Document Review - Fixed incorrect CDA mapping.	06 Nov 2012
11	7.1421.21 CDA-2736	Vaccine Cancellation (MEDICATION ACTION)	CDA Mapping table updated	Updated context to 'ClinicalDocument/component/structuredBody/component[med_acir]/section/component[acir_details]/section'.	NEHTA	Document Review - Fixed incorrect context.	08 Nov 2012
12	7.1421.22 CDA-2736	VACCINE CANCELLATION REASON	CDA Mapping table updated	Updated context to 'ClinicalDocument/component/structuredBody/component[med_acir]/section/component[acir_details]/section'.	NEHTA	Document Review - Fixed incorrect context.	08 Nov 2012
13	7.1.4.2.1.2 CDA-2736	VACCINE CANCELLATION ENTRY	CDA Mapping table updated	Updated context to 'ClinicalDocument/component/structuredBody/component[med_acir]/section/component[acir_details]/section'.	NEHTA	Document Review - Fixed incorrect context.	08 Nov 2012
14	7.1.4.2.1 CDA-2736	AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRY	CDA Mapping table updated	Updated context to 'ClinicalDocument/component/structuredBody/component[med_acir]/section/component[acir_details]/section'.	NEHTA	Document Review - Fixed incorrect context.	06 Nov 2012
15	7.1.5.2.1 CDA-2723	AUSTRALIAN ORGAN DONOR REGISTER ENTRY	CDA mapping updated and XML Example	Removed '@typeCode="DRIV"' from the CDA Mapping table and XML example.	NEHTA	Document Review - Fixed incorrect mapping.	06 Nov 2012
16	Example 7.14	Australian Childhood Immunisation Register Entries Document Provenance (LINK) XML Fragment	XML example updated	Updated UUID values and templateId for <entry > and <externalDocment> XML snippets. Added XML <component>/<section> snippets for 'AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER HISTORY' and 'AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRIES'.	NEHTA	Document Review - Fixed incorrect XML snippets.	06 Nov 2012

	Section	Section Name					
17	Example 7.19	Australian Organ Donor Register Details Document Provenance (LINK) XML Fragment	XML example updated	Updated UUID values and templateId for <entry > and <externalDocument> XML snippets.	NEHTA	Document Review - Fixed incorrect XML snippets.	06 Nov 2012

This appendix lists the major changes and fixes applied to this CDA Implementation Guide resulting from public feedback and internal testing.

Changes from Version 1.0 09 Nov 2012 to Version 1.0 16 Nov 2012

This appendix lists the major changes and fixes applied to this CDA Implementation Guide resulting from public feedback and internal testing.

Changes from Version 1.0 09 Nov 2012 to Version 1.0 16 Nov 2012

D	Document Ref		Change Type	Change Detail	Changed Instigated By	Rationale For Change	Date Changed
	Section	Section Name					
1	4 CDA-2746, CDA-2747	Administrative Observations	CDA mapping table updated	Added conformance constraint to clarify this section as an optional section.	NEHTA	Document Review - Clarification.	14 Nov 2012
2	6.1.2	SUBJECT OF CARE	CDA Mapping table updated	Added vocab constraint for 'recordTarget/patientRole/<Address>'.	NEHTA	Document Review - Aligned with SCS.	14 Nov 2012
3	7.1.1	Medicare Information View Exclusion Statement (EXCLUSION STATEMENT)	CDA mapping table updated	Added vocab constraint for 'component[miv_exc_statment]/section/text'.	NEHTA	Document Review - Added constraint.	14 Nov 2012
4	7.1.3	PHARMACEUTICAL BENEFITS HISTORY	CDA Mapping table and XML example updated	Removed CDA mapping and XML example for 'component[med_pbs]/section/text'.	NEHTA	Document Review - Fixed incorrect mapping and XML example.	14 Nov 2012
5	7.1.4	AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER HISTORY	CDA mapping table updated	Updated constraint to 'This SHALL be an exact match as specified in the section/title' constraint for the following sections.	NEHTA	Document Review - Fixed incorrect constraint.	14 Nov 2012
6	7.1.4.1	AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRIES	CDA mapping table updated	Added 'Definition' and 'cardinality' to the children Data Group references in following CDA mapping tables; 7.1.4.2 AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRIES 7.1.4.2.1 AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRY 7.1.4.2.1.1 VACCINE ADMINISTRATION ENTRY 7.1.4.2.1.2 VACCINE CANCELLATION ENTRY	NEHTA	Document Review - Updated constraint.	14 Nov 2012
7	7.1.4.2	EXCLUSION STATEMENT	CDA mapping table updated	Updated 'component[acir_excl]/section/title' vocab statement from 'SHOULD' to a 'SHALL'.	NEHTA	Document Review - Updated constraint.	14 Nov 2012
8	7.1.5.1	EXCLUSION STATEMENT	CDA mapping table updated	Updated 'component[ajodr_excl]/section/text' vocab statement from 'SHOULD' to a 'SHALL'.	NEHTA	Document Review - Updated constraint.	14 Nov 2012

