

Common – Clinical Document Release Note

16 June 2017 v1.4.4
Approved for external information
Document ID: DH-2396:2017

Release rationale

This incremental release of the Common - Clinical Document end product (EP-2395:2017) introduces the new *Conformance Test Specification for Authoring Systems* and provides updates to *Clinical Documents – My Health Record Usability Recommendations*.

Clinical Documents – Conformance Test Specification for Authoring Systems v1.0

This conformance test specification is a significant expansion of the authoring test cases previously available to developers in the *Conformance Test Specification for CDA Rendering v1.3*, which contained test cases for authoring and rendering. This v1.3 document has been superseded by the *Conformance Test Specification for CDA Rendering v1.4* (published in January 2016) and this new *Conformance Test Specification for Authoring Systems v1.0*.

The rationale for the expansion of test cases is an analysis of over 600 conformance errors found by the NEHTA CCA team between 2012 and 2015, which covered approximately 50 software development organisations. This new conformance test specification seeks to address those issues.

Clinical Documents – My Health Record Usability Recommendations v1.4

This document provides usability recommendations for clinical information systems authoring or rendering information contained in clinical documents and views exchanged with the My Health Record system.

NEHTA-1328:2013	<i>Clinical Documents - Supplementary Notes for Implementers Relating to Clinical Document Presentation v1.0</i>

Summary of changes**Conformance Test Specification for Authoring Systems**

Version 1.0 of the *Conformance Test Specification for Authoring Systems* is a requirements-based testing resource to help ensure that conformance requirements have been addressed and to determine whether the test item meets those conformance requirements.

The worksheets are structured as feature sets of conformance requirements identified for a specific purpose, and have been organised as follows:

- FS-Doc (Clinical Documents);
- FS-Narr (Narratives);
- FS-Types (Data types and data groups);
- FS-Auth (Authoring systems).

¹ Clarification: PCEHR means the My Health Record, formerly the "Personally Controlled Electronic Health Record", within the meaning of the *My Health Records Act 2012* (Cth), formerly called the *Personally Controlled Electronic Health Records Act 2012* (Cth).

Additional worksheets are included for background information, automatic calculation of test results, traceability, and related documents and references.

This version excludes test scenarios due to constraints of scope and time in the development and review processes. These scenarios are planned to be included in a future version.

The audiences for the *Conformance Test Specification for Authoring Systems* are:

- Developers and testers of healthcare software that creates clinical documents; and
- Testers who do not have healthcare software but do have a set of clinical documents created by other software systems. The main examples of these are the Department of Health, and software developers who have chosen to test the conformance of clinical documents their software receives either directly from other healthcare software or from the My Health Record system.

Clinical Documents – My Health Record Usability Recommendations

Updates to version 1.4 include:

- A new section with recommendations on assisted data import; and
- Miscellaneous additional recommendations and amendments for additional clarification and usability in existing areas.

New recommendations will have a status of 'NEW in v1.4' (CLD.141 to CLD.195) while amended recommendations will have a status of 'Revised for v1.4'. Additional clarifications and corrections are considered not to have any potential impact on clinical information system behaviour.

Stakeholders

The stakeholders for this release are:

- Implementers of clinical information systems and contracted service provider systems consuming one or more of the My Health Record views generated by the My Health Record system;
- Commonwealth Department of Health; and
- National Infrastructure Operator.

Audience

The audiences for this release are:

- Implementers of clinical information systems and contracted service provider systems; and
- Senior managers and policy makers, clinical experts, health information managers, IT operations and support teams, and system integrators.

Known issues

The current version of the Authoring Systems CTS v1.0 has a known issue for the test case **TC-Types-60**.

The test case **TC-Types-60** should be read as follows:

For any data element of ISO data type CD or the derived type CodeableText (CodedText does not allow nullFlavor "OTH"):

Pass the test if the data element contains a code attribute and the value of code attribute is a member of the specified value domain and there is no nullFlavor attribute with a value of "OTH".

Else, Pass the test if the data element contains a code attribute and the value of code attribute is NOT a member of the specified value domain and there is nullFlavor attribute with a value of "OTH".

Else, Pass the test if the data element contains an originalText element and value of originalText element is NOT a member of the specified value domain and there is nullFlavor attribute with a value of "OTH".

Else, Pass the test if the data element contains an originalText element and value of originalText element is a member of the specified value domain and there is no nullFlavor attribute with a value of "OTH".

Else, Fail the test.

Support

For further support or to provide feedback, please email help@digitalhealth.gov.au.

Future releases

Further changes may occur from time to time in accordance with customer feedback or changes to source information. Supplementary guidance may also be provided from time to time based on implementation experience from vendors.

