

eHealth Dispense Record Release Note

24 July 2018 v1.2.1
Approved for external use
Document ID: DH-2687:2018

EP-2690:2018 eHealth Dispense Record v1.2.1

Release rationale

This release of the eHealth Dispense Record includes the following changes to the eHealth Dispense Record My Health Record Conformance Profile:

- Dispense Records stored in the My Health Record system can now be replaced by invoking the B2B “remove” and “upload” web services. Before this release, the only way to replace a Dispense Record was to invoke the “supersede” B2B web service.
- Contradicting requirement was removed from section 2.2.12.

The changes in this release are backwards compatible with the current template package.

Document type variant	Conformance level	Template package ID
HPIIRelaxed	3A	1.2.36.1.2001.1006.1.170.4
Default	3A	1.2.36.1.2001.1006.1.170.5

The end product has a dependency on *Clinical Documents – Common Conformance Profile v1.4*.

Package inclusions

New

None.

Updated (supersedes previous version)

Identifier	Name
DH-2687:2018	<i>eHealth Dispense Record – Release Note v1.2.1 (this document)</i>

Removed

None.

Stakeholders

The following stakeholders have been involved in the development of this release:

- Commonwealth Department of Health;
- National Infrastructure Operator (NIO); and
- National Prescription and Dispense Repository (NPDR) Operator.

Audience

This release is intended for:

- implementers of clinical systems producing or consuming eHealth Dispense Record clinical documents;
- senior managers and policy makers, clinical experts, health information managers, IT operations and support teams, and system integrators; and
- technical and non-technical readers.

Known issues

None known.

Support

For further support or to provide feedback, please email help@digitalhealth.gov.au.

Future releases

Further changes may occur from time to time in accordance with customer feedback or changes to source information. Supplementary guidance may also be provided from time to time based on implementation experience from vendors.

Previous releases

Date	Version									
17 Feb 2015	<p>EP-1918:2015 eHealth Dispense Record v1.2</p> <p>Release note</p> <p>Release rationale</p> <p>This release of the eHealth Dispense Record end product introduces support for Australian Medicines Terminology (AMT) version 3 codes for therapeutic goods.</p> <p>In previous releases, codes for the identification of therapeutic goods needed to be sourced from AMT version 2 and Pharmaceutical Benefits Scheme (PBS) code sets only. This limitation has been removed in this release, allowing document producers to also include codes from AMT version 3. This change has been applied in updated versions of the following product components:</p> <ul style="list-style-type: none"> • PCEHR Conformance Profile; and • Template Package Library. <p>The new version of the Template Package Library contains the following new template packages. Document producers need to ensure providing the corresponding new template package ID when uploading their documents to the PCEHR system.</p> <table border="1"> <thead> <tr> <th>Document type variant</th> <th>Conformance level</th> <th>Template package ID</th> </tr> </thead> <tbody> <tr> <td>HPIIRelaxed</td> <td>3A</td> <td>1.2.36.1.2001.1006.1.171.4</td> </tr> <tr> <td>default</td> <td>3A</td> <td>1.2.36.1.2001.1006.1.171.5</td> </tr> </tbody> </table> <p>The full list of published template packages can be found in the Template Package Directory v1.3¹</p> <p>This end product has a dependency on Clinical Documents - Common Conformance Profile v1.4.²</p> <p>The changes applied as part of this release are aligned with approved change request CCB-0409.</p>	Document type variant	Conformance level	Template package ID	HPIIRelaxed	3A	1.2.36.1.2001.1006.1.171.4	default	3A	1.2.36.1.2001.1006.1.171.5

[Release note](#)

Release rationale

This incremental release of the eHealth Dispense Record end product introduces the *Template Package Library* as a new product component. The version of the Template Package Library included in this version of the end product contains all template packages available for the eHealth Dispense Record document type at the time of publication.

Of those template packages, the following are aligned with the most recent PCEHR Conformance Profile for eHealth Dispense Record documents that is contained in version 1.1 of the eHealth Dispense Record end product³.

Document type variant	Conformance level	Template package ID
HPIIRelaxed	3A	1.2.36.1.2001.1006.1.171.2
default	3A	1.2.36.1.2001.1006.1.171.3

Future versions of the Template Package Library will only contain template package aligned with the most recent version of the PCEHR Conformance Profile.

The full list of published template packages can be found in the *Template Package Directory*⁴ published as part of the *Common – Clinical Document v1.1.3*⁵ end product.

Following approved change request CCB-0297, the name of the document type *PCEHR* Dispense Record has been changed to *eHealth* Dispense Record. This name change is reflected in the name of this end product and the names of its new or updated product components. Names of other product components will be adjusted upon their next update.

This end product has a dependency on *Clinical Documents - Common Conformance Profile v1.4*⁶ published as part of the *Common – Clinical Document v1.1*⁷ end product

[Release note](#)

Release rationale

This release of the PCEHR Dispense Record end product introduces updates to the conformance profile for PCEHR Dispense Record documents, as mandated by the following approved change requests.

More detailed information about the referenced change requests is provided in the *Capabilities* section of this document.

Change Request ID	Change request title	Impact on this release
CCB-0116	Relaxation of the mandatory use of HPI-Is in uploaded documents	New conformance requirement added for inclusion of local identifier in case of HPI-I omission.
CCB-0219	Prescription and Dispense Consent Requirements	New conformance requirements added to require consumer consent before upload of a PCEHR Dispense Record document.
CCB-0222	Support for CSP Certificates in CDA™ ⁸ Documents	Removed conformance requirements for digital signatures. This requirement has been replaced with an expanded conformance requirement in the <i>Clinical Documents - Common Conformance Profile v1.4</i> .

This end product has a dependency on: NEHTA-1446:2013 Clinical Documents - Common Conformance Profile v1.4 (part of EP-1457:2013 *Common – Clinical Document v1.1*).