D	Document Ref		Change Type	Change Detail	Changed Instigated By	Rationale For Change	Date Changed
	Section	Section Name					
9	Appendix A	CDA Narratives	Re-phrased paragraphs	Adopted the suggested revision to the narratives.	NEHTA	Document Review - Adopted the suggested revision to the narratives.	13 Nov 2012
10	Example 7.15	AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER HISTORY XML Fragment	XML example updated	Removed XML snippet for 'component[med_acir]/section/text'.	NEHTA	Document Review - Fixed incorrect XML example.	14 Nov 2012
11	Example 7.21	AUSTRALIAN ORGAN DONOR REGISTER DECISION INFORMATION XML Fragment	XML example updated	Removed XML snippet for 'component[med_aodr]/section/text'.	NEHTA	Document Review - Fixed incorrect XML example.	14 Nov 2012
12	Page iii	Related documents	Reference updated	Renamed 'Medicare Information View CDA Rendering Guide' to 'Medicare Information View CDA Rendering Specification'. This change applies to 'Reference List' section.	NEHTA	Document Review - Fixed incorrect reference.	14 Nov 2012
13	Throughout the Document	Added constraint	CDA mapping table updated	Added 'This SHALL be an exact match as specified in the section/title' constraint for the following sections; 7.1.2 MEDICARE/DVA FUNDED SERVICES HISTORY 7.1.2.2 MEDICARE/DVA FUNDED SERVICES 7.1.3 PHARMACEUTICAL BENEFITS HISTORY 7.1.3.2 PHARMACEUTICAL BENEFIT ITEMS 7.1.4.2 AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRIES 7.1.5.2 AUSTRALIAN ORGAN DONOR REGISTER DETAILS	NEHTA	Document Review - Added constraint reference.	14 Nov 2012
14	Throughout the document	N/A	Added Children Data Elements.	Expanded 'MEDICARE/DVA FUNDED SERVICES HISTORY' section.	NEHTA	Document Review - aligned with SCS.	14 Nov 2012

	Section	Section Name					
20	7.1.3.2.1 [CDA-3246]	PHARMACEUTICAL BENEFIT ITEM :: CDA R-MIM Representation :: Narrative	Update narrative	'Supply' changed to 'supply to match the element name in the path in the mapping table. 'effectivetime' has been changed to 'effectiveTime' to match the case of the attribute in the model.	NEHTA	Changes to narrative	27 Mar 2013
21	7.1.3.2.1 [CDA-3248]	PHARMACEUTICAL BENEFIT ITEM :: CDA Mapping :: PBS/RPBS Item Code	Correct an element name	'manufacturedMaterial' has been replaced with 'labeledDrug' in several places in the mapping table.	NEHTA	Incorrect element name	27 Mar 2013
22	7.1.3.2 [CDA-3230]	PHARMACEUTICAL BENEFIT ITEMS :: Identification	Correct the metadata type	'Metadata Type Data Group' changed to 'Metadata Type Section'.	NEHTA	Wrong metadata type	27 Mar 2013
23	7.1.4	AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER HISTORY :: CDA Mapping :: EXCLUSION STATEMENT	Add SCS Data Component path	'> EXCLUSION STATEMENT' replaced with 'AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER HISTORY > EXCLUSION STATEMENT'.	NEHTA	Missing SCS Data Component path	26 Mar 2013
24	7.1.4	AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER HISTORY :: CDA Mapping :: AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRIES	Add SCS Data Component path	'> AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRIES' replaced with 'AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER HISTORY > AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRIES'.	NEHTA	Missing SCS Data Component path	26 Mar 2013
25	7.1421.11 [CDA-3214]	Vaccine Administration (MEDICATION ACTION) :: CDA Mapping	Add missing values	Several missing SCS Data Component names, definitions, and cardinalities have now been included in the mapping table.	NEHTA	Missing Values	26 Mar 2013
26	7.1421.21 [CDA-3223]	Vaccine Cancellation (MEDICATION ACTION) :: CDA Mapping	Add missing values	Several missing SCS Data Component names, definitions, and cardinalities have now been included in the mapping table.	NEHTA	Missing Values	27 Mar 2013
27	7.1421.22 [CDA-3274]	VACCINE CANCELLATION REASON :: CDA Mapping :: displayName	Correct a display name	'entryRelationship[vac_cancellation_reason]/act/code/displayName="Comment"' changed to 'entryRelationship[vac_cancellation_reason]/act/code/displayName="Clinical Intervention Note"' to coincide with the '15595' data element OID Register name.	NEHTA	Incorrect display name	28 Mar 2013
28	7.142.12 [CDA-3219]	VACCINE CANCELLATION ENTRY :: Relationships	Correct the Order	Parent table has now been placed before Children table.	NEHTA	Incorrect order of Parent and Children tables	27 Mar 2013
29	7.1.4.2.1 [CDA-3203]	AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRY :: CDA Mapping :: AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRY	Insert missing names	'A run-time choice to be made between a and a ' has been changed to 'A run-time choice to be made between a VACCINE ADMINISTRATION ENTRY and a VACCINE CANCELLATION ENTRY'.	NEHTA	Missing names in Definition	26 Mar 2013
30	7.1.4 [CDA-3170]	AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER HISTORY :: Relationships :: Parent	Missing Cardinality	Occurrences (child within parent) cardinality has been included.	NEHTA	Missing Cardinality	22 Mar 2013
31	7.1.4 [CDA-3190]	AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER HISTORY :: CDA Mapping	Add SCS Data Component name, definition, and cardinality	The mapping table has now been populated with the SCS Data Component name, definition, and cardinality.	NEHTA	Missing SCS Data Component name, definition, and cardinality	26 Mar 2013
32	7.1.4 [CDA-3191]	AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER HISTORY :: CDA Mapping :: AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRIES	Add @code value	'component[med_acir]/section/code/@code=""' changed to 'component[med_acir]/section/code/@code="101.16776"'.	NEHTA	Missing @code value	26 Mar 2013
33	7.1.5 [CDA-3147]	AUSTRALIAN ORGAN DONOR REGISTER DECISION INFORMATION :: Relationships :: Parent :: Missing Cardinality	Cardinality included	Occurrences (child within parent) cardinality has been included.	NEHTA	Missing Cardinality	21 Mar 2013
34	7.1.5 [CDA-3171]	AUSTRALIAN ORGAN DONOR REGISTER DECISION INFORMATION :: Relationships :: Parent	Missing Cardinality	Occurrences (child within parent) cardinality has been included.	NEHTA	Missing Cardinality	22 Mar 2013
35	7.1 [CDA-3172]	Medicare Overview :: CDA Mapping :: Definition	Definition updated	'..Repatriation Definition Pharmaceutical Benefits Scheme..' changed to '..Repatriation Pharmaceutical Benefits Scheme..'.	NEHTA	Incorrect Definition	21 Mar 2013