Date	Version
19 May 2016	EP-2320:2016 Common – Clinical Document v1.4.3 Release note Release rationale This incremental release of the Common – Clinical Document end product provides updates to the <i>Clinical Documents – Template Package Directory</i> to include references to the following product components: <ul style="list-style-type: none">• <i>Advance Care Document Custodian – Conformance Profile v1.0</i>• <i>Personal Health Summary – Conformance Profile v1.0</i> The <i>FAQ OIDs for HL7</i> has been revised to correctly show how a Medicare number may be used for an entity identifier for a subject of care. Three FAQs have been moved into this end product from the Common – Continuity of Care end product (which has been archived): <ul style="list-style-type: none">• <i>FAQ Nullable Fields Guidance</i> (This FAQ answers the question: What are the nullable fields in clinical documents conformant to the CDA implementation guides?)• <i>FAQ Global Statements None Known</i> (This FAQ answers the question: What is the proper use of none known in global exclusion statements?)• <i>FAQ Undifferentiated Pathology and Radiology Results</i> (This FAQ answers the question: What should we do if our system cannot distinguish between pathology and radiology reports?) The content of these three FAQs has not changed.

Date	Version
10 Mar 2016	EP-2241:2016 Common – Clinical Document v1.4.2
	Release note
	Release rationale
	This incremental release of the Common – Clinical Document end product provides updates to the Clinical Documents – Template Package Directory to include references to updated:
	<ul style="list-style-type: none">• eHealth Diagnostic Imaging Report – Conformance Profile v1.1• eHealth Pathology Report – Conformance Profile v1.1
	This release of the Common – Clinical Document end product aligns with approved change request CCB-0469.
29 Jan 2016	EP-2231:2016 Common - Clinical Document v1.4.1
	Release note
	Release rationale
	This incremental release of the Common - Clinical Document end product provides updates of the following product components:
	<ul style="list-style-type: none">• Clinical Documents – Conformance Test Specification for CDA Rendering;• Clinical Documents – My Health Record Usability Recommendations.
	Version 1.4 of the <i>Conformance Test Specification for CDA Rendering</i> provides clarifications for many of the test cases, improves the readability of the document, and adds a number of test cases in support of recently published Pathology Report and Diagnostic Imaging Report conformance profiles. Details of the changes are listed in the <i>Capabilities</i> section of this release note.
	Version 1.3 of <i>Clinical Documents – My Health Record Usability Recommendations</i> provides usability recommendations for clinical information systems authoring or rendering information contained in clinical documents and views exchanged with the My Health Record system.
	It is focused on recommendations applicable to <i>all</i> types of clinical documents. Additional usability recommendations have been published as follows:
	<ul style="list-style-type: none">• Shared Health Summary PCEHR Usability Recommendations v1.2; and• Event Summary PCEHR Usability Recommendations v1.1.
3 Dec 2015	EP-2198:2015 Common – Clinical Document v1.4
	Release note
	Release rationale
	This release of the Common - Clinical Document end product provides a new product component, <i>Conformance Test Specification for PCEHR Views v1.0</i> , which provides a targeted set of test cases, managed using a Microsoft Excel workbook.
	This conformance test specification supports the currently published PCEHR views specifications and their conformance requirements. Details of the document are listed in the <i>Capabilities</i> section of the release note.
	Additionally, four FAQs have been archived and are no longer included in this end product release.

This aligns the common conformance profile with the original intent and current practice.	CCP-238	Clarification	Clarification added that conformance points re local identifiers only apply to those local identifiers that are used by healthcare provider organisations.
Key	Category	Summary of change														
CCP-86	Addition	Filenames of attachments now need to match their indicated MIME type. This decreases the potential for malicious content and provides better rendering support for legitimate attachment content.														
CCP-223	Addition	All inline data within XML now needs to be text only. This ensures that any document that has inline data (such as an exe file) will be rejected by the receiving system.														
CCP-234	Clarification	Clarification added that a CDA Header is required for clinical documents at all conformance levels. This aligns the common conformance profile with the original intent and current practice.														
CCP-238	Clarification	Clarification added that conformance points re local identifiers only apply to those local identifiers that are used by healthcare provider organisations.														
	<p>The <i>Template Package Directory</i> has been updated to include references to template package libraries published for the following end products:</p>															
	<ul style="list-style-type: none"> • <i>Specialist Letter v1.3</i>; • <i>Australian Organ Donor Register v1.1</i>; and • <i>Pharmaceutical Benefits Report v1.1</i>. 															
18 Aug 2014	EP-1754:2014 Common - Clinical Document v1.1.3 Release note															
	<p>Release rationale</p>															
	<p>This incremental release of the Common – Clinical Documents end product introduces the <i>Template Package Directory</i>.</p>															
	<p>The purpose of this new product component is to provide implementers of clinical document specifications and other stakeholders with a comprehensive overview of available template packages and their current status.</p>															
	<p>The template package directory also contains hyperlinks referring to the download locations of all template packages. For each template package, the hyperlink refers to the location of the template package library containing the template package. Template package libraries are published for each clinical document type and are contained in the end product for the document type.</p>															

