

Health Record Overview v1.0

Release Note

31 December 2014

Approved for external information

Summary

EP-1949:2014

The Health Record Overview provides a summary of an individual's PCEHR and is intended to serve as the "home screen" displayed when an individual's record is first opened. The Health Record Overview can now be downloaded to clinical information systems for display in whole or part and is an enhancement to the PCEHR.

Release rationale

The PCEHR System Operator has made the Health Record Overview available as a downloadable document to clinical information systems.

Package inclusions

Identifier	Name and version
NEHTA-1993:2014	Health Record Overview Release Note v1.0 (this document)
NEHTA-1950:2014	Health Record Overview Information Requirements v1.0
NEHTA-1951:2014	Health Record Overview Presentation and Data Usage Guide v1.0
NEHTA- 1975:2014	Health Record Overview PCEHR Conformance Profile v1.0
NEHTA-1976:2014	Observation View PCEHR Conformance Profile v1.0
NEHTA -1977:2014	Health Check Schedule View PCEHR Conformance Profile v1.0

Scope

The four key components of the Health Record Overview are:

- **New Documents:** this contains a listing of documents that have been uploaded to the PCEHR for the current patient since the last shared health summary was uploaded to the PCEHR. It will list shared health summaries, event summaries, discharge summaries, e-referral, specialist letters and personal health summaries.
- **Recent Documents:** this contains a listing of documents that have been uploaded to the PCEHR for the current patient within the last 12 months. It will list shared health summaries, event summaries, discharge summaries, e-referral, specialist letters and personal health summaries.
- **Shared Health Summary:** this is an existing specification for the PCEHR and contains information such as current and past medical history, medications, allergies and adverse reactions and immunisations.

- **Links to Other Documents:** provides links to views and other records available in the current patient's PCEHR; for example, advance care planning documents and prescription and dispense records.

NEHTA's Clinical Usability Programme has recommended that the relevant components of the Health Record Overview be incorporated into clinical system software as opposed to rendering the entire document. The release documentation supports this capability.

To support implementation of the Health Record Overview in a clinical information system, the Health Check Schedule View and the Observation View conformance profiles have been included as part of this release.

Stakeholders

The following stakeholders have been involved in the development of this release:

- Commonwealth Department of Health
- National Infrastructure Operator
- NT Health
- Other external stakeholders as determined by Commonwealth Department of Health

Audience

- Hospitals and health departments planning, implementing or upgrading eHealth systems
- Software vendors, software developers and designers developing eHealth system products
- General practitioner desktop software vendors
- Jurisdictions, health service providers and health software representative groups
- Senior managers and policy makers, clinical experts, health information managers and system integrators
- Stakeholders associated with the development and use of upcoming eHealth initiatives relating to the Health Record Overview

Support
