# 1 Introduction

This document is a Structured Document Template (SDT) for prescription requests. It specifies the information structure of NEHTA-compliant prescription requests in order to support the Electronic Transfer of Prescription (ETP).

Essential information about structured document templates can be found in [NEHTA Data Specifications and Structured Document Templates - Guide for Use \[NEHT2010d\]](#).

NEHTA values your questions and comments about this document. Please direct your questions or feedback to [medication.management@nehta.gov.au](mailto:medication.management@nehta.gov.au).

## 1.1 Document Purpose

This document describes the structured document template for a *prescription request* from a clinical communication perspective.

The content within this document provides reviewers (software development teams, architects, designers, clinicians and informatics researchers) with the necessary information (or references to information held outside this document) to evaluate and assess the clinical suitability of NEHTA-endorsed specifications for the electronic transfer of prescriptions.

It is part of the foundation for any implementation of a NEHTA-compliant ETP system.

It is also a key input to the [NEHTA Prescription Request v1.1 CDA Implementation Guide \[NEHT2010n\]](#), which describes how to implement NEHTA-compliant electronic prescriptions using the [HL7 Clinical Document Architecture \[HL7CDAR2\]](#).

## 1.2 Intended Audience

This document is aimed at software development teams, architects, designers, clinicians and informatics researchers who are responsible for the delivery of clinical applications, infrastructure components and messaging interfaces and also for those who wish to evaluate the clinical suitability of NEHTA-endorsed specifications.

## 1.3 Overview

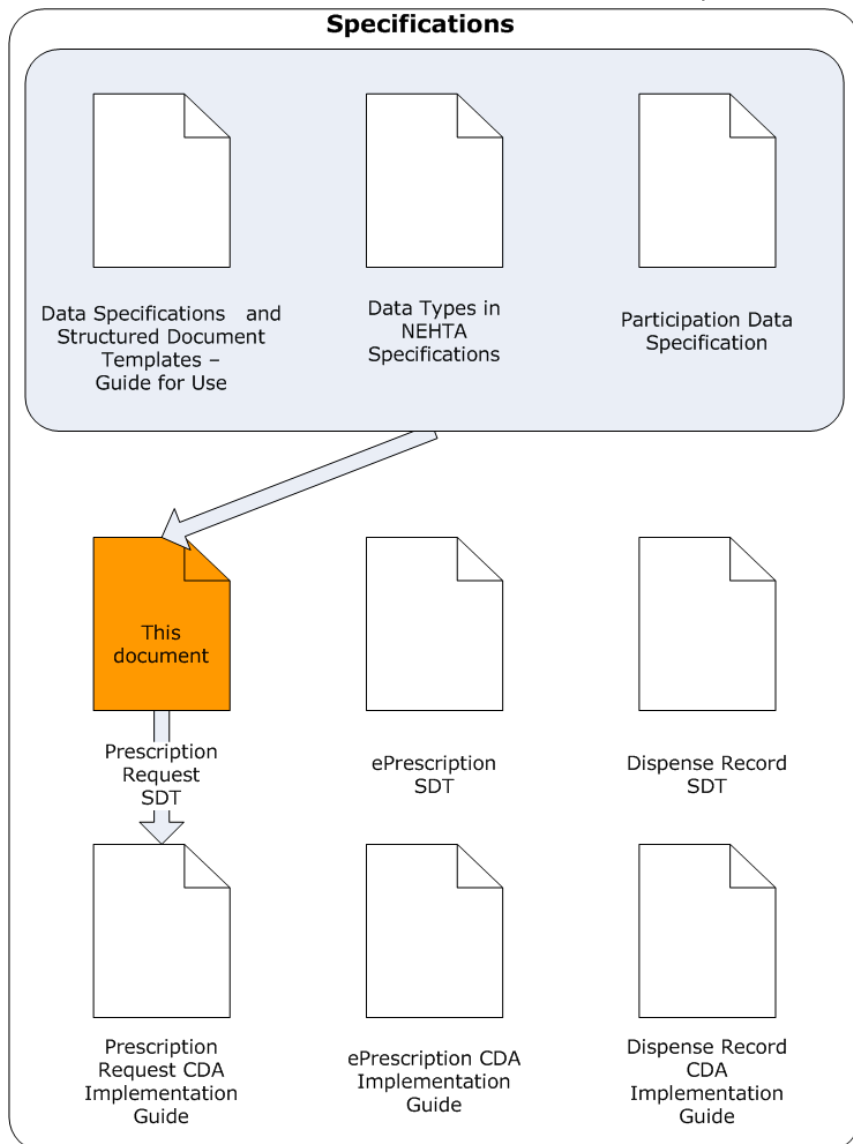

The overall process of prescribing and dispensing is described in [ETP Release 1.1 Concept of Operations \[NEHT2010p\]](#).

