

NASH Organisation Certificate Tracker v1.0

Release Note

17 March 2016

Approved for external information

End product identifier: EP-2252:2016

Release rationale

The NASH¹ Organisation Certificate Tracker (Certificate Tracker) helps healthcare provider organisations track their certificate expiration dates.

Healthcare provider organisations need active NASH PKI certificates for healthcare provider organisations (NASH certificates) to both access the My Health Record system and securely send and receive information via secure message delivery (SMD) services. NASH certificates expire after two years and need to be regularly renewed to ensure ongoing connectivity.

The Certificate Tracker is a simple tool for listing the expiration dates of NASH certificates. It retrieves the expiration dates of NASH certificates for any given HPI-O and optionally all other HPI-Os within the same HPI-O network.

For larger organisations with HPI-Os across multiple HPI-O networks, the Certificate Tracker supports bulk searches by loading lists of known HPI-Os from external files.

The resulting list of certificates and their expiration dates can be exported to CSV format for further use by practice management staff and inclusion in their corporate reminder system.

Limitations

The Certificate Tracker is limited to tracking expiration dates for NASH PKI certificates for healthcare provider organisations. Other types of certificates, such as Medicare PKI site certificates, Medicare individual PKI certificates, NASH PKI certificates for *individual* healthcare providers or NASH PKI certificates for *supporting* organisations, are beyond the scope of the tool.

The Certificate Tracker does not provide any functionality for the further management of these certificates, including their removal or replacement. Such tasks should be undertaken by a suitably skilled IT professional.

Licence

The software licence terms and conditions for the Certificate Tracker and incorporated third-party components are included in the software package.
