

PCEHR Prescription and Dispense View

Release note v1.1

26 June 2013

Approved for external information

Summary

EP-1361:2013 PCEHR Prescription and Dispense View v1.1

The PCEHR Prescription and Dispense View will be provided as a Clinical Document Architecture (CDA) document by the Personally Controlled Electronic Health Record (PCEHR) system.

The individual will be able to retrieve PCEHR Prescription and Dispense View CDA documents through their PCEHR, and healthcare providers with access to the individual's PCEHR will be able to access these same documents using the PCEHR system's business-to-business gateway. The individual's PCEHR Prescription Record and PCEHR Dispense Record data items stored in the PCEHR system serve as source data for the individual's PCEHR Prescription and Dispense View.

The PCEHR Prescription and Dispense View CDA specifications form part of the foundational set of specifications to support the development of an individual's PCEHR.

Release rationale

This release will:

- Assist clinical information system vendors to render and display the Prescription and Dispense View in a consistent manner while taking advantage of the safety assessment that has been carried out in this guide's development. All the mandatory guidance points will form the basis of compliance audits of the implementation in vendor software.
- Provide clinical information system vendors with a style sheet that is aligned to and conformant with the *PCEHR Prescription and Dispense View Presentation Guide* that they can integrate into their products. This supersedes version 1.0.1 which was a limited release made available to the vendor panel on 21-March-2013.

Package inclusions

New or updated inclusions

Identifier	Name	Version
NEHTA-1359:2013	<i>PCEHR Prescription and Dispense View Presentation Guide</i>	1.0
NEHTA-1358:2013	<i>PCEHR Prescription and Dispense View Style Sheet</i>	1.1.0

No change to the following inclusions

Identifier	Name	Version
NEHTA-1126:2013	<i>PCEHR Prescription and Dispense View Structured Content Specification</i>	1.0
NEHTA-1127:2013	<i>PCEHR Prescription and Dispense View CDA Implementation Guide</i>	1.0
NEHTA-1335:2013	<i>Conformance Profile for PCEHR Prescription and Dispense View</i>	1.1

Withdrawn

No components have been withdrawn.

Scope

The *PCEHR Prescription and Dispense Presentation Guide* covers:

- Presentation guidance for the Prescription and Dispense View.
- Illustrations of guidance points.
- Visual design of the Prescription and Dispense View.
- Rationale for design choices.
- Unmitigated risks with design choices.
- General risks.
- Next steps for the Prescription and Dispense View.

This *PCEHR Prescription and Dispense Presentation Guide* does not cover:

- Other views and requirements for the PCEHR.
- Technical specification for rendering the Prescription and Dispense View.
- Conformance Compliance and Accreditation (CCA) requirements.
- Interoperability between systems generating the Prescription and Dispense View and those rendering it.
- Presentation of the underlying PCEHR Prescription Record and PCEHR Dispense Record clinical documents.

Stakeholders

The following stakeholders have been involved in the development of this release:

- NEHTA.
- eHealth Implementation site partners and vendors.
- PCEHR National Infrastructure Operator.
- Department of Health and Ageing.

Audience

The intended audience of this document includes:

- Clinical peak bodies, representative groups and subject experts in the area of pharmacy and general practice.
- Hospitals and health departments planning, implementing or upgrading eHealth systems.

- Software vendors, software developers and designers developing eHealth system products.
- General practitioner desktop software vendors.
- Community pharmacy desktop software vendors.
- Jurisdictions, health service providers and health software representative groups.
- Senior managers and policy makers, clinical experts, health information managers and system integrators.
- Stakeholders associated with the development and use of upcoming eHealth initiatives relating to Medications Management.
- Individuals and individual representatives.

For further details on access to this release please send an email to help@nehta.gov.au.

Known issues

Reproduced from the 'Known Issues' section of the *PCEHR Prescription and Dispense View Structured Content Specification, v1.0, 9 May 2013*.

Reference	Description
Links to external resources	If a link (usually in the references section) spans across several lines, certain combinations of PDF reader and web browser have problems opening it.
No requirements	There are no written requirements for this document. However, it was constructed using the Detailed Clinical Model for Medication Action (which is used for many PCEHR structured document specifications).
Medication Action DCM v4.0	Version 4.0 of Medication Action Detailed Clinical Model has not yet been published.
Unique Pharmacy Prescription Number	This is only meaningful when used together with the Pharmacy Approval Number assigned by Medicare Australia. The Pharmacy Approval Number is recorded in the Entitlement Number data element of the Dispensing Organisation. Any extract of the Dispense Item must include that information from the document context to be meaningful.

Support

This release will be supported for two years from the date of publication.

For further support or to provide feedback, please email help@nehta.gov.au.

Future releases

If the National Infrastructure Operator identifies issues in the implementation of these specifications, an incremental update may be released. Any change will be managed through the support process described in the previous section.

Previous releases

Version	Date	Comments
1.0	07-May-2013	First release, consisting of the following components: <ul style="list-style-type: none">• <i>PCEHR Prescription and Dispense View Structured Content Specification v1.0</i>• <i>PCEHR Prescription and Dispense View CDA Implementation Guide v1.0</i>• <i>PCEHR Prescription and Dispense View Conformance Profile 1.1</i>