ID	Document Ref		Change Type	Change Detail	Original Instigated By	Rationale For Change	Date Changed
	Section	Section Name					
36	8.3 [CDA-3141]	time :: Spelling error	Correct spelling error	'timezone' changed to 'time zone'.	NEHTA	Spelling error	11 Mar 2013
37	8.9 [CDA-3271]	PCEHR URN Scheme	Correct a spelling mistake	'its' changed to 'it's'.	NEHTA	Spelling mistake	27 Mar 2013
38	Example 7.10. [CDA-3175]	PHARMACEUTICAL BENEFITS HISTORY XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>.	NEHTA	Error in closing tag	22 Mar 2013
39	Example 7.11. [CDA-3176]	EXCLUSION STATEMENT XML Fragment :: Code change	Change code	'code="102.16134.172.1.5"' has been changed to 'code="102.16134.172.1.4"'.	NEHTA	Change code to match mapping table	22 Mar 2013
40	Example 7.11. [CDA-3178]	Exclusion Statement XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>.	NEHTA	Error in closing tag	22 Mar 2013
41	Example 7.11. [CDA-3229]	PHARMACEUTICAL BENEFITS HISTORY :: EXCLUSION STATEMENT XML Fragment	Correct the title	'Medicare Services - MBS and DVA Items' changed to 'Prescription Information - PBS and RPBS'.	NEHTA	Incorrect title	27 Mar 2013
42	Example 7.12. [CDA-3179]	Pharmaceutical Benefit Items XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>.	NEHTA	Error in closing tag	22 Mar 2013
43	Example 7.13.	PHARMACEUTICAL BENEFIT ITEMS XML Fragment	Correct an element name	'manufacturedMaterial' has been replaced with 'labeledDrug' in several places in the XML example.	NEHTA	Incorrect element name	27 Mar 2013
44	Example 7.13.	PHARMACEUTICAL BENEFIT ITEMS XML Fragment	Correct the title	'PHARMACEUTICAL BENEFIT ITEMS XML Fragment' has been replaced with 'PHARMACEUTICAL BENEFIT ITEM XML Fragment'.	NEHTA	Incorrect title	27 Mar 2013
45	Example 7.13. [CDA-3181]	Pharmaceutical Benefit Item XML Fragment	Update comment	The XML comment has been changed from <!-- Begin PBS Manufacturer Code --> to: <!-- Begin PBS/RPBS Manufacturer Code -->.	NEHTA	Error in comment	25 Mar 2013
46	Example 7.13. [CDA-3185]	Pharmaceutical Benefit Items XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>.	NEHTA	Error in closing tag	26 Mar 2013
47	Example 7.14. [CDA-3185]	Pharmaceutical Benefit Items Document Provenance (LINK) XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>.	NEHTA	Error in closing tag	26 Mar 2013
48	Example 7.15. [CDA-3192]	Australian Childhood Immunisation Register History XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>.	NEHTA	Error in closing tag	26 Mar 2013

49	Ex-ample 7.16. [CDA-3198]	EXCLUSION STATEMENT XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>.	NEHTA	Error in closing tag	26 Mar 2013
50	Ex-ample 7.17. [CDA-3199]	Australian Childhood Immunisation Register Entries XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>.	NEHTA	Error in closing tag	26 Mar 2013
51	Ex-ample 7.18. [CDA-3216]	Vaccine Administration (MEDICATION ACTION) XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>.	NEHTA	Error in closing tag	26 Mar 2013
52	Ex-ample 7.2. [CDA-3139]	Medicare Overview Exclusion Statement (EXCLUSION STATEMENT) XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>	NEHTA	Error in closing tag	11 Mar 2013
53	Ex-ample 7.20	VACCINE CANCELLATION REASON XML Fragment	Correct a display name	'displayName="Comment"' changed to 'displayName="Clinical Intervention Note"' to coincide with the '15595' data element OID Register name.	NEHTA	Incorrect display name	28 Mar 2013
54	Ex-ample 7.20. [CDA-3216]	Vaccine Cancellation Reason XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>.	NEHTA	Error in closing tag	27 Mar 2013
55	Ex-ample 7.21. [CDA-3233]	Australian Childhood Immunisation Register Entries Document Provenance (LINK) XML Fragment	Correct the 'displayName'	'displayName="Link"' changed to 'displayName="Australian Childhood Immunisation Register Entries Document Provenance"'.	NEHTA	Incorrect 'displayName'	27 Mar 2013
56	Ex-ample 7.21. [CDA-3234]	Australian Childhood Immunisation Register Entries Document Provenance (LINK) XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>.	NEHTA	Error in closing tag	27 Mar 2013
57	Ex-ample 7.22. [CDA-3235]	Australian Organ Donor Register Decision Information XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>.	NEHTA	Error in closing tag	27 Mar 2013
58	Ex-ample 7.23. [CDA-3238]	EXCLUSION STATEMENT XML Fragment :: Tags missing or not properly closed	Update closing tags	Inner <component> changed to </component>. Outer <component> changed to </component>. <section> changed to </section>.	NEHTA	Error in closing tags	27 Mar 2013
59	Ex-ample 7.24. [CDA-3239]	Australian Organ Donor Register Details XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>.	NEHTA	Error in closing tag	27 Mar 2013
60	Ex-ample 7.25. [CDA-3242]	Australian Organ Donor Register Entry XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>.	NEHTA	Error in closing tag	27 Mar 2013

