

Advance Care Document Custodian Release Note

24 July 2018 v1.1.1
Approved for external use
Document ID: DH-2664:2018

End product identifier: EP-2662:2018

Release rationale

Advance Care Document Custodian

This incremental release of the *Advance Care Document Custodian* end product provides an update to the *Template Package Library*.

Template package library

The sole template package in the template package library has been updated to correct a defect in the MANIFEST file that prevented the My Health Record system from correctly retrieving the CDA™¹ schema files. This defect did not affect the execution of the template package by the Clinical System Validator.

The template package ID has not been updated as part of this change. The version number has been updated to 40490.

Document type variant	Conformance level	Template package ID
default	3A	1.2.36.1.2001.1006.1.16696.3 - CL 3A (svn-40490)

The full list of published template packages can be found in the *Template Package Directory* published as part of the *Common – Clinical Document* end product.

Package inclusions

New

None.

Stakeholders

- National Infrastructure Operator.

Audience

This release is intended for:

- developers of clinical information systems and contracted service provider systems;
- health information managers;
- IT operations and support teams;
- system integrators; and
- the National Infrastructure Operator.

Known issues

None known.

Support

For further support or to provide feedback, please email help@digitalhealth.gov.au.

Future releases

Increased uptake and implementation of the specifications provided as part of this end product are expected to result in the need to further update and improve these specifications. Any such updates will be managed through the joint change control process operated by the Commonwealth Department of Health.

In addition to changes managed through the joint change control process, the Agency may provide supplementary implementation guidance for the specifications of this end product. Such information will be added to the end product as additional or updated product components and published as an incremental release of the end product (version identifier 1.0.x).