The processes behind prescription requests are:

1. A prescriber issues a *prescriber instruction* to a dispenser, this instructs the dispenser to dispense a therapeutic good to a subject of care before a formal prescription has been supplied to the dispenser.
2. The dispenser sends the prescriber a *prescription request* to request an *electronic prescription* to match the *prescriber instruction*.
3. The prescriber creates an *electronic prescription* which is made available to the dispenser.

# 1.4 Document Map

This document is not intended to be used in isolation. Companion documents are listed below:

1. [NEHTA Data Specifications and Structured Document Templates - Guide for Use \[NEHT2010d\]](#).
2. [NEHTA Data Types in NEHTA Specifications: A Profile of the ISO 21090 Specification \[NEHT2010c\]](#).
3. [NEHTA Participation Data Specification \[NEHT2010i\]](#).
4. [NEHTA ePrescription Structured Document Template \[NEHT2010r\]](#).
5. [NEHTA Dispense Record Structured Document Template \[NEHT2010t\]](#).

8. [NEHTA Dispense Record v3.1 CDA Implementation Guide \[NEHT2010o\]](#).

## 1.5 Document Scope

This document specifies the essential clinical data groups and elements to be captured in an electronic prescription exchange and the constraints that should be applied. Its scope is aligned to ETP Release 1.1, which will support prescriptions that are generated by medical practitioners and dispensed by pharmacists.

The types of prescriptions are:

- PBS/RPBS prescriptions;
- PBS/RPBS authority prescriptions; and
- non-PBS prescriptions (private prescriptions).

This is not a guide to implementing any specific messaging standard.

## 1.6 Known Issues

Known issues with this document are described in [E: \*Known Issues\*](#).

<b>Scope</b>	This data group is used to provide details of dose instructions for medication dispensing and administration.
<b>Scope Source</b>	NEHTA
<b>Notes</b>	<p>The dosage data group in this release of the SDT is designed to support simple dosage instructions. Clinical input is being sought to modify the data group in order to support more complex dosing instructions such as variable and alternate dosing and multi-component medicines. This is an evolving process and will be supported by the development of an implementation guide outlining how the dosage data group is to be implemented.</p> <p>In the meantime, implementers may wish to examine the <a href="#">NHS Dose Syntax Model [NHS2009a]</a>. That model, while different to this data group, provides many similarities.</p>

# 7 UML Class Diagram

The following figure presents the data hierarchy using a UML 2.0 class diagram. The diagram displays data groups and data elements, together with their names, data types and multiplicities. Data groups are displayed as classes and data elements are displayed as attributes. The diagram shows the data hierarchy excluding the details of participation. The default multiplicity is 1..1.

# Appendix A. Participations

This appendix details the participation data groups used in the Prescription Request SDT. Each participation data group is described with a data hierarchy and a list of value constraints. The data hierarchies have been constrained from the general participation data hierarchy, which is described in [Participation Data Specification \[NEHT2010j\]](#). The format of the data hierarchy tables is also explained in [Data Specifications and Structured Document Templates - Guide for Use \[NEHT2010d\]](#). The value constraints have the same form as those in the body of the SDT.

## A.1 Subject of Care

This is a reuse of the PARTICIPATION data group, which is described in [Participation Data Specification \[NEHT2010j\]](#).

The following data hierarchy is the result of constraining that data group for Subject of Care. Constraints on data values are listed after the data hierarchy.

### Constraints on data values

- Participation Type **MUST** have an implementation specific fixed value meaning “Subject”.
- The value of Entity Identifier **MUST** be an Australian IHI.
- ADDRESS **MUST** have an Address Purpose value of “Residential” or “Temporary Accommodation”.
- Entitlement Type **MUST** have a value from [Subject of Care Entitlement Type Values](#).

### Notes

- The value of Participation Type may be explicit, e.g. recordTarget.typeCode = 'RCT' (Record Target) in HL7 CDA R2, but it may also be implicit in the record structure, e.g. PID segment in HL7 V2. For further information, please see the Participation Type definition in [Participation Data Specification \[NEHT2010j\]](#).
- The value of Role will be an implementation specific value with a meaning of “Patient”, “Client” or similar.
- The subject of care's Medicare card number is recorded in ENTITLEMENT, not Entity Identifier.

# Appendix B. Participations

This appendix details the participation data groups used in the Prescription Request SDT. Each participation data group is described with a data hierarchy and a list of value constraints. The data hierarchies have been constrained from the general participation data hierarchy, which is described in [Participation Data Specification \[NEHT2010j\]](#). The format of the data hierarchy tables is also explained in [Data Specifications and Structured Document Templates - Guide for Use \[NEHT2010d\]](#). The value constraints have the same form as those in the body of the SDT.