ID	Document Ref		Change Type	Change Detail	Changed Instigated By	Rationale For Change	Date Changed
	Section	Section Name					
61	Example 7.26. [CDA-3244]	Australian Organ Donor Register Details Document Provenance (LINK) XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>.	NEHTA	Error in closing tag	27 Mar 2013
62	Example 7.3. [CDA-3140]	MEDICARE/DVA FUNDED SERVICES HISTORY XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>	NEHTA	Error in closing tag	11 Mar 2013
63	Example 7.3 [CDA-3228]	MEDICARE/DVA FUNDED SERVICES HISTORY :: XML Fragment	Correct two comments	'Begin PHARMACEUTICAL BENEFITS HISTORY' changed to 'Begin MEDICARE/DVA FUNDED SERVICES HISTORY'. 'End PHARMACEUTICAL BENEFITS HISTORY' changed to 'End MEDICARE/DVA FUNDED SERVICES HISTORY'.	NEHTA	Incorrect comments	27 Mar 2013
64	Example 7.4. [CDA-3144]	EXCLUSION STATEMENT XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>	NEHTA	Error in closing tag	11 Mar 2013
65	Example 7.5. [CDA-3145]	MEDICARE/DVA FUNDED SERVICES XML Fragment :: <component> should close with </component>	Update closing tag	Outer <component> changed to </component>	NEHTA	Error in closing tag	11 Mar 2013
66	Examples [CDA-3147]	XML Fragments	Tags closed	In many of the XML Fragments, tags that were not properly closed have been closed.	NEHTA	Tags not closed	21 Mar 2013

This appendix lists the major changes and fixes applied to this CDA Implementation Guide resulting from public feedback and internal testing.

Changes from Version 1.0 (Revision 8) 28 Mar 2013 to Version 1.0 (Revision 9) 05 Apr 2013

ID	Document Ref		Change Type	Change Detail	Changed Instigated By	Rationale For Change	Date Changed
	Section	Section Name					
1	1.2 [CDA-3137]	Medicare Overview Definition :: Incorrect RPBS acronym expansion	RPBS name update	'Repatriation Definition Pharmaceutical Benefits Scheme (RPBS)' changed to 'Repatriation Pharmaceutical Benefits Scheme (RPBS)'.	NEHTA	Incorrect RPBS name	04 Apr 2013
2	10.11 [CDA-3354]	AS 5017-2006 Health Care Client Identifier Date Accuracy Indicator	Grammar corrections	'This data elements that use this value set contains positional fields (DMY)' has been changed to: 'The data elements that use this value set contain positional fields (DMY)'.	NEHTA	Incorrect Grammar	05 Apr 2013
3	5.1 [CDA-3137]	ClinicalDocument :: CDA Mapping :: Incorrect RPBS acronym expansion	RPBS name update	'Repatriation Definition Pharmaceutical Benefits Scheme (RPBS)' changed to 'Repatriation Pharmaceutical Benefits Scheme (RPBS)'.	NEHTA	Incorrect RPBS name	04 Apr 2013
4	6.1 [CDA-3137]	Medicare Overview :: CDA Mapping :: Incorrect RPBS acronym expansion	RPBS name update	'Repatriation Definition Pharmaceutical Benefits Scheme (RPBS)' changed to 'Repatriation Pharmaceutical Benefits Scheme (RPBS)'.	NEHTA	Incorrect RPBS name	04 Apr 2013
5	7.122.1.1 [CDA-3346]	SERVICE REQUESTER :: CDA Mapping :: SERVICE REQUESTER :: Participant	Definition added. Cardinality corrected	Definition has been changed from 'n/a' to 'The clinician or other healthcare specialist who requested that the service be provided'. The cardinality of [1..1] has been changed to [0..1] to match the SCS and the Data Hierarchy in the CDA-IG.	NEHTA	Add definition. Correct the cardinality	05 Apr 2013

ID	Document Ref		Change Type	Change Detail	Changed Instigated By	Rationale For Change	Date Changed
	Section	Section Name					
6	7.1.4.2 [CDA-3348]	AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRIES :: CDA Mapping :: AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRY	Insert missing names	'A run-time choice to be made between a and a ' has been changed to 'A run-time choice to be made between a VACCINE ADMINISTRATION ENTRY and a VACCINE CANCELLATION ENTRY'.	NEHTA	Missing names in Definition	05 Apr 2013
7	7.1 [CDA-3137]	Medicare Overview :: CDA Mapping :: Incorrect RPBS acronym expansion	RPBS name update	'Repatriation Definition Pharmaceutical Benefits Scheme (RPBS)' changed to 'Repatriation Pharmaceutical Benefits Scheme (RPBS)'.	NEHTA	Incorrect RPBS name	04 Apr 2013
8	8.3 [CDA-3141]	time :: Spelling error	Correct spelling error	'timezone' changed to 'time zone'.	NEHTA	Spelling error	04 Apr 2013
9	Copy-right [CDA-3337]	Copyright	Year updated	'Copyright © 2012 National E-Health Transition Authority Ltd. (NEHTA)' has been changed to: 'Copyright © 2013 National E-Health Transition Authority Ltd. (NEHTA)'.	NEHTA	Adjust copyright year	04 Apr 2013
10	Example 7.11. [CDA-3176]	EXCLUSION STATEMENT XML Fragment	XML Example updated	'code="102.16134.172.1.5"' has been changed to 'code="102.16134.172.1.4"' to match the mapping table.	NEHTA	Adjust XML Fragment - align with Mapping Table.	04 Apr 2013
11	Example 7.11. [CDA-3334]	EXCLUSION STATEMENT XML Fragment	XML Example updated	'code="102.16134.172.1.5"' has been changed to 'code="102.16134.172.1.4"' to match the mapping table.	NEHTA	Adjust XML Fragment - align with Mapping Table.	04 Apr 2013
12	Example 7.22. [CDA-3339]	AUSTRALIAN ORGAN DONOR REGISTER DECISION INFORMATION XML Fragment	displayName updated	The XML Fragment has been changed from: 'displayName="Australian Organ Donor Register Information"' to: 'displayName="Australian Organ Donor Register Decision Information"'.	NEHTA	Correct the display name	04 Apr 2013
13	Figure 7.9. [CDA-3350]	Medicare/DVA Funded Services Document Provenance (LINK) (and other instances of LINK)	Diagram corrections	<p>The entry relationship qualifier '0.* clinicalStatement' has been added to the diagram.</p> <p>The code attribute of the Act class cardinality [0..1] has been changed to [1..1].</p> <p>The relationship objects [entry] and [reference] have been renamed in lower-case (to follow object naming conventions instead of class naming conventions).</p> <p>All further instances of CDA R-MIM representations of the LINK data group make use of the same diagram that has now been corrected.</p>	NEHTA	Diagram has issues	05 Apr 2013

This appendix lists the major changes and fixes applied to this CDA Implementation Guide resulting from public feedback and internal testing.

