Core Level One Clinical Document
Release Note

24 July 2018   v1.0
Approved for external use
Document ID: DH-2647: 2018

EP-2648:2018 Core Level One Clinical Document v1.0

Release rationale

The Core Level One Clinical Document is a CDA container for the electronic representation of clinical information provided by source systems. For example, documents in PDF format could be included in the CDA container so it can be accepted by the My Health Record.

Although this Core Level One Clinical Document could ostensibly be used for any clinical document, it can only be used when permitted in the My Health Record technical specifications authored by the Australian Digital Health Agency.

Package inclusions

New

Identifier	Name
DH-2647:2018	*Core Level One Clinical Document – Release Note v1.0* (this document)
DH-2579:2018	*Core Level One Clinical Document – Structured Content Specification v1.1*
DH-2580:2018	*Core Level One Clinical Document – CDA Implementation Guide v1.1*

Stakeholders

The following stakeholders have been involved in the development of this release:

- Commonwealth Department of Health

- National Infrastructure Operator (NIO)

- National Prescription and Dispense Repository (NPDR) Operator

Audience

- Software development teams, architects, designers, clinicians and informatics researchers who are responsible for the delivery of clinical applications, infrastructure components and messaging interfaces, and also for those who wish to evaluate the clinical suitability of the Agency-endorsed specifications.

- Technical and non-technical readers