## B.1 Dispenser

This is a reuse of the PARTICIPATION data group, which is described in [Participation Data Specification \[NEHT2010j\]](#).

The following data hierarchy is the result of constraining that data group for Dispenser. Constraints on data values are listed after the data hierarchy.

**Constraints on data values**

- Participation Type **MUST** have an implementation specific fixed value meaning “Dispenser”.
- The value of Entity Identifier **MUST** be an Australian HPI-I.

**Notes**

- The value of Participation Type may be explicit, e.g. author.typeCode = 'AUT' (Author) in HL7 CDA R2, but it may also be implicit in the record structure, e.g. some HL7 V2 segments. For further information, please see the Participation Type definition in [Participation Data Specification \[NEHT2010j\]](#).
- The value of Role will be an implementation specific value with a meaning of “Pharmacist” or a similar occupation.

## B.2 Dispensing Organisation

This is a reuse of the PARTICIPATION data group, which is described in [Participation Data Specification \[NEHT2010\]](#).

The following data hierarchy is the result of constraining that data group for Dispensing Organisation. Constraints on data values are listed after the data hierarchy.

### Constraints on data values

- Participation Type **MUST** have an implementation specific fixed value meaning “Dispensary”.
- The value of Entity Identifier **MUST** be an Australian HPI-O.
- ADDRESS **MUST** have an Address Purpose value of “Business”.
- If the value of [Medical Benefit Category Type](#) is “1” ( PBS), “2” ( RPBS) or “3” ( CTG), exactly one ENTITLEMENT **MUST** have an Entitlement Type with the value “10” (Medicare Prescriber Number).

### Notes

- The value of Participation Type may be explicit, e.g. author.typeCode = 'AUT' (Author) in HL7 CDA R2, but it may also be implicit in the record structure, e.g. some HL7 V2 segments. For further information, please see the Participation Type definition in [Participation Data Specification \[NEHT2010i\]](#).
- The value of Role will be an implementation specific value with a meaning of “Pharmacy” or similar.

# Appendix C. Participations

## Appendix D. Log of Changes

These are the main changes since Prescription Request SDT Version 1.0.

Issue ID	Requested Change/Feedback	Location/Change Made
CIM-609	The dispensing information data group is poorly defined.	The data group DISPENSING INFORMATION has been removed, but all of its data elements have been retained.
CIM-613	Add the matrix mapping from the information requirements to the SDT.	The appendix <a href="#">F: Mappings from requirements</a> has been added.
CIM-616	<ul style="list-style-type: none"> <li>• Appendices B1 and C1 do not match the body of the SDT.</li> <li>• Standardise the presentation of known issues and changes.</li> </ul>	<ul style="list-style-type: none"> <li>• Altered the appendix entries for the Dispenser and Prescriber data hierarchies to match the body of the SDT.</li> <li>• The appendices <a href="#">E: Known Issues</a> and <a href="#">D: Log of Changes</a> have been added.</li> </ul>
CIM-619	Add support for closing the gap eligibility.	The data element PBS/RPBS Benefit Category Type was renamed to Medical Benefit Category Type. There were associated changes to its definition and the addition of an extra value.

## Appendix E. Known Issues

This appendix lists known issues with this specification at the time of publishing. NEHTA are working on solutions to these issues, but we encourage and invite comments to further assist the development of these solutions.

Reference	Description
DOSAGE	The <b>DOSAGE</b> data group in this release of the SDT does not support the clinical coding of dosage instructions. Clinical input is being sought to develop a clinical coding model for dosing instructions that supports both simple and complex dosing instructions such as variable and alternate dosing and multi-component medicines.
The word <b>MUST</b> in Conditions of Use	In conformance statements this document uses the term <b>MUST</b> in place of NEHTA's preferred term <b>SHALL</b> .
Participation Type and Role	The data elements Participation Type and Role (used in the in the Participation data groups SUBJECT OF CARE, DISPENSER, DISPENSING ORGANISATION, PRESCRIBER, PRESCRIBER ORGANISATION and PRESCRIBER INSTRUCTION RECIPIENT) do not have defined value domains.
Prescriber Instruction Source	The data element Prescriber Instruction Source does not have a defined value domain.
Value domains	<p>The following data elements have value domains which have not yet been published:</p> <ul style="list-style-type: none"> <li>• Medical Benefit Category Type, and</li> <li>• Prescriber Instruction Communication Medium</li> <li>• Entitlement Type (used in the in the Participation data groups SUBJECT OF CARE, DISPENSING ORGANISATION, PRESCRIBER and PRESCRIBER INSTRUCTION RECIPIENT)</li> </ul> <p>It is expected that the list of values in this document will be released as part of SNOMED CT<sup>®</sup>-AU<sup>1</sup> with no additions or omissions.</p>