Changes from Version 1.0 (Revision 9) 05 Apr 2013 to Version 1.0 (Revision 10) 08 Apr 2013

ID	Document Ref		Change Type	Change Detail	Changed Instigated By	Rationale For Change	Date Changed
	Section	Section Name					
1	7.122.1.1 [CDA-3213]	Australian CDA Extensions :: Ingredient	Element added to SCS path	'Person > Employer Organisation' has been changed to 'Person > Employment Detail > Employer Organisation' in several rows in the mapping table.	NEHTA	Missing element in SCS path	08 Apr 2013
2	9.11 [CDA-3358]	Australian CDA Extensions :: Ingredient	Section added	9.11 Ingredient added to CDA-IG	NEHTA	Missing section	08 Apr 2013

ID	Document Ref		Change Type	Change Detail	Original Instigated By	Rationale For Change	Date Changed
	Section	Section Name					
3	Reference List [CDA-3213]	Reference List	SCS name changed	'[NEHT2012h] National E-Health Transition Authority, Medicare Information View Structured Content Specification' changed to '[NEHT2012j] National E-Health Transition Authority, Medicare Overview Structured Content Specification'.	NEHTA	Incorrect SCS name	08 Apr 2013

This appendix lists the major changes and fixes applied to this CDA Implementation Guide resulting from public feedback and internal testing.

Changes from Version 1.0 (Revision 10) 08 Apr 2013 to Version 1.0 (Revision 11) 09 Apr 2013

ID	Document Ref		Change Type	Change Detail	Original Instigated By	Rationale For Change	Date Changed
	Section	Section Name					
1	7.122.1.1 [CDA-3359]	SERVICE REQUESTER :: CDA Mapping	Added link to Common Patterns	'participant/participantRole/scopingEntity' now has a link to Common Pattern: 8.8 Employment.	NEHTA	Require link to Common Patterns	09 Apr 2013

This appendix lists the major changes and fixes applied to this CDA Implementation Guide resulting from public feedback and internal testing.

Changes from Version 1.0 (Revision 11) 09 Apr 2013 to Version 1.0 (Revision 12) 18 Apr 2013

ID	Document Ref		Change Type	Change Detail	Original Instigated By	Rationale For Change	Date Changed
	Section	Section Name					
1	7.122.1.1 [CDA-3373]	SERVICE REQUESTER :: CDA Mapping :: Entity Identifier	Reinstated Entity Identifier	The ability to provide a local or national Entity Identifier for a SERVICE REQUESTER - Organisation has been re-instated.	NEHTA	Entity Identifier removed in error	17 Apr 2013
2	7.122.1.1 [CDA-3374]	SERVICE REQUESTER :: CDA Mapping :: scopingEntity	Corrected cardinality	Cardinality has been changed from [0..*] to [0..1].	NEHTA	Incorrect cardinality	17 Apr 2013
3	7.1.2.2.2 [CDA-3376]	Medicare/DVA Funded Services Document Provenance (LINK) :: CDA R-MIM Representation	Added identification of the PCEHR Repository	R-MIM diagram has been replaced with a new diagram showing the additional 'externalAct' class	NEHTA	Missing identification of the PCEHR Repository	17 Apr 2013
4	7.1.2.2.2 [CDA-3376]	Medicare/DVA Funded Services Document Provenance (LINK) :: CDA Mapping :: PCEHR Repository	Added identification of the PCEHR Repository	Extra rows have been added for the identification of the PCEHR Repository.	NEHTA	Missing identification of the PCEHR Repository	17 Apr 2013
5	7.1.3.2.1 [CDA-3372]	PHARMACEUTICAL BENEFIT ITEM :: CDA Mapping :: PBS/RPBS Item Code	Corrected element name	All instances of 'labeledDrug' have been changed to 'manufacturedLabeledDrug' in the mapping table.	NEHTA	Incorrect element name	17 Apr 2013
6	7.1.3.2.2 [CDA-3376]	Pharmaceutical Benefit Items Document Provenance (LINK) :: CDA R-MIM Representation	Added identification of the PCEHR Repository	R-MIM diagram has been replaced with a new diagram showing the additional 'externalAct' class	NEHTA	Missing identification of the PCEHR Repository	17 Apr 2013
7	7.1.3.2.2 [CDA-3376]	Pharmaceutical Benefit Items Document Provenance (LINK) :: CDA Mapping :: PCEHR Repository	Added identification of the PCEHR Repository	Extra rows have been added for the identification of the PCEHR Repository.	NEHTA	Missing identification of the PCEHR Repository	17 Apr 2013
8	7.1.4.2.2 [CDA-3376]	Australian Childhood Immunisation Register Entries Document Provenance (LINK) :: CDA R-MIM Representation	Added identification of the PCEHR Repository	R-MIM diagram has been replaced with a new diagram showing the additional 'externalAct' class	NEHTA	Missing identification of the PCEHR Repository	17 Apr 2013

ID	Document Ref		Change Type	Change Detail	Changed Instigated By	Rationale For Change	Date Changed

