

Aged Care Transfer Summary Release Note

30 November 2023 v1.1
Approved for external information
Document ID: DH-3853:2023

Related end product identifier: EP-3851:2023

The Aged Care Transfer Summary (ACTS) is a digital solution using My Health Record that facilitates access to crucial health information relating to an aged care resident to support clinical hand-over when an individual is transferred from an aged care setting to acute hospital care.

The ACTS implements three new record types into the My Health Record system for the sharing of residential health information from Residential Aged Care Facilities (RACFs) systems. These include a Residential Care Transfer Reason, Residential Care Medication Chart and Residential Care Health Summary.

A Residential Care Transfer Overview consolidated view is also available within the My Health Record system containing information relevant to the receiver of the aged care resident, with a summary of the most current health information available within My Health Record.

Release rationale

The ACTS has been developed in response to the Royal Commission into Aged Care Quality and Safety Final Report (March 2021) – Recommendations 68 & 66.

Benefits of the ACTS in My Health Record:

- Improved and timely information sharing between healthcare providers, in transition of care scenarios (between RACFs)
- Provides a central source of information for relevant healthcare providers, residents, and their carers via My Health Record

This is an incremental release of ACTS specifications, where we have removed the HPI-I relaxed template packages from 'Aged Care Transfer Summary – My Health Record Template Package Library' bundle.

The *Connecting Australian Healthcare – National Healthcare Interoperability Plan 2023-2028* is to deliver a connected healthcare system. Identity is the priority area in the Interoperability Plan. An action under Priority 1 – Identity, is to review and adopt national healthcare identifiers (action 1.1) and promote

healthcare organisations’ implementation of Healthcare Provider Identifiers – Individual (HPI-I) (actions 1.5). HPI-Is are a mandatory requirement for My Health Record.

Package inclusions

Updated

Identifier	Name and version
DH-3852:2023	<i>Aged Care Transfer Summary – My Health Record Template Package Library v1.1</i>
DH-3853:2023	<i>Aged Care Transfer Summary – Release Note v1.1 (this document)</i>

No Change

Identifier	Name and version
DH-3787:2023	<i>Aged Care Transfer Summary – My Health Record Conformance Profile v.1.2</i>

Stakeholders

The following stakeholders have been involved in the development of this release:

- Department of Health and Aged Care
- National Infrastructure Operator
- State and territory health departments.

Audience

The authorised Healthcare Provider/s at the RACF will provision the ACTS document type uploads to a resident’s My Health Record, using the Software products/ systems provisioned with the ACTS documents functionality.

Capabilities

Clinical Information Systems that view the My Health Record system will need to ensure the new document types can be accessed by their users. This will typically involve ensuring the new documents are selectable document types on the document list screen. We recommend these documents are included by default.

The table below defines the type codes and class codes for the ACTS records.

Rendering Label	Type code	Coding System	Class code	Code display	Coding System
Residential Care Transfer Reason	100.32044	NCTIS Data Components	18761-7	Transfer Summary	LOINC
Residential Care Medication Chart	100.32046	NCTIS Data Components	80565-5	Medication Chart	LOINC
Residential Care Health Summary	100.32049	NCTIS Data Components	100.32050	Patient Health Summary	NCTIS Data Components
Residential Care Transfer Overview	100.32047	NCTIS Data Components	18761-7	Transfer Summary	LOINC

Known issues

We have identified the following open issues in this release:

- None