Date	Version
05 May 2014	EP-1589:2014 Common - Clinical Document v1.1.2
	Release note
	Release rationale
	<p>This incremental release of the Common - Clinical Document end product introduces <i>Clinical Documents – PCEHR Usability Recommendations</i>. This new product component replaces the <i>Supplementary Guidance for Implementers</i> product component introduced with the previous version of this end product.</p>
	<p>The <i>PCEHR Usability Recommendations</i> document contains implementation guidance previously published in <i>Supplementary Guidance for Implementers</i>. The new format, “usability recommendations”, makes it easier for implementers to assess whether their software conforms to the guidance.</p>
	<p>PCEHR usability recommendations are not part of PCEHR conformance requirements. Only the latter are used as the basis for conformance assessments performed as a prerequisite to PCEHR system integration. PCEHR usability recommendations can be used by implementers to perform usability assessments on a voluntary basis, for example, with the aim of providing their users with a consistently high level of usability.</p>
	<p>The <i>PCEHR Usability Recommendations</i> document also contains additional guidance for implementers, developed as part of NEHTA’s Clinical Usability Program (CUP) Release 2.</p>
	<p>This release also removes the developer resource product components and related product data sheets. These have been republished in two new end products:</p>
	<ul style="list-style-type: none">• <i>Clinical Documents Integration Toolkit v1.0</i>; and• <i>Secure Messaging Integration Toolkit v1.0</i>.
	<p>In addition, the document <i>Reference Platform - Vendor End 2 End Portal v1.4</i> has been archived as it is no longer relevant. <i>eSignature - Java Library v1.1.0</i> has also been archived since it is included in the libraries in the new integration toolkits</p>
24 Oct 2013	EP-1477:2013 Common - Clinical Document v1.1.1
	Release note
	Release rationale
	<p>This incremental release of the Common Clinical Document end product introduces supplementary guidance for the implementation of clinical documents, representing a key outcome of NEHTA’s Clinical Usability Program (CUP) Release 1.</p>
	<p>Aligning with the sets of template packages supported by PCEHR Releases 3.5 and 4, updated versions of the CDA Document Library sample code have been provided.</p>
	<p>This release also introduces a number of product data sheets, each containing the description of a type of non-document product associated with this end product.</p>

Date	Version									
09 Oct 2013	EP-1457:2013 Common - Clinical Document v1.1 Release note									
	Release rationale									
	This release of the Common Clinical Document end product introduces updates to the conformance profile for Common Clinical Documents, as mandated by the following approved change requests.									
	<table border="1"> <thead> <tr> <th data-bbox="352 461 555 488">Change request ID</th> <th data-bbox="719 461 938 488">Change request title</th> <th data-bbox="1086 461 1331 488">Impact on this release</th> </tr> </thead> <tbody> <tr> <td data-bbox="352 512 464 539">CCB-0116</td> <td data-bbox="719 512 1027 595">Relaxation of the mandatory use of HPI-IS in uploaded documents</td> <td data-bbox="1086 512 1433 566">New conformance requirements added for local identifiers.</td> </tr> <tr> <td data-bbox="352 622 464 649">CCB-0222</td> <td data-bbox="719 622 1050 676">Support for CSP Certificates in CDA Documents</td> <td data-bbox="1086 622 1437 936">Conformance requirements regarding digital signatures previously contained in document-type specific Conformance Profiles have been consolidated and revised in this version of the Common Conformance Profile. New conformance requirements added for Legal Authenticator, Approver and Custodian.</td> </tr> </tbody> </table>	Change request ID	Change request title	Impact on this release	CCB-0116	Relaxation of the mandatory use of HPI-IS in uploaded documents	New conformance requirements added for local identifiers.	CCB-0222	Support for CSP Certificates in CDA Documents	Conformance requirements regarding digital signatures previously contained in document-type specific Conformance Profiles have been consolidated and revised in this version of the Common Conformance Profile. New conformance requirements added for Legal Authenticator, Approver and Custodian.
Change request ID	Change request title	Impact on this release								
CCB-0116	Relaxation of the mandatory use of HPI-IS in uploaded documents	New conformance requirements added for local identifiers.								
CCB-0222	Support for CSP Certificates in CDA Documents	Conformance requirements regarding digital signatures previously contained in document-type specific Conformance Profiles have been consolidated and revised in this version of the Common Conformance Profile. New conformance requirements added for Legal Authenticator, Approver and Custodian.								
	In addition to these changes, the structure of the document has been modified to improve clarity and readability. This structural change does not affect the contents of any of the conformance requirements.									

10 Nov 2011	EP-1094:2011 Common - Clinical Document v1.0.2 Release note
	Release rationale
	This incremental release includes:
	<ul style="list-style-type: none"> • updated sample code to address a small change in the CDA packaging library; and • updates to three FAQ title prefixes (document content is unchanged).

Publication date: 16 June 2017