25	7142121 [CDA-3944]	Vaccine Cancellation (MEDICATION ACTION) :: CDA Mapping	Added missing Context	Corrected "Context: ...section" to "Context: ...section/".	NEHTA	Context missing forward slash	05 August 2013
26	7.1.4 [CDA-3970]	AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER HISTORY :: CDA Mapping	Updated to match SCS change	Updated Comments to match SCS change.	NEHTA	Update to match SCS change	02 August 2013
27	7.1.5.2 [CDA-3945]	AUSTRALIAN ORGAN DONOR REGISTER DETAILS :: CDA Mapping	Added missing Context	Corrected "Context: ...section" to "Context: ...section/".	NEHTA	Context missing forward slash	05 August 2013
28	7.1.5.2 [CDA-3946]	AUSTRALIAN ORGAN DONOR REGISTER ENTRY :: CDA Mapping	Added missing Context	Corrected "Context: ...section" to "Context: ...section/".	NEHTA	Context missing forward slash	05 August 2013
29	7.1.5 [CDA-3971]	AUSTRALIAN ORGAN DONOR REGISTER DECISION INFORMATION :: CDA Mapping	Updated to match SCS change	Updated Data Component Definition and Comments to match SCS change.	NEHTA	Update to match SCS change	02 August 2013
30	Example 4.1	Example 4.1. Administrative Observations	Cleaned up XML Fragments	Fixed indenting, comments and spacing.	NEHTA	Clean up XML Fragments	05 August 2013
31	Example 6.1 [CDA-3958]	Example 6.1. Medicare Overview Context :: CDA Mapping	Add missing data components	Added "Earliest Date for Filtering (DateTime Health Event Started)" and "Latest Date for Filtering (DateTime Health Event Ended)" to the instance file and the example.	NEHTA	Missing two data components	05 August 2013
32	Example 6.1 [CDA-3958]	Example 6.1. Medicare Overview Context :: CDA Mapping	Add missing data components	Added "Earliest Date for Filtering (DateTime Health Event Started)" and "Latest Date for Filtering (DateTime Health Event Ended)" to the instance file and the example.	NEHTA	Missing two data components	05 August 2013
33	Example 6.3	Example 6.3. Subject of Care	Corrected Indigenous Status codeSystem	Corrected Indigenous Status codeSystem from "2.16.840.1.113883.3.879" to "2.16.840.1.113883.3.879.291036" in the instance file and example.	NEHTA	Incomplete Indigenous Status codeSystem	05 August 2013
34	Example 7.11 [CDA-3952]	Example 7.11 EXCLUSION STATEMENT	Corrected example title	Corrected "7.11 XML Fragment" to "7.11 EXCLUSION STATEMENT XML Fragment".	NEHTA	Incomplete example title	02 August 2013
35	Example 7.14 [CDA-3965]	Example 7.14. Pharmaceutical Benefit Item Document Link (LINK) XML Fragment	Corrected mapping	Updated the instance file and example with the change in mapping of LINK from ...entry/encounter/entry/act/ to ...entry/encounter/reference/.	NEHTA	Incorrect mapping entry/encounter/entry/act	06 August 2013
36	Example 7.17 [CDA-3962]	Example 7.17 Australian Childhood Immunisation Register Entries	Corrected OID	Corrected section OID in instance file and example from "101.16670" to "101.16658".	NEHTA	Incorrect OID	02 August 2013
37	Example 7.18 [CDA-3966]	Figure 7.18. Vaccine Administration (MEDICATION ACTION) XML Fragment	Corrected class name	Replaced the image in Figure 7.18 with the image from Figure 7.19.	NEHTA	incorrect class name	06 August 2013
38	Example 7.9 [CDA-3949]	Example 7.9. Medicare/DVA Funded Service Document Link (LINK) XML Fragment	Corrected mapping	Updated the instance file and example with the change in mapping of LINK from ...entry/encounter/entry/act/ to ...entry/encounter/reference/.	NEHTA	Incorrect mapping entry/encounter/entry/act	06 August 2013

39	Example 8.12 [CDA-3948]	Example 8.12 Employment	Updated example	Fixed spacing and changed HPI-O from "1.2.36.1.2001.1003.0.8003621231167899" to "1.2.36.1.2001.1003.0.8003621566684455".	NEHTA	Update example	02 August 2013
40	Example 8.2 [CDA-3947]	Example 8.2 id	Changed HPI-O in example	HPI root changed from "1.2.36.1.2001.1003.0.8003621234567890" to "1.2.36.1.2001.1003.0.8003621566684455".	NEHTA	Change HPI-O in example	02 August 2013

Changes from Version 1.1 (Revision 02) 06 August 2013 to Version 1.1 (Revision 03) 13 August 2013

