Healthcare Identifiers Integration Toolkit Release Note

24 April 2018   v1.2
Approved for external information
Document ID: DH-2611:2018

Related end product identifier: EP-2610:2018

Release rationale

Version 1.2 of the Healthcare Identifiers Integration Toolkit provides defect fixes and performance improvements for the following sample code product:

- Healthcare Identifiers B2B Client Library - .NET Sample Code v1.4.0.

Developers using this sample code library should consider upgrading to the new version, as it resolves a number of potential performance issues.

Please refer to the Change Details section below for more detailed information about the changes included in this release.

Package inclusions

Updated

Identifier	Name and version
DH-2611:2018	Healthcare Identifiers Integration Toolkit - Release Note v1.2 *(this document)*
DH-2612:2018	Healthcare Identifiers B2B Client Library - .NET Sample Code v1.4.0

No change

Identifier	Name and version
NEHTA-1931:2014	Healthcare Identifiers B2B Client Library - Java Sample Code v1.5.0
NEHTA-1929:2014	Healthcare Identifiers B2B Client Library - Compiled WSDLs for Java v1.5.0
NEHTA-1615:2014	Healthcare Identifiers B2B Client Library - Product Data Sheet v1.1

Change details

Healthcare Identifiers B2B Client Library - .NET Sample Code v1.4.0

Type	ID	Change
Defect	IPHI-17	Remove duplicate call of searchForProviderIndividual
Improvement	IPHI-18	Unbundling of NuGet DLL

Audience

- Developers of software applications integrating with the Healthcare Identifiers Service;

- Senior managers and policy makers, clinical experts, health information managers, IT operations and support teams and system integrators.

Support

For further support or to provide feedback, please email the Agency Help Centre at help@digitalhealth.gov.au or phone 1300 901 001. Your views on the scope and usability of the Healthcare Identifiers Integration Toolkit will inform future releases.

Future releases

The Healthcare Identifiers Integration Toolkit will be released on an ad-hoc basis, based on providing new functionality or other changes as required.

Previous releases

Date	Version
19 Dec 2014	EP-1941:2014 Healthcare Identifiers Integration Toolkit v1.1 Release note **Release rationale** This release includes additional B2B functionality not previously included in the libraries. The libraries now support the management of organisational information, including the publishing of an organisation and ELS endpoint to support SMD. The Java library has also been updated and aligned with all other Java-based code to support up to Java version 7.2.1.
11 Mar 2014	EP-1634:2014 Healthcare Identifiers Integration Toolkit v1.0 Release note **Release rationale** The eHealth integration toolkits are a collection of integration tools and sample code resources available in both .NET and Java. The sample code and integration tools are used within the eHealth Reference Platform, forming part of the code library for tools and simulators. Access to sample code and the eHealth Reference Platform's online simulator services is supported by suitable right-to-use licenses and terms and conditions regarding the eHealth Reference Platform.[1] (The eHealth integration toolkits are available from https://www.digitalhealth.gov.au/implementation-resources/ehealth-reference-platform) The Healthcare Identifiers Integration Toolkit contains libraries for B2B connectivity to the Health Identifiers Service, searching for IHI, HPI-Is and HPI-Os. Note that the product components included in this release were previously released on nehta.gov.au as part of the Healthcare Identifiers Service end products. See page 3 for a mapping of the relevant product component identifiers.

---

[1] Notice of Connections (NOC) for HI and PCEHR, and CCA conformance testing for all code, must still be completed by the vendor as per the license agreement that accompanies each product, which states that it is the vendor's "responsibility to test and validate the use of this product within your software".

Earlier releases

Some of the product components in this release, or their earlier versions, were previously released on nehta.gov.au under a different end product, with a different identifier and slightly different name.

The table below shows the mapping between product identifiers, sorted by the old identifier. The highlighted rows indicate that the new identifier is for an updated version of the product component (which supersedes the previous version).

Old identifier (previous end product)	New identifier (for this end product)
NEHTA-1374:2013	NEHTA-1612:2013
NEHTA-1375:2013	NEHTA-1614:2014
NEHTA-1376:2013	NEHTA-1613:2013
NEHTA-1409:2013	NEHTA-1615:2014
