My Health Record FHIR Gateway
Release Note

11 June 2024   v2.5
Approved for external use
Document ID: **DH-3952:2024**

Related end product identifier: **EP-3998:2024**

These technical specifications enable developers to connect applications to the My Health Record system via the FHIR® Gateway. They describe API requests and responses, data mapping between CDA implementation guide fields and Fast Healthcare Interoperability Resources (FHIR®), and the error scenarios and associated error codes for all APIs. It is intended for use by FHIR® API consumers to understand the API signature exposed by the My Health Record system and the 'my health App'.

Release rationale

Editorial update to the current API (v3.0.0) specification of the My Health Record FHIR gateway to refer software developers to the Agency My Health Record document register on the GitHub website for the full list of My Health Record supported types and views.