ID	Document Ref		Change Type	Change Detail	Changed Instigated By	Rationale For Change	Date Changed
	Section	Section Name					
1	1	Introduction	Made use of quotation marks consistent	All instances of non-code related quotation marks are now single quotation marks.	NEHTA	Adopt consistent use of quote marks	09 August 2013
2	7.1.2	MEDICARE/DVA FUNDED SERVICES HISTORY :: CDA R-MIM Representation	Corrected mapping statement	Corrected the mapping statement from "section is mapped to a CDA Section class" to "section is composed of a Section class related to its context ClinicalDocument.structuredBody through a component relationship".	NEHTA	Incorrect mapping statement	09 August 2013
3	7.1.2.2	MEDICARE/DVA FUNDED SERVICES :: CDA R-MIM Representation	Corrected mapping statement	Corrected mapping statement from "The Medicare/DVA Funded Services data group is mapped to an Encounter" to "The MEDICARE/DVA FUNDED SERVICES section is mapped to a CDA Section".	NEHTA	incorrect mapping statement	09 August 2013
4	7.1.2.2.1	MEDICARE/DVA FUNDED SERVICES :: CDA R-MIM Representation	Corrected mapping statement	Corrected mapping statement from "The MEDICARE/DVA FUNDED SERVICE section is mapped to a CDA Section" to "The MEDICARE/DVA FUNDED SERVICE data group is mapped to an Encounter".	NEHTA	Incorrect mapping statement	09 August 2013
5	7.122.1	SERVICE REQUESTER :: CDA R-MIM Representation	Corrected presentation of name	Corrected presentation of name from "Service Requester data group" to "SERVICE REQUESTER data group".	NEHTA	Incorrect presentation of name	09 August 2013
6	7.122.1	SERVICE REQUESTER :: CDA Mapping :: n/a	Corrected spelling	Corrected "publically" to "publicly".	NEHTA	Spelling	09 August 2013
7	7.122.12	SERVICE PROVIDER :: CDA Mapping :: n/a	Corrected spelling	Corrected "publically" to "publicly".	NEHTA	Spelling	09 August 2013
8	7.122.13	Medicare/DVA Funded Service Document Link (LINK) :: CDA Mapping :: Target Document	Corrected spelling	Corrected "tempalteld" to "templateId".	NEHTA	Spelling	09 August 2013
9	7.1.3	PHARMACEUTICAL BENEFITS HISTORY :: CDA R-MIM Representation	Corrected mapping statement	Corrected the mapping statement from "section is mapped to a CDA Section class" to "section is composed of a Section class related to its context ClinicalDocument.structuredBody through a component relationship".	NEHTA	Incorrect mapping statement	09 August 2013
10	7.1.3.2.1	PHARMACEUTICAL BENEFIT ITEM :: CDA R-MIM Representation	Corrected presentation of name	Corrected three instances of the presentation of the name from "Pharmaceutical Benefit Item" to "PHARMACEUTICAL BENEFIT ITEM".	NEHTA	Incorrect presentation of name	09 August 2013
11	7.1.3.2.1	PHARMACEUTICAL BENEFIT ITEM :: CDA Mapping :: Date of Prescribing	Corrected spelling	Corrected "classcode" to "classCode".	NEHTA	Spelling	09 August 2013
12	7.1.3.2.1	Pharmaceutical Benefit Item Document Link (LINK) :: CDA Mapping :: Target Document	Corrected spelling	Corrected "tempalteld" to "templateId".	NEHTA	Spelling	09 August 2013
13	7.1421.1 [CDA-4006]	Vaccine Administration (MEDICATION ACTION) :: CDA Mapping :: Vaccine Type (Therapeutic Good Identification)	Reduced Vocab	Removed from the Vocab column the standard list of 7 AMT Reference Sets that are generically applicable leaving only the single applicable reference set for this context.	NEHTA	Vocab not specific enough	13 August 2013
14	7.1421.2	Vaccine Cancellation (MEDICATION ACTION) :: CDA Mapping :: Medicare Antigen Code (Reason for Action)	Updated to match SCS	Data Component Definition updated to match SCS change.	NEHTA	Update to match SCS	13 August 2013

ID	Document Ref		Change Type	Change Detail	Original Instigated By	Rationale For Change	Date Changed
	Section	Section Name					
15	7.142121 [CDA-3997]	Vaccine Cancellation (MEDICATION ACTION) :: CDA Mapping :: Vaccine Dose Number (Sequence Number)	Updated to match SCS	Updated Vaccine Dose Number (Sequence Number) in Vaccine Cancellation to match the SCS "The dose number of the scheduled administration of the vaccine, which was cancelled."	NEHTA	Update to match SCS	08 August 2013
16	7.142121 [CDA-4006]	Vaccine Cancellation (MEDICATION ACTION) :: CDA Mapping :: Medicare Antigen Code (Reason for Action)	Reduced Vocab	Removed from the Vocab column the standard list of 7 AMT Reference Sets that are generically applicable leaving only the single applicable reference set for this context.	NEHTA	Vocab not specific enough	13 August 2013
17	7.142121 [CDA-4006]	Vaccine Cancellation (MEDICATION ACTION) :: CDA Mapping :: Vaccine Type (Therapeutic Good Identification)	Reduced Vocab	Removed from the Vocab column the standard list of 7 AMT Reference Sets that are generically applicable leaving only the single applicable reference set for this context.	NEHTA	Vocab not specific enough	13 August 2013
18	7.142122 [CDA-3998]	VACCINE CANCELLATION REASON :: CDA Mapping :: Period (Vaccine Cancellation Reason Period)	Fixed Data Component Definition typo	Corrected "Typedata element" to "Type data element" in the Data Component Definition.	NEHTA	Data Component Definition typo	08 August 2013
19	7.1.4.2.2	Australian Childhood Immunisation Register Entries Document Link (LINK) :: CDA Mapping :: Target Document	Corrected spelling	Corrected "tempalteld" to "templated".	NEHTA	Spelling	09 August 2013
20	7.1.4.2.2	Australian Childhood Immunisation Register Entries Document Link (LINK) :: CDA Mapping	Corrected spelling	Corrected "codesystem" to "codeSystem".	NEHTA	Spelling	13 August 2013
21	7.1.4.2 [CDA-3995]	AUSTRALIAN CHILDHOOD IMMUNISATION REGISTER ENTRIES :: CDA Mapping	Fixed Data Component Definition typo	Removed erroneous second full stop from the end of the Data Component Definition.	NEHTA	Data Component Definition typo	08 August 2013
22	7.1.5	AUSTRALIAN ORGAN DONOR REGISTER DECISION INFORMATION :: CDA R-MIM Representation	Corrected mapping statement	Corrected the mapping statement from "section is mapped to a CDA Section class" to "section is composed of a Section class related to its context ClinicalDocument.structuredBody through a component relationship".	NEHTA	Incorrect mapping statement	09 August 2013
23	7.1.5.1 [CDA-3992]	EXCLUSION STATEMENT :: CDA Mapping	Completed to the code	Corrected the code from ".172.1.2" to "102.16134.172.1.1".	NEHTA	Incomplete code	07 August 2013
24	7.1.5.1 [CDA-4008]	EXCLUSION STATEMENT :: Relationships	Corrected Occurrences	Corrected missing occurrence to "0..1".	NEHTA	Occurrences missing	13 August 2013
25	7.1.5.2	AUSTRALIAN ORGAN DONOR REGISTER DETAILS :: CDA R-MIM Representation	Corrected mapping statement	Corrected the mapping statement from "Australian Organ Donor Register Details section is composed of a Section class related to its context ClinicalDocument.structuredBody through a component relationship" to "AUSTRALIAN ORGAN DONOR REGISTER DETAILS section is mapped to a CDA Section class".	NEHTA	Incorrect mapping statement	09 August 2013
26	7.1.5.2.1	AUSTRALIAN ORGAN DONOR REGISTER ENTRY :: CDA R-MIM Representation	Corrected presentation of name	Corrected three instances of the presentation of the name from "Australian Organ Donor Register Entry" to "AUSTRALIAN ORGAN DONOR REGISTER ENTRY".	NEHTA	Incorrect presentation of name	09 August 2013
27	7.1.5.2.2	Australian Organ Donor Register Details Document Link (LINK) :: CDA Mapping :: Target Document	Corrected spelling	Corrected "tempalteld" to "templated".	NEHTA	Spelling	09 August 2013
28	7.1.5.2.2	Australian Organ Donor Register Details Document Link (LINK) :: CDA Mapping	Corrected spelling	Corrected "codesystem" to "codeSystem".	NEHTA	Spelling	13 August 2013
29	Example 5.1 [CDA-3984]	Example 5.1. ClinicalDocument Body XML Fragment	Updated the templated	Updated templated from "1.0" to "1.1" in the instance and example.	NEHTA	Outdated templated	07 August 2013
30	Example 7.16 [CDA-4005]	Example 7.16. EXCLUSION STATEMENT XML Fragment	Corrected spelling	Corrected "Entties" to "Entries" and added a space to the comment "End EXCLUSION STATEMENT - General Statement".	NEHTA	Spelling	13 August 2013

Changes from Version 1.1 (Revision 03) 13 August 2013 to Version 1.1 (Revision 04) 20 August 2013

ID	Document Ref		Change Type	Change Detail	Organi- Instigated By	Rationale For Change	Date Changed
	Section	Section Name					
1	7.1.3.2.1 [CDA-4028]	PHARMACEUTICAL BENEFIT ITEM :: CDA R-MIM Representation	Corrected mapping statement	Corrected "A component observation is used for Item Form and Strength while" to "Item Form and Strength is represented as an observation and ...".	NEHTA	Misleading mapping statement	20 August 2013
2	7.142122 [CDA-3990]	VACCINE CANCELLATION REASON :: CDA Mapping	Replaced missing code mapping statements	Replaced the missing code mapping statements for VACCINE CANCELLATION REASON.	NEHTA	Missing mapping statement	20 August 2013
3	7.142122 [CDA-4011]	VACCINE CANCELLATION REASON :: CDA Mapping :: Type (Vaccine Cancellation Reason Type)	Corrected mapping statement	Corrected "entryRelationship[reason_type]typeCode" to "entryRelationship[reason_type]/@typeCode".	NEHTA	Missing symbols in mapping statement	20 August 2013
4	Example 7.20 [CDA-4020]	Example 7.20. VACCINE CANCELLATION REASON XML Fragment	Corrected presentation of code and text block	Corrected the code line for the Vaccine Cancellation Reason Act and corrected presentation of the comment text block in both the instance file and the example fragment.	NEHTA	Correct code and presentation of text block	20 August 2013
5	Figure 6.1 [CDA-4014]	Figure 6.1. CDA Header Model for Medicare Overview Context	Corrected inconsistencies	The ClinicalDocument class is now a shadow class to avoid inconsistencies and "true" has been added to the entryRelationship.	NEHTA	Correct inconsistencies	20 August 2013
6	Figure 7.12 [CDA-4026]	Figure 7.12. PHARMACEUTICAL BENEFIT ITEMS	Added missing data type	Added data type to ContextConductionInd for the two component relationships.	NEHTA	Missing data type	20 August 2013
7	Figure 7.14 [CDA-4029]	Figure 7.14. Pharmaceutical Benefit Item Document Link (LINK)	Added missing data type	Added the data type for contextConductionInd for the two relationships, added the relationship statement to the entry relationship, and added the relationship statement to reference relationship.	NEHTA	Missing data type	20 August 2013
8	Figure 7.21 [CDA-4023]	Figure 7.21. Australian Childhood Immunisation Register Entries Document Link (LINK)	Added missing data type	Added missing data types for the component and entry relationships and corrected the code cardinality.	NEHTA	Missing data type	20 August 2013
9	Figure 7.26 [CDA-4023]	Figure 7.26. Australian Organ Donor Register Details Document Link (LINK)	Added missing data type	Added missing data types for the component and entry relationships and corrected the code cardinality.	NEHTA	Missing data type	20 August 2013
10	Figure 7.6 [CDA-4020]	Figure 7.6. MEDICARE/DVA FUNDED SERVICE	Added missing data types and cardinality	Added the missing data type and value for contextConductionInd for all relationships, added the data type and cardinality for inversionInd, and added the missing relationship statement for the entry relationship.	NEHTA	Missing data types and cardinality	20 August 2013
11	Figure 7.9 [CDA-4024]	Figure 7.9. Medicare/DVA Funded Service Document Link (LINK)	Added missing data type	Added the data type for contextConductionInd for the two relationships, added the relationship statement to the entry relationship, and added the relationship statement to reference relationship.	NEHTA	Missing data type	20 August 2013

Changes from Version 1.1 (Revision 04) 20 August 2013 to Version 1.1 (Revision 05) 21 August 2013

ID	Document Ref		Change Type	Change Detail	Organi- Instigated By	Rationale For Change	Date Changed
	Section	Section Name					
1	7.1.2.2.1	MEDICARE/DVA FUNDED SERVICE :: CDA Mapping :: Service In Hospital Indicator	Corrected mapping statement	Corrected "observation@classCode="OBS"" to "observation/@classCode="OBS"" and corrected "observation@moodCode="EVN"" to "observation/@moodCode="EVN"".	NEHTA	Missing symbols in mapping statement	21 August 2013
2	7.122.13	Medicare/DVA Funded Service Document Link (LINK) :: CDA Mapping :: Document (Link Target)	Corrected mapping statement	Corrected "externalAct/code/@codeSystemName" to "externalAct/code/@codeSystemName" and corrected "externalAct/code/@displayName" to "externalAct/code/@displayName".	NEHTA	Missing symbols in mapping statement	21 August 2013
